

A Year of Challenge and **Success**

2009 Annual Report

Financial Summary

in millions, except share and per share data

Summary of Operations	2009	2008
Sales	\$ 2,380	\$ 3,110
Earnings before interest and income taxes	207	187
Income from continuing operations, net of tax	152	114
Net income	\$ 145	\$ 56
Weighted average shares (diluted, in thousands)	61,234	60,848
Earnings per share (diluted)		
Income from continuing operations	\$ 2.45	\$ 1.85
Net income	\$ 2.34	\$ 0.91
Dividends per share	\$ 0.63	\$ 0.60
Comparative Balance Sheet		
Assets		
Current assets	\$ 800	\$ 968
Property, plant and equipment, net	482	513
Other assets	632	595
Total	\$ 1,914	\$ 2,076
Liabilities and Shareholders' Equity		
Current liabilities	\$ 301	\$ 443
Long-term liabilities	394	539
Shareholders' equity	1,219	1,094
Total	\$ 1,914	\$ 2,076
Cash Flow		
Operating cash flow	\$ 447	\$ 274
Capital expenditures	\$ 48	\$ 68

To Our Shareholders

David A. Roberts,
Chairman, President & Chief Executive Officer

2009 was a challenging year as we encountered the most difficult economic period in recent memory. Our sales of \$2,380 million were down 23%, compared to \$3,110 million in 2008, and earnings before interest and income taxes (EBIT) were \$207 million, an increase of 11% compared to \$187 million in 2008. In spite of the sales decline we were able to increase our EBIT margins from 6.0% to 8.7% year-over-year and efficiently manage our businesses so that we generated \$447 million in cash from operations. This enabled us to navigate through the economic storm of 2009 and exit the year in a very strong financial position. This excellent cash performance was the result of superb working capital management within each of our businesses. This cash enabled us to make long-term business investments such as the purchase of a new tire factory in Jackson, Tennessee, where we are consolidating three of our existing tire manufacturing plants into a world class facility that will allow us to serve our customers for years to come; the acquisitions of Jerrik and Electronic Cable Specialists, which expand our product offering, geographic reach and customer base in our interconnect technologies business; and the acquisition of the remaining interest in Japan Power Brake, allowing us to expand our global presence in our off-road braking business.

Our strong cash flow position also allowed us to reduce the borrowings against our revolving credit line and accounts receivable securitization program from \$235 million at the end of 2008 to zero at the end of 2009. By reducing our dependence on this financing, we were able to decrease our 2009 interest expense by \$19 million, as compared to the prior year. At the same time we contributed \$53 million to our pension plans which has resulted in the qualified plan becoming funded. Our strong balance sheet and available credit lines poise us to take advantage of potential acquisitions and further invest in our core businesses while growing our revenue and expanding our earning margins. If there was ever a year not to be dependent upon the banks, 2009 was that year. Additionally, we increased our dividend to our shareholders for the 33rd consecutive year.

Five-Year Performance Graph

The table below shows how a \$100 investment in Carlisle Companies Incorporated has grown over the five-year period ending December 31, 2009 as compared to a \$100 investment in the S&P 500 Composite Index and the Peer Group Index.

	Carlisle	S&P 500	Peer Group
2004	\$100.00	\$100.00	\$100.00
2005	\$109.69	\$104.91	\$110.21
2006	\$127.78	\$121.48	\$129.44
2007	\$123.74	\$128.15	\$168.16
2008	\$ 72.14	\$ 80.73	\$ 95.18
2009	\$122.32	\$102.10	\$125.80

The Peer Group Index includes Cooper Industries, Ltd., Crane Co., Danaher Corp., Dover Corp., Emerson Electric Co., General Electric, Harsco Corp., Illinois Tool Works Inc., Ingersoll-Rand Co., Ltd., ITT Corp., Parker Hannifin Corp., Pentair, Inc., Roper Industries, Inc., SPX Corp., Teleflex Inc., Textron Inc., and United Technologies Corp. The Company believes that these public companies have similar industrial characteristics and constitute an appropriate index.

A significant contributor to improved margins during 2009, resulting in more than \$20 million in cost savings, was the implementation of the Carlisle Operating System (COS). COS is our continuous improvement process that is based on lean principles and is quickly becoming ingrained in the Carlisle culture. 2009 was our first full year that COS was deployed enterprise-wide and is redefining the way we do business. Waste is being eliminated and efficiencies improved at every level, allowing us to increase our overall profitability. Our employees are becoming increasingly engaged in COS and have recognized that the role they play makes a significant difference in the overall success of Carlisle. In addition to the \$20 million in cost savings, COS drove such significant change in our businesses that we were able to reduce factory space as our operations became more efficient and inventory requirements were reduced. In many cases we saw productivity increases of 20-30%, work-in-process inventory reductions of approximately 50% and square footage reductions of 50% due to COS. Improvements were not limited to production areas as COS enhanced new product development, engineering, purchasing, warranty, product rationalization and other areas. While we made progress in 2009, we are far from done. Similar savings are forecasted for 2010 as COS continues to change the way Carlisle does business.

Using COS methodologies we took a critical look at the utilization of our facilities and found that we could do more with less. During the past two years we completed the closure of ten Carlisle tire and wheel distribution centers, consolidating activities into our nine remaining centers. In the past twelve months, we closed two of our three California wheel plants, moving those operations into one facility in Ontario, California, and began the consolidation of six tire plants into three, with one of the remaining facilities being our new plant in Jackson, Tennessee. We consolidated two of our Chinese tire manufacturing facilities into our plant in Meizhou and closed one of our Buji plants. The Buji plant closure enabled us to transfer some of the products we were manufacturing in China back to our U.S. operations where our overall cost structure has become very competitive with Chinese manufacturing facilities.

The following graph shows a five-year comparison of cumulative total returns for Carlisle, the S&P 500 Composite Index and the Peer Group Index. All values assume the reinvestment of dividends.

COS productivity gains also drove other facility closings. Two Carlisle Interconnect Technologies plants in Washington State ceased operations, one in Tukwila, which has already closed, and another in Vancouver, which is scheduled to close during the second quarter of 2010. Also, the industrial brake and friction plant in Logansport, Indiana, will close in mid-2010.

There was, however, a Trail King facility in Brookville, Pennsylvania, that we closed due to declining demand brought on by a slowing economy. The accumulated savings from all of the facility closings will be in excess of \$40 million annually.

We were not able to find a viable buyer for Motion Control, our on-road heavy-duty friction and brake shoe manufacturer, which led to the liquidation of the business and brought an end to the operation's monthly losses and cash consumption.

During the first quarter of 2010, we announced the further streamlining of our operations by the reorganization of our businesses into five segments. This allows us to, again, do more with less. We have eliminated the management position of Group President and each segment will be managed by a simpler, smaller and more focused Executive Team. The new segments will be:

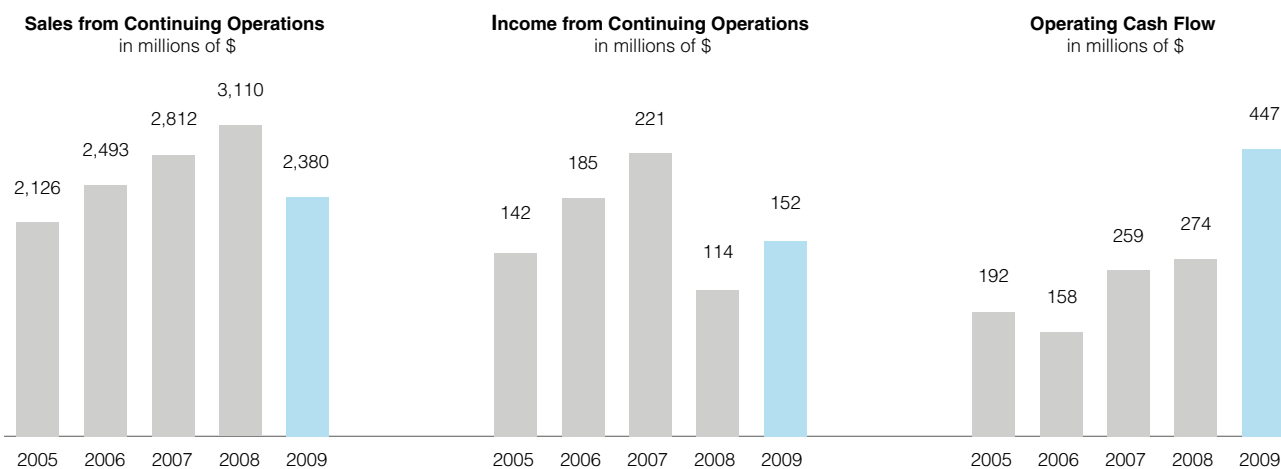

Carlisle Construction Materials

Carlisle Engineered Transportation Solutions

Carlisle Interconnect Technologies

Carlisle FoodService Products

Carlisle Specialty Products

Because the future will demand that we apply new ideas and approaches to all that we do, we continued to invest in our people during 2009. While other companies were cancelling or delaying development and training programs, we increased our emphasis on both. We are in the process of training all of our people in COS techniques, a strong area of focus for us throughout 2009.

While business levels dictated that we had to reduce our workforce in some areas, we increased the number of engineers that we employ. We feel that the future of our business hinges on new product development and designing products for specific markets and geographic regions.

We also continued to actively manage our company's health care costs in 2009 through a company-wide program we call the Carlisle National Medical and Wellness Plan. Through this plan our employees will manage their medical expenditures while taking advantage of preventative services. Additionally, we are increasing our employees' awareness of medical costs and focusing them on preventive strategies.

Though some very experienced Board members retired over the past eighteen months, we strengthened our Board with the addition of Robert Bohn, Terry Growcock, Gregg Ostrander and Robin Adams. They represent sitting CEOs and a CFO of strong global companies, most larger than our own. Each of them will be a vital resource as Carlisle grows, expands globally, continues to be acquisitive and becomes more profitable.

We continue to work to breed a culture of continuous improvement, while empowering and encouraging decision-making at the local company level, close to the customer and by those who know their markets best. However, we leverage our corporate size when it helps our businesses and have developed a corporate-wide system to share best practices for the benefit of all of our operations.

The Carlisle Operating System, our continuous improvement process based on lean principles, resulted in more than \$20 million in cost savings during 2009 and is quickly becoming ingrained in the Carlisle culture.

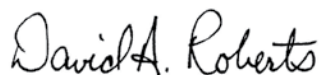

The “5-15-30-15-100 Vision,” introduced two years ago, remains our goal and becomes clearer with each step we take in building a better Carlisle. I believe our performance throughout 2010 and beyond will be dependent on our continued focus and execution of our five strategic priorities:

The Vision - Building a Better Carlisle

- \$5** billion in sales
- 15%** operating margins
- 30%** of revenue outside the United States
- 15%** return on invested capital
- 100%** free cash conversion rate

Our operating management has demonstrated tremendous commitment towards these corporate initiatives. And our employees in every Carlisle company have shown enormous initiative and enthusiasm in building Carlisle for the future during a very difficult year.

We have ambitious goals - but we are resolute and pragmatic in how we plan to achieve them. We thank our customers, dealers, suppliers and investors for the trust that they have placed in us. We are ready for the challenges of 2010 and beyond...and the growth that will come from them.

David A. Roberts
Chairman, President & Chief Executive Officer

Carlisle at a glance

Carlisle Engineered Transportation Solutions

Manufactures bias and radial tires, specialty wheels, power transmission belts, and off-highway braking and actuation systems for outdoor power equipment, all-terrain vehicles, snowmobiles, recreational and exercise equipment, agriculture equipment, construction equipment, industrial equipment, the wind energy market, military equipment and automotive aftermarkets.

The continued transformation of Carlisle into a lean enterprise is yielding positive results. With a strong management team in place to implement this strategy, our people and processes will render us a strong and successful company in 2010 and beyond.

Carlisle Construction Materials (CCM)

Manufactures a complete range of single-ply roofing and waterproofing systems focused on optimizing the performance of the building envelope. A leading innovator in the commercial and industrial roofing and waterproofing industry, CCM's expertise includes EPDM (rubber), TPO (thermal plastic) and modified bitumen-based membranes as well as high thermal polyisocyanurate and expanded polystyrene insulation products that contribute to the reduction of energy use in the "built environment."

Carlisle FoodService Products

Produces a wide range of commercial and institutional foodservice permanentware, catering equipment, meal delivery systems and disposable food containers for use in restaurants, hotels, hospitals, long-term care facilities, schools and universities, and commercial grade brushes, cleaning tools, and waste handling products for janitorial supply wholesalers and food processors.

Carlisle Interconnect Technologies

Designs and manufactures high performance wire and cable, RF/microwave connectors, avionics trays, racks, integrated subsystem and complex cable assemblies for applications in the aerospace, military and defense electronics, and test and measurement industries.

Carlisle Specialty Products

Trail King designs and builds specialized, custom heavy-haul and bulk commodity trailers, truck and trailer dump bodies, and other specialty trailers for heavy equipment dealers and contractors, specialized and commercial haulers.

B u i l d i n g

Value

The increasing desire of building owners to improve the energy efficiency of their buildings, combined with the millions of square feet of roofing installed by Carlisle Construction Materials, led to the creation of a new division during 2009, Carlisle Energy Services.

John W. Altmeyer
President - Carlisle Construction Materials

Carlisle Construction Materials

The commercial construction market endured a severe contraction in 2009, following a four-year period of unprecedented growth. Carlisle Construction Materials (CCM) experienced a 24% decline in sales during a year when our key markets were down nearly 30%. We were able to improve our operating margin from 10.3% in 2008 to 13.8% in 2009. Key drivers behind this improvement included favorable raw material pricing and aggressive cost-reductions taken in the second half of 2008 and early 2009, due in part to the discipline and tools provided by the Carlisle Operating System (COS).

All of our operations became leaner including support functions such as production planning, plant operations, transportation and customer service. Additionally, our sales channels transitioned from a new construction mindset and approach to one focused on retrofitting and restoring roofs. COS-led efficiency improvements in our Warranty Services area enabled us to offer more timely and enhanced service to our customers. More importantly, COS has resulted in a more engaged workforce where each individual can fully understand the contribution they can make to the company's success.

CCM's sales were bolstered during 2009 through the introduction of a diverse range of new products including:

- *Temporary Roofs* - made of self-adhering membrane, that keep a building water-tight while a new, permanent roof is installed, complements our focus on the reroofing market

- *RoofSense™* - a Carlisle-developed proprietary software tool that helps roofing contractors illustrate the economic benefits of investing in additional roof insulation to building owners
- *Roof Gardens* - gaining in popularity, provide energy efficiency, enhanced stormwater management and increased useable green space
- *Rooftop Solar Photovoltaic (PV) Components* - convert solar radiation into direct current electricity and help to meet the growing demand for renewable energy sources

The increasing desire of building owners to improve the energy efficiency of their buildings, combined with the millions of square feet of roofing installed by CCM, led to the creation of a new division during 2009, Carlisle Energy Services. This new group is developing products and turnkey rooftop solar PV systems designed to generate electricity without compromising the integrity of the roofing system.

We are proud of the entire CCM team that exhibited enormous diligence and flexibility during a very challenging year. Their drive to continually improve and work towards a stronger and more efficient company will keep CCM at the forefront of the commercial construction industry in 2010 and well beyond.

John W. Altmeyer
President - Carlisle Construction Materials

Carlisle Engineered Transportation Solutions

Late in the fourth quarter of 2009 Carlisle established Carlisle Engineered Transportation Solutions (ETS), a fully integrated strategic operating unit which combines three of our businesses: Carlisle Tire & Wheel (CTW), Carlisle Industrial Brake & Friction (CIBF) and Carlisle Power Transmission (CPT). In many instances these businesses serve the same markets and share a common customer base. Combining these product lines will enable us to create additional value by increasing our emphasis on product development, utilizing a more efficient sales approach and leveraging all of our operations for cost efficiencies. Merging these product lines will result in ETS becoming a more strategic supplier to our customers.

2009 presented some of the toughest markets in memory for our ETS business. Sales declined 24% over the prior year. However, the Carlisle Operating System (COS) helped us leverage our operations and we were able to increase our operating margins in 2009 over the prior year.

CTW benefitted from the integration of COS principles throughout our operations. The implementation of COS allowed us to reduce inventories by \$37 million, or 26%, and decrease square footage by 1.2 million square feet, or 19%, which freed up capacity to accommodate sales growth. Additionally, COS engaged our employees in the continuous improvement process and encouraged them to propose ideas that positively impacted our business, helping us dramatically improve our quality and reduce lead times. New products continue to fuel CTW's growth. In 2009, we introduced the ITP™ Baja Cross line of performance tires that have proven to be some of the most durable in the market. In addition, we launched our BlackRock™ product line, featuring steel and aluminum wheels for off-road enthusiasts. We also introduced a wide range of tire and wheel solutions for construction and agriculture markets.

CIBF launched a wide series of new products during 2009 that targeted growing markets such as military and wind energy, as well as expanding penetration in

our more traditional markets such as construction and agriculture. The military market has seen an increasing demand for additional armor on military vehicles to ensure troop safety. This has led to greater vehicle weight, putting increased stress on braking systems and leading to growth opportunities for CIBF. We also increased our global sales effort with significant investments in Europe and Asia. During 2009, CIBF completed the acquisition of Japan Power Brake (JPB) in Atsugi, Japan, which created a platform to expand our penetration of Japanese markets. The addition of JPB was a significant step in enhancing our strong focus on marketing outside of the U.S. In 2009, CIBF sales to international markets was nearly 40%.

CPT was focused on implementing COS principles throughout the year to streamline the manufacturing environment and greatly improve efficiencies. New products introduced during the year include a rotor belt used on combines, and an improved line of ATV and snowmobile belts. Professional snowmobiler Joe Parsons won two Gold Medals at the 2009 Winter X Games using a Carlisle belt on his snowmobile.

Throughout ETS, our employees are focused on continuously improving the value of the Carlisle brand by developing the best products, insuring the highest quality and providing the best customer service in the industries we serve.

Fred Sutter
President - Carlisle Engineered Transportation Solutions

Throughout ETS, our employees are focused on continuously improving the value of the Carlisle brand by developing the best products, insuring the highest quality and providing the best customer service in the industries we serve.

Fred Sutter

President - Carlisle Engineered Transportation Solutions

Arguably the most important event for CIT in 2009 was the successful first flight of the Boeing 787. These jet airliners represent significant sales growth for CIT, with each plane containing nearly \$1 million in CIT wire, cable, power and grounding systems, and rack and panel structures.

John Berlin
President - Carlisle Interconnect Technologies

Carlisle Interconnect Technologies

Against the backdrop of a worldwide economic crisis, it was an exciting year at Carlisle Interconnect Technologies (CIT). We aggressively adopted Carlisle Operating System (COS) methodologies in all of our facilities, resulting in savings of over \$4.2 million. COS is rapidly becoming the culture of CIT. Its strategic value is being realized in lower lead times and improved productivity in every aspect of our business. Our Tukwila, Washington team, that produces complex cable assemblies and integrated wired racks, primarily for the in-flight entertainment and connectivity marketplace, was an early adopter of COS and their focused efforts improved quality and productivity, reduced lead times and reduced floor space. When we acquired the Tukwila operations in 2008 it was located in two factories. COS was so successful that we were able to consolidate all of our production into one facility and exit a 24,000 square foot plant. We were very pleased with the \$2.6 million in savings that the Tukwila location generated as a result of COS. This is only the beginning of our “lean journey”; we are planning on similar savings in 2010.

Arguably the most important event for CIT in 2009 was the successful first flight of the Boeing 787. These jet airliners represent significant sales growth for CIT, with each plane containing nearly \$1 million in CIT wire, cable, power and grounding systems, and rack and panel structures. Deliveries of the first 787s are slated to begin in the fourth quarter of 2010 and will continue to ramp up with peak production expected to be ten planes per month by 2013. Backlog for the Boeing 787 is currently

851 jetliners, representing approximately \$850 million in CIT sales. Additionally, the Airbus A380 is also entering production with each plane requiring roughly \$500,000 in CIT product content. Going forward, Airbus is projecting a build rate of two planes per month beginning in 2010.

Two other significant events during the year were the acquisitions of Jerrik and Electronic Cable Specialists (ECS). Jerrik expands our military connector offerings while enlarging our presence in key markets such as unmanned aerial vehicles, one of the fastest growing segments of military aircraft. These planes are used for reconnaissance over hostile enemy territories and provide “eyes in the sky” for our troops on the ground. Jerrik also expands our capabilities in the manufacture of interconnect products for communication jamming systems used in Iraq and Afghanistan to protect our troops from roadside bombs. ECS is probably the most strategic acquisition CIT has ever made, bringing much needed design engineering capability, transforming CIT from a custom build-to-print supplier to a fully integrated design, engineering, certification and manufacturing company that will enable us to design and build products for Boeing, Airbus, Embraer, Cessna and other leading airframe manufacturers.

CIT is in a very unique position in the markets we serve and has tremendous upside potential. We are excited about global acquisition prospects that will allow us to continue to capitalize on the fragmented competitive base, expanding our product technology and geographical presence, as well as the additional cost efficiencies that COS will continue to provide.

John Berlin
President - Carlisle Interconnect Technologies

Carlisle FoodService Products

Carlisle FoodService Products (CFSP) was the launch site of the Carlisle Operating System (COS) in June of 2008, and this company-wide lean-based approach continues to drive improvements in every phase of our operations. In 2009, COS helped us realize \$5.4 million in operational savings and allowed us to reduce plant and office square footage requirements by more than 250,000 square feet. COS also enabled us to consolidate our janitorial brush operations from facilities in Atlanta, Georgia, into our Sparta, Wisconsin, location and to eliminate a warehouse in Oklahoma City, Oklahoma. Further, the integration of COS supported an inventory reduction of \$12 million during 2009. We also implemented an aggressive sourcing program that included the creation of a supply chain team and structure that resulted in purchasing savings of \$2.5 million during the year.

In this tough economic climate, though our sales were down 8.5% from 2008, we outperformed the Foodservice Equipment and Supply Industry at large, in which total revenues were down 16% from 2008. And despite the impact from lower sales, we were able to increase our earnings by 19% and improve operating margins year-to-year from 7.8% to 10.1% through COS process improvements and supply chain management.

CFSP introduced a wide range of new products during 2009 which added 6% in new sales volume and mitigated the impact of lost revenue due to the economic downturn. A few examples:

- *Louis™ Tumblers* - are "NSF Listed," a strict manufacturing standard demanded by most U.S. foodservice operations from restaurant chains to long-term care facilities
- *Disposable Lids for Commercial Reusable Tumblers* - encourage foodservice providers to substitute reusable beverage ware for disposable cups and reduce the amount of plastic sent to landfills
- *Universal Pan Lids* - encourage end-user conversion to Carlisle's food pans because our lids eliminate the concern over competitive product lid fit

- *Turbo Temp™ Induction Chargers* - upgrades the current meal delivery system for healthcare operations and creates sales opportunities in the hotel market
- *Colortech™ Rotary Brush Systems* - the most cost effective method to clean floors in large indoor spaces such as airports, convention centers and grocery stores

During 2009, we established a new distribution center in China's Shanghai region to drive global sales growth in Asia and to serve as an export consolidation point to the U.S. and European markets. Also, production began at our new injection molding and brush manufacturing factory in Changzhou, China, to expand worldwide sales and to sustain our competitive position in the region. We discontinued our redistributor program in China in favor of a Carlisle-owned and operated direct sales and distribution operation.

In 2010, we will be introducing over 200 new products in some of our fastest growing product categories such as waste handling, buffet and deli service, and healthcare. We are also launching a completely redesigned line of rotationally-molded food transport products used in off-site catering operations.

Our employees have done a tremendous job integrating and applying COS strategies and maximizing their effectiveness in our operations. Each and every team member understands Carlisle's strategic objectives and their role in meeting our company's goals.

Dave Shannon
President - Carlisle FoodService Products

Carlisle FoodService introduced a wide range of new products during 2009 which added 6% in new sales volume and mitigated the impact of lost revenue due to the economic downturn.

Dave Shannon
President - Carlisle FoodService Products

We are focused on growing Trail King's position as a market leader and will utilize COS, innovation and talent management to deliver the best products and services to our customers, provide our employees with development opportunities and create value for Carlisle shareholders.

Carol P. Lowe
President - Trail King Industries

Carlisle Specialty Products

2009 was a year of significant challenges and accomplishments for Trail King Industries in our Specialty Products segment. We entered 2009 facing extreme headwinds from the global economic crisis. The North American heavy equipment market experienced record low levels of demand with the trailer industry posting its weakest sales volumes since the mid-1970s. With Trail King's sales down 64%, we made the very difficult decision to close our Brookville, Pennsylvania, operation. By the end of October 2009, all of Brookville's aluminum production was consolidated into our West Fargo, North Dakota, operation and the steel production was consolidated into our Mitchell, South Dakota, operation.

Despite these unprecedented challenges, the Trail King team can look back on 2009 with a well-earned sense of pride and achievement. Our most significant accomplishment during the year was the introduction and implementation of the Carlisle Operating System (COS) across all levels and functions of the company. The employees of Trail King entered our "lean journey" with exuberance and high expectations. COS has driven efficiency improvements of up to 30% in our manufacturing operations. COS was also a key driver in the 60% reduction in our inventories. COS will enable Trail King to accelerate its growth and improve profitability as the economy improves. We truly understand that "lean is not a cost reduction program ...lean is about leveraging operational improvements to grow market share and earnings."

COS is becoming an increasingly valuable competitive tool to ensure that Trail King will remain the market leader

in specialized heavy-haul trailers. For example, in 2010 we will be improving lead times and minimizing capital investment by implementing mixed-model flow lines. COS strategies are also enabling us to improve the safety of our employees and provide them with a more organized work environment.

In 2009, Trail King implemented a new product development and launch process that will reduce our new product design and market introduction timeline by no less than 50%. In 2010, we will introduce a new modular trailer to the Trail King portfolio, a trailer that will go from concept to use in less than ten months.

Throughout 2009 we made significant strides in enhancing our talent pool. We added to our already strong team by recruiting resources for engineering, sales and supply chain management. We also began implementation of the Carlisle Employee Development Process which allows our employees and managers to utilize an online performance management system to establish and monitor performance goals. We have rolled out a new competency appraisal process and will implement career development plans aligned with experiential training programs. We recognize that in a truly lean organization, all our employees are leaders.

While 2009 proved to be one of the most challenging years ever for Trail King, it was also a year of great accomplishments. We are focused on growing Trail King's position as a market leader and will utilize COS, innovation and talent management to deliver the best products and services to our customers, provide our employees with development opportunities and create value for the Carlisle shareholder.

Carol P. Lowe
President - Trail King Industries

Meet the People at Carlisle Who Make It All Happen

Throughout this report you've been able to see some of the great stuff we make, read about our accomplishments and learn of our plans to build an even better Carlisle. Now we are proud to introduce you to some of the great people who make it all happen. Here are a few of our employees using some of the products we make. Their smiling faces come from every one of our companies and from our locations around the world. They are representative of the great team of individuals who add value to Carlisle every day.

Part I

Item 1. Business

Overview

Carlisle Companies Incorporated (“Carlisle” or the “Company”) was incorporated in 1986 in Delaware as a holding company for Carlisle Corporation, whose operations began in 1917, and its wholly-owned subsidiaries. Carlisle is a diversified manufacturing company consisting of five segments which manufacture and distribute a broad range of products. Additional information is contained in Items 7 and 8.

The Company’s executive offices are located at 13925 Ballantyne Corporate Place, Suite 400, Charlotte, North Carolina. The Company’s main telephone number is (704) 501-1100. The Company’s Internet website address is *www.carlisle.com*. Through this Internet website (found in the “Investor Relations” link), the Company makes available free of charge its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K and all amendments to those reports, as soon as reasonably practicable after these reports are electronically filed with or furnished to the Securities and Exchange Commission.

Management Philosophy/Business Strategy

The Company strives to be the market leader in the various niche markets it serves. The Company is dedicated to achieving low cost positions and providing service excellence based on, among other things, superior quality, on-time delivery and short cycle times.

The presidents of the various operating companies are given considerable autonomy and have a significant level of independent responsibility for their businesses and their performance. The Company believes that this structure encourages entrepreneurial action, and enhances responsive decision making thereby enabling each operation to better serve its customers and react quickly to its customer needs.

The Company’s executive management role is to (i) provide general management oversight and counsel, (ii) manage the Company’s portfolio of businesses including identifying acquisition candidates and assisting in acquiring candidates identified by the operating companies, as well as identifying businesses for divestiture in an effort to optimize the portfolio, (iii) allocate and manage capital, (iv) evaluate and motivate operating management personnel, and (v) provide selected other services.

The Company made significant progress in the implementation of the Carlisle Operating System (“COS”) in 2009. COS is a continuous improvement process based on the principles of lean and six sigma and is redefining the way the Company does business. Waste is being eliminated and efficiencies improved enterprise wide, allowing the Company to increase its overall profitability. Improvements are not limited to production areas, as COS is also driving improvements in new product innovation, engineering, supply chain management, warranty and product rationalization. COS is creating a culture of continuous improvement across all aspects of the Company’s business operations.

Acquisitions and Divestitures

The Company has a long-standing acquisition strategy. Traditionally, the Company has focused on acquiring new businesses that can be added to existing operations (“bolt-ons”). In addition, the Company considers acquiring new businesses which can operate independently from other Carlisle companies. Factors considered by the Company in making an acquisition include consolidation opportunities, technology, customer dispersion, operating capabilities and growth potential. For more details regarding acquisitions completed over the past three years, see Note 9 to the Consolidated Financial Statements in Item 8.

For more details regarding the consolidation and divestiture of the Company's businesses during the past three years, see Notes 18 and 19 to the Consolidated Financial Statements in Item 8 and "Discontinued Operations," also in Item 1 below.

Information on the Company's revenues, earnings and identifiable assets for continuing operations by industry segment for the last three fiscal years is as follows (amounts in millions):

Financial Information About Industry Segments

	<u>2009</u>	<u>2008*</u>	<u>2007*</u>
Sales to Unaffiliated Customers(1)			
Construction Materials	\$1,125.9	\$1,472.3	1,365.4
Engineered Transportation Solutions	708.1	928.2	917.0
Interconnect Technologies	180.5	197.9	116.8
FoodService Products	243.6	266.2	183.4
Specialty Products	121.4	245.5	229.5
Total	<u>\$2,379.5</u>	<u>\$3,110.1</u>	<u>\$2,812.1</u>
Earnings Before Interest and Income Taxes			
Construction Materials	\$ 155.2	\$ 151.1	\$ 240.5
Engineered Transportation Solutions	54.2	(12.9)	77.2
Interconnect Technologies	14.3	25.2	16.8
FoodService Products	24.7	20.7	20.6
Specialty Products	(5.0)	33.5	29.0
Total Segment EBIT	<u>243.4</u>	<u>217.6</u>	<u>384.1</u>
Corporate(2)	(36.5)	(31.0)	(41.7)
Total	<u>\$ 206.9</u>	<u>\$ 186.6</u>	<u>\$ 342.4</u>
Identifiable Assets			
Construction Materials	\$ 572.4	\$ 667.8	\$ 693.4
Engineered Transportation Solutions	571.9	639.5	723.9
Interconnect Technologies	391.9	330.0	105.9
FoodService Products	218.4	234.5	136.7
Specialty Products	57.8	86.3	89.9
Corporate(3)	99.8	81.7	161.0
Total	<u>\$1,912.2</u>	<u>\$2,039.8</u>	<u>\$1,910.8</u>

* 2008 and 2007 figures have been adjusted to reflect the change in segment reporting and continuing operations. Prior year presentation included Operating income. Earnings before interest and income taxes (EBIT) is consistent with the 2009 presentation.

- (1) Intersegment sales or transfers have been eliminated
- (2) Includes general corporate expenses
- (3) Consists primarily of cash and cash equivalents, facilities, and other invested assets

A reconciliation of assets reported above to total assets as presented on the Company's Consolidated Balance Sheets in Item 8 is as follows:

	<u>2009</u>	<u>2008</u>
Total Identifiable Assets per table above	<u>\$1,912.2</u>	<u>\$2,039.8</u>
Assets held for sale of discontinued operations*	<u>1.9</u>	<u>36.1</u>
Total assets per Consolidated Balance Sheets in Item 8	<u><u>\$1,914.1</u></u>	<u><u>\$2,075.9</u></u>

* See Note 19 to the Consolidated Financial Statements in Item 8.

Description of Businesses by Segment

Construction Materials

The Construction Materials segment includes the construction materials business, which manufactures and sells rubber ("EPDM") and thermoplastic polyolefin ("TPO") roofing systems. In addition, the construction materials business markets and sells polyvinyl chloride membrane and accessories purchased from third party suppliers. The Company also manufactures and distributes energy-efficient rigid foam insulation panels for substantially all roofing applications. Roofing materials and insulation are sold together in warranted systems or separately in non-warranted systems to the new construction, re-roofing and maintenance, general construction and industrial markets. Through its coatings and waterproofing operation, this business manufactures and sells liquid and spray-applied waterproofing membranes, vapor and air barriers, and HVAC duct sealants and hardware for the commercial and residential construction markets. The majority of the construction materials products are sold through a network of authorized sales representatives and distributors.

The construction materials business operates manufacturing facilities located throughout the United States, its primary market. Insulation facilities are located in Kingston, NY, Franklin Park, IL, Lake City, FL, Terrell, TX, Tooele, UT and Smithfield, PA. EPDM manufacturing operations are located in Carlisle, PA and Greenville, IL. TPO facilities are located in Senatobia, MS and Tooele, UT. Block molded expanded polystyrene ("EPS") operations include eleven production and fabrication facilities across the U.S.

Raw materials include EPDM polymer, TPO polymer, carbon black, processing oils, solvents, asphalt, methylene diphenyl diisocyanate, polyol, polyester fabric, black facer paper, oriented strand board, clay and various packaging materials. Critical raw materials generally have at least two vendor sources to better assure adequate supply. For raw materials that are single sourced, the vendor typically has multiple processing facilities. In general, this business believes that sufficient quantities of raw materials can be obtained through normal sources to avoid interruption of production in 2010.

Sales and earnings tend to be somewhat higher in the second and third quarters due to increased construction activity during those periods.

The construction materials business' working capital practices include the following:

- (i) Standard accounts receivable payment terms of 45 days to 90 days.
- (ii) Standard accounts payable payment terms of 30 days to 45 days.
- (iii) Inventories are maintained in sufficient quantities to meet forecasted demand.

The construction materials business serves a large and diverse customer base; however, in 2009 one customer represented approximately 16% of this segment's revenues, but did not represent 10% of consolidated revenues. The loss of this customer could have a material adverse effect on segment revenues.

This business competes in the construction materials market, a market with numerous competitors that produce roofing, insulation and waterproofing products for commercial and residential applications. The level of competition within the market varies by product line. As one of two leading manufacturers in the niche single-ply industry, the construction materials business competes through pricing, innovative products, long-term warranties and customer service. This business offers extended warranty programs on its installed roofing systems, ranging from five (5) years to thirty (30) years and, subject to certain exclusions, covering leaks in the roofing system attributable to a problem with the particular product or the installation of the product. In order to qualify for the warranty, the building owner must have the roofing system installed by an authorized roofing applicator—an independent roofing contractor trained by the Company to install its roofing systems.

Engineered Transportation Solutions

The Engineered Transportation Solutions segment is comprised of the tire and wheel, industrial brake and friction, and power transmission belt product lines. The tire and wheel product line includes bias-ply, steel-belted radial trailer tires, stamped or roll-formed steel wheels, non-automotive rubber tires, and tire and wheel assemblies. The industrial brake and friction product line includes off-highway braking systems and specialty friction products, and on-highway brake actuation systems. The power transmission product line includes industrial belts and related components.

The products in the Engineered Transportation Solutions segment are manufactured and sold by direct sales personnel to original equipment manufacturers (“OEMs”), mass merchandisers and various wholesale and industrial distributors around the world, including North America, Europe, Asia, South America and Africa. A majority of sales are generated in the United States and Canada. Key markets served include outdoor power equipment, agriculture, construction, power sports, home appliance, high speed trailer, automotive styled wheels, recreational vehicles, mining, wind energy, industrial power transmission and related aftermarket distributors. Manufacturing facilities are located in the United States, the United Kingdom, China and Japan. In addition, the business has various distribution centers in the United States, Canada, Europe and China that provide local sales and service.

On October 1, 2009, the Company acquired the remaining 51% interest in Japan Power Brake, Inc. (“JPB”), located in Atsugi, Japan, a leading provider of high performance braking solutions for off-highway equipment, primarily in the mining and construction industries in Japan, for a purchase price of approximately \$4.2 million.

Raw materials include steel, rubber, fabric and other oil-based commodities required for tire, wheel and belt production. The brake manufacturing operations require the use of various metal products such as castings, pistons, springs and bearings. With respect to its friction products, the raw materials used are fiberglass, phenolic resin, metallic chips and various other organic materials. Raw materials are sourced worldwide to better assure adequate supply, and critical raw materials generally have at least two vendor sources. Sufficient quantities of its raw materials are expected to be available through normal sources to avoid an interruption of production in 2010.

Sales and earnings tend to be somewhat higher in the first six (6) months of the year due to peak sales in the outdoor power equipment and replacement markets.

With respect to working capital, practices include the following:

- (i) Standard accounts receivable payment terms of 30 days to 60 days.
- (ii) Standard accounts payable payment terms of 30 days to 60 days.
- (iii) Inventories are maintained in sufficient quantities to meet forecasted demand. For the tire and wheel business, inventories are generally higher in the fourth and first quarters to meet seasonal

demand. Inventories tend to build late in the year in advance of the busy season and then steadily fall throughout the first half of the subsequent year.

The engineered transportation solutions business serves a large and diverse customer base; however, in 2009 one customer represented approximately 11% of this segment's revenues, but did not represent 10% of consolidated revenues. The loss of this customer could have a material adverse effect on segment revenues.

The business competes globally against regional and international manufacturers. Few competitors participate in all served markets. A majority participate in only a few of the business' served markets on a regional or global basis. Markets served are competitive and the major competitive factors include product performance, quality, product availability and price. The relative importance of these competitive factors varies by market segment and channel.

The Company has undertaken several consolidation projects within this segment in efforts to reduce costs and streamline its operations. In 2009, the Company completed the consolidation of nineteen of its distribution centers in the United States and Canada into nine existing facilities. In 2009, the Company also completed the consolidation of three wheel manufacturing plants located in California into one facility in Ontario, CA and completed the consolidation of its pneumatic tire manufacturing operations in Buji, China into its manufacturing operation in Meizhou, China.

In the third quarter of 2009, the Company began the process of consolidating its tire manufacturing operations in Heflin, AL, Carlisle, PA and portions of Buji, China into a new facility in Jackson, TN purchased in the third quarter of 2009. The consolidation of tire manufacturing operations into Jackson, TN is expected to be completed by the end of 2010. In the fourth quarter of 2009, the Company announced plans to close its friction product manufacturing facility in Logansport, IN and to consolidate operations into its locations in Hangzhou, China and Bloomington, IN, which is expected to be completed by March, 2010. Also, in the fourth quarter of 2009, the Company combined its power transmission belt product line into its tire and wheel and industrial brake and friction product lines.

Interconnect Technologies

The Interconnect Technologies segment includes the interconnect technologies business, which designs and manufactures high performance wire, cable, fiber optic, RF/microwave and specialty filtered connectors, specialty cable assemblies, integrated wired racks, trays and fully integrated airframe subsystem solutions primarily for the aerospace, defense electronics and test and measurement industries. This business operates manufacturing facilities in the United States and China with the United States, Europe and China being the primary target market for sales. Sales are made by direct sales personnel.

On September 18, 2009, the Company acquired Jerrick, Inc. ("Jerrick"), a recognized leader in the design and manufacture of highly engineered military and aerospace filter connectors. Jerrick's highly customized products are used in environments where reduction of electromagnetic interference and transient voltage suppression are critical. Jerrick has earned key positions on commercial aerospace and military platforms with the world's preeminent aerospace and defense contractors. The rapid growth of defense electronics and avionics throughout military and commercial aerospace platforms is driving the demand for highly engineered specialty connectors. Jerrick is located in Tempe, AZ.

On October 1, 2009, the Company acquired privately-held Electronic Cable Specialists, Inc. ("ECS"), a leading designer and manufacturer of electrical and structural products and services for the aviation, medical and industrial markets. ECS offers customer-specific solutions ranging from individual electrical and structural products to fully integrated systems to support airframe manufacturers, aircraft operators and electronic equipment OEM's worldwide. ECS's core products consist of highly-engineered wire and cable assemblies, control panels and instrumentation to support avionics systems for general aviation, air

transport and military aircraft. ECS is located in Franklin, WI with various distribution points in the United States, France and the United Kingdom.

Raw materials include copper conductors that are plated with tin, nickel or silver, polyimide tapes, polytetrafluoroethylene (“PTFE”) tapes, PTFE fine powder resin, thermoplastic resins, stainless steel, beryllium copper rod, machined metals and plastic parts and various marking and identification materials. Key raw materials are typically sourced worldwide and have at least two vendor sources to better assure adequate supply. The Company believes that sufficient quantities of raw material can be obtained for this business through normal sources to avoid interruption of production in 2010.

The operations of the interconnect technologies business are generally not seasonal in nature.

The working capital practices include:

- (i) Standard accounts receivable payment terms of 30 days to 60 days.
- (ii) Standard accounts payable payment terms of 30 days.
- (iii) Inventories are maintained in sufficient quantities to meet forecasted demand. The majority of the interconnect technologies business’ sales are from made-to-order products, resulting in inventories purchased on demand.

The interconnect technologies business serves a large and diverse customer base; however, in 2009 two customers together represented 37% of this segment’s revenues, but neither customer represented 10% of consolidated revenues. The loss of one of these customers could have a material adverse effect on segment revenues.

The interconnect technologies business is known for its engineering and product quality. Product performance, either mechanical or electrical in nature, is a principal competitive criterion, with pricing, delivery and service also being key buying criteria for the customer. In most product lines in the interconnect technologies business, there are only one or two companies capable of producing a competing product.

FoodService Products

The FoodService Products segment includes the foodservice products business, which manufactures and distributes (i) commercial and institutional foodservice permanentware, table coverings, cookware, display pieces, lighting equipment and supplies to restaurants, hotels, hospitals, nursing homes, schools and correctional facilities, and (ii) industrial brooms, brushes, mops and rotary brushes for industrial, commercial and institutional facilities. The company’s product line is distributed from four primary distribution centers located in Charlotte, NC, Oklahoma City, OK, Reno, NV and Zevenaar, The Netherlands to wholesalers, distributors and dealers. These distributor and dealer customers, in turn, sell to commercial and non-commercial foodservice operators and sanitary maintenance professionals. Distributors and dealers are solicited through subcontracted manufacturer representatives and direct sales personnel. The foodservice business operates manufacturing facilities in the United States, China and Mexico, and sales are made primarily in North America and Europe.

Raw materials used by the foodservice products business include polymer resins, stainless steel and aluminum. Key raw materials are sourced nationally from recognized suppliers of these materials. The Company believes that sufficient quantities of raw material can be obtained for this business through existing sources to avoid interruption of production in 2010.

Sales in the foodservice business are marginally stronger in the second and third quarters.

The working capital practices include:

- (i) Standard accounts receivable payment terms of 30 days to 60 days.

- (ii) Standard accounts payable payment terms of 30 days.
- (iii) Inventories are maintained in sufficient quantities to meet forecasted demand.

The foodservice products business serves a large and diverse customer base; however, in 2009 two customers together represented 26% of this segment's revenues, but neither of these customers represented 10% of consolidated revenues. The loss of one of these customers could have a material adverse effect on segment revenues.

The foodservice business is engaged in markets that are generally highly competitive, and competes equally on price, service and product performance.

Specialty Products

The Specialty Products segment includes the specialty trailer business and the refrigerated truck bodies business. The specialty trailer business manufactures and sells trailers to a variety of markets. Sales are categorized as follows: (i) construction—includes open-deck trailers used by contractors for hauling equipment to and from sites or by rental companies for equipment delivery, (ii) material hauling—includes various dump trailer lines, such as steel bottom-dumps, side-dumps, end-dumps and live-bottoms as well as aluminum end dump and pneumatic bulk tank trailers, (iii) specialized—includes large-capacity multi-unit trailers and specially designed trailers for specific hauling purposes, and (iv) commercial—includes trailers sold for over-the-road hauling and general freight. Sales are made primarily in the United States, with less than 12% of sales to other countries, primarily Canada, Norway and Mexico. The majority of sales in this business are to dealers with the balance sold directly to end-users such as rental companies, national accounts, heavy-haulers, waste haulers and OEM manufacturers. The specialty trailer business operates manufacturing facilities in the U.S., which is its primary market.

The refrigerated truck body business manufactures and sells insulated refrigerated truck bodies to a variety of markets including food, dairy, beverage, home delivery and military applications. This business' main distribution channels are through a factory direct sales staff. The refrigerated truck bodies business operates a single manufacturing facility in Rice Lake, WI and sells primarily into the U.S. market.

The specialty trailer business' raw materials include high-tensile steel, aluminum, lumber, tires, axles, suspensions and hydraulic and electrical components. Critical raw materials generally have at least two vendor sources to better assure adequate supply. Management at the specialty trailer business believes material costs are relatively stable and that sufficient quantities of its raw materials can be obtained through normal sources to avoid interruption of production in 2010.

The raw materials and components used by the refrigerated truck body business include refrigeration compressors, eutectic holdover plates, mechanical blower refrigeration systems, electric/hydraulic liftgates, fiberglass, polyester resins, polyurethane foam resins, steel, aluminum, plywood, and cast and stainless steel hardware. The availability of steel and petroleum-based materials could impact raw material costs. The Company believes that sufficient quantities of raw material can be obtained for this business through normal sources to avoid interruption of production in 2010; however, any change in lead time for delivery of customer-owned chassis could delay production.

The operations of the specialty trailer business are generally not seasonal in nature. The refrigerated truck body business is moderately seasonal in nature, with the second and third quarters of the year being strongest in sales.

With respect to working capital, practices include the following:

- (i) Standard accounts receivable payment terms of 10 days to 30 days.
- (ii) Standard accounts payable payment terms of 10 days to 30 days.

- (iii) Inventories are maintained in sufficient quantities to meet forecasted demand. Higher value, customer-specific components for the refrigerated truck bodies business are ordered at the time required.

The businesses in the Specialty Products segment have a large and diverse customer base and no individual customer accounted for more than 10% of segment sales in 2009.

The specialty trailer business' products compete primarily based on quality and options as well as price. The commercial and material hauling products compete primarily on price. Conversely, the large-capacity multi-unit trailers manufactured for specialized purposes tend to compete primarily on quality and options.

The refrigerated truck bodies business competes primarily on quality and performance with an emphasis on thermal efficiency.

The refrigerated truck bodies business was sold on February 2, 2010.

Discontinued Operations

In the fourth quarter of 2009, the Company decided to retain the power transmission business and combine it with the tire and wheel and industrial brake business to form the Engineered Transportation Solutions segment. As a result, the power transmission operation that was previously reported as a discontinued operation has been, for all periods presented, reclassified as a continuing operation.

In the second quarter of 2008, the Company announced its decision to pursue disposition of its on-highway brake ("on-highway brake business") business. On March 31, 2009, the Company decided to dispose of the assets used in the business as part of a planned dissolution.

The assets of the discontinued operations have met the criteria for, and have been classified as "held for sale". In addition, results of operations for these businesses, and any gains or losses recognized from their sale, are reported as "discontinued operations".

Principal Products

The Company's products are discussed above and in additional detail in Note 21 to the Consolidated Financial Statements in Item 8.

Intellectual Property

The Company owns or holds the right to use a variety of patents, trademarks, licenses, inventions, trade secrets and other intellectual property rights. The Company has adopted a variety of measures and programs to ensure the continued validity and enforceability of its various intellectual property rights. While the Company's intellectual property is important to its success, the loss or expiration of any particular intellectual property right would not materially affect the Company or any of its segments.

Backlog

Backlog of orders from continuing operations generally is not a significant factor in most of the Company's businesses, as most of the Company's products have relatively short order-to-delivery periods. Backlog of orders from continuing operations was \$286.9 million at December 31, 2009 and \$298.3 million at December 31, 2008; however, the majority of these orders are not firm in nature.

Government Contracts

At December 31, 2009, the Company had no material contracts that were subject to renegotiation of profits or termination at the election of the U.S. government.

Research and Development

Research and development activities include the development of new product lines, the modification of existing product lines to comply with regulatory changes, and the research of cost efficiencies through raw material substitution and process improvements. The Company's research and development expenses in continuing operations were \$16.6 million in 2009 compared to \$16.2 million in 2008 and \$15.8 million in 2007.

Environmental Matters

Carlisle believes its operations generally are in substantial compliance with applicable regulations. In a few instances, particular plants and businesses have been the subject of administrative and legal proceedings with governmental agencies or private parties relating to the discharge or potential discharge of regulated substances. Where necessary, these matters have been addressed with specific consent orders to achieve compliance. Carlisle believes that continued compliance will not have any material impact on the Company's financial position and will not require significant capital expenditures.

Employees

The Company had approximately 10,000 employees in its continuing operations at December 31, 2009.

International

For foreign sales and an allocation of the assets of the Company's continuing operations, see Note 21 to the Consolidated Financial Statements in Item 8.

NYSE Affirmation

On May 8, 2009, David A. Roberts, the Company's Chief Executive Officer, submitted to the New York Stock Exchange (the "NYSE") the Annual CEO Certification and certified therein that he was not aware of any violation by the Company of the NYSE's Corporate Governance listing standards.

Item 1A. Risk Factors

The Company's business, financial condition, results of operations and cash flows can be affected by a number of factors including but not limited to those set forth below, those set forth in our "Forward Looking Statements" disclosure in Item 7 and those set forth elsewhere in this Annual Report on Form 10-K, any one of which could cause our actual results to vary materially from recent results or from our anticipated future results.

The demand for the Company's products may be adversely affected by deteriorating macroeconomic and business conditions. The continued recession in the United States and in key foreign markets could substantially affect the Company's sales, profitability and financial condition. The sharp downturn has reduced economic activity in many of the product markets in which we operate. Many of these markets are cyclical and have experienced downturns. It cannot be predicted when, or to what extent, there might be a recovery.

Actions taken by major governments throughout the world to restore liquidity and increase credit availability may not be fully effective in addressing the economic problems that are causing the recession and the increased concern over the general soundness of the U.S. and foreign economies.

The reduced demand for the Company's products from prolonged economic decline would likely result in lower revenues, excess production capacity, higher cost, and margin compression on some products.

Access to cost-effective sources of capital may be affected by current global financial system problems. The ability of the Company, its customers and suppliers to obtain capital with reasonable terms to support business activities including developing lines of credit, refinancing existing debt, funding capital projects, and financing acquisitions is likely to be negatively affected by the global financial crisis.

A downgrade in the Company's debt ratings could restrict the ability to access the debt capital markets and could increase interest expense on existing financing agreements. The inability to maintain or to expand credit facilities on similar terms may have a material adverse affect on the Company's financial position, results of operations and free cash flow. The Company's reliance on customers and vendors to meet their obligations could be reduced because of their potential difficulty in accessing outside financing.

Extended difficulties by owners and developers to secure financing for new residential and commercial construction projects will likely reduce the demand for roofing products from the Company's construction materials operations. A slowdown resulting from restricted credit availability in the commercial construction industry would likely reduce the demand for both new roofing products and reroofing products.

The Company's growth is partially dependent on the acquisition of other businesses. The Company has a long standing acquisition program and expects to continue acquiring businesses. Typically, the Company considers acquiring bolt-ons. Acquisitions of this type involve numerous risks, which may include potential difficulties in integrating the business into existing operations, increasing dependency on the markets served by certain businesses, and increased debt to finance the acquisitions. The Company also considers the acquisition of businesses which can operate independently of existing operations, which has an increased possibility of diverting management's attention from its core operations.

Raw Material costs are a significant component of the Company's cost structure. The Company utilizes petroleum based products, steel and other commodities in its manufacturing processes. Raw materials, including inbound freight, account for approximately 67% of the Company's cost of goods sold. Significant increases in the price of these materials may not be recovered through sale price and could adversely affect operating results. The Company also relies on global sources of raw materials, which could be adversely impacted by slow or unfavorable shipping or trade arrangements, and global economic conditions.

Benefits from the present restructuring activities are expected to include an improvement in customer service, cost reductions, higher productivity and lower working capital. The steps being taken to consolidate manufacturing and distribution centers could cause disruptions to customers and the potential loss of a portion of their business. Major projects are underway or planned in the Engineered Transportation Solutions segment and the Interconnect Technologies segment. See Note 18 in the Notes to the Consolidated Financial Statements in Item 8 for further information.

If the realignment and resizing does not meet the projected operational and market requirements, the objectives of the restructuring will not be achieved, resulting in potential further restructuring actions and employee and customer dissatisfaction.

The products manufactured may become obsolete due to design or technology changes. The Company's future operating success may depend upon its ability to redesign or find new applications for its current products or develop new products.

The Company faces increased international competition. The tire and wheel product line within the Engineered Transportation Solutions segment competes against companies that leverage low cost manufacturing through facilities located outside the United States. While the Company has been price competitive, it may need to adjust its operating strategies to remain competitive against the off-shore competition.

The Company is expanding its operations into China. To compete globally against low-cost manufacturers with operations located outside the United States, the Company has expanded many of its operations into China. Conducting operations within China may cause the Company to be impacted by the political environment within China and trade relations between the United States and Chinese governments. Many of the products manufactured in China are sold in the North American market. Therefore, the Company may be impacted by the cost and availability of shipping channels and amount of time required to ship the goods to the intended market. Revenues for sales of products manufactured in China for the North American market are generated predominately in U.S. Dollars. Many of the obligations incurred by these operations are settled in Chinese Renminbi or Hong Kong Dollars. Should the U.S. Dollar weaken significantly against the Renminbi or Hong Kong Dollar, the Company's results of operations could be adversely affected. The Company continues to monitor developments in China that may affect its strategy and will hedge its currency risk exposure when deemed effective and prudent. Recent tax law changes in China to reduce value added tax refunds on exported products and to conform income tax laws for both domestic and foreign owned companies may increase tax burdens for Carlisle's in-country operations.

The Company plans to grow through expansion of international sales. As the Company strives to reach this strategic goal, it is expanding its sales force in China. The Company may be impacted by the political environment in various countries and government trade relations with the U.S., as well as local country market factors. International sales expansion may also require an additional commitment to the Company's level of working capital.

The Company and the markets it serves can be negatively impacted by significant changes in interest rates. The Company may utilize interest rate swaps or other derivative instruments to mitigate its interest rate, currency and investment risk. Many of the markets served by Carlisle are impacted by interest rates. A significant rise in interest rates may curtail construction activities and other capital spending, as well as consumer spending, all of which could have an adverse impact on operating results.

The Company has significant concentrations in the general construction market. For the year ended December 31, 2009, approximately 47% of the Company's revenues, and 64% of its EBIT (excluding Corporate expenses) were generated by the Construction Materials segment. Construction spending is affected by economic conditions, changes in interest rates, demographic and population shifts, and changes in construction spending by federal, state, and local governments. A decline in the commercial construction market, as well as certain other operations of the Company, could adversely affect the Company's performance.

The construction materials business competes through pricing, among other factors. Increased competition in this business has and could continue to place negative pressure on operating results in future periods.

Approximately 30% of revenues for the year ended December 31, 2009, and 22% of its EBIT (excluding Corporate expenses) were generated by the Company's Engineered Transportation Solutions segment. The businesses in this segment rely heavily on the condition of the lawn and garden and construction equipment markets. Softening in this market could place negative pressure on the Company's results of operations.

The commercial construction market can be affected by weather. Adverse weather conditions, such as heavy or sustained rainfall, cold weather and snow can limit construction activity and reduce demand for

roofing materials. Weather conditions can also be a positive factor, as demand for roofing materials may rise after harsh weather conditions due to the need for replacement materials.

The Company also serves many specialty niche markets and as such, may be negatively impacted by softening in those markets. In addition to having concentrations in the construction materials and outdoor power equipment markets, many of the markets served by Carlisle, including the specialty trailer, brake and food service markets, are smaller, niche markets that may experience cyclicity. These market cycles can span a number of years, and while the Company benefits from the upside of these cycles, downturns can negatively affect performance.

Changes in business conditions could cause goodwill to become impaired. The Company has a long-standing strategy to acquire interests in other businesses. These investments are made after careful analysis and the completion of due diligence procedures. The analysis and procedures often include assumptions and judgments in the determination of the acquisition price. After acquisition, unforeseen issues could arise that adversely affect the expected returns and the unfavorable financial impact may not be recoverable through an adjustment to the acquisition price. In addition, unexpected difficulties encountered during integration could cause actual operating results to vary from initial estimates.

The amount of goodwill is a significant portion of the Company's total assets. An evaluation of impairment of goodwill is made annually or when evidence of a potential impairment exists. The impairment evaluation is based on several factors involving assumptions and judgment regarding expected cash flows. If the assumptions and judgment indicate that goodwill impairment exists for an operating unit, the result could be a substantial asset charge that reduces the Company's operating income and could cause a default in the covenants covered by the Company's debt and credit facility agreements.

The Company is impacted by the cost of providing pension benefits. Pension expense associated with the Company's retirement benefit plans may fluctuate significantly depending on future market performance of plan assets and changes in actuarial assumptions.

The Company continues to be negatively impacted by the rising cost of providing pension and other post-retirement benefits. The underfunded status of the defined benefit pension plans may require cash payments. Additionally, if pension plan assets do not perform to the Company's expectations, or if other actuarial assumptions are modified, the required contributions may be higher than anticipated.

Significant changes in retirement plan discount rates and in the actual investment return on pension assets could affect the Company's net income, pension benefit obligation, shareholders' equity and retirement plan contributions in future periods.

Net income may be negatively impacted by a decrease in the rate of return on plan assets. Income or expense for the plans is calculated using actuarial valuations. Unfavorable changes in key economic indicators can change the assumptions. The most significant assumptions used are the discount rate and the expected long-term rate of return on plan assets. The key economic factors that affect the expense would also likely affect the amount of cash contributions to the pension and post-employment plans.

To help mitigate the fluctuation in future cash contributions to the pension plan, the Company implemented a liability driven investment approach in 2009. This approach seeks to invest primarily in fixed income investments to match the changes in the plan liabilities that occur as a result of changes in the discount rate. Risk tolerance is established through careful consideration of plan liabilities, plan funded status, and corporate financial condition. The established target allocation is 88% fixed income securities and 12% equity securities. Fixed income investments are diversified across core fixed income, long duration and high yield bonds. Equity investments are diversified across large capitalization U.S. and international stocks. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measures and asset/liability studies.

Item 3. Legal Proceedings

The Company may be involved in various legal actions from time-to-time arising in the normal course of business. In the opinion of management, the ultimate outcome of such actions will not have a material adverse effect on the consolidated financial position of the Company, but may have a material impact on the Company's results of operations for a particular period.

Item 4. Submission of Matters to a Vote of Security Holders.

Not applicable.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

The Company's common stock is traded on the New York Stock Exchange. At December 31, 2009, there were 1,861 shareholders of record.

Quarterly cash dividends paid and the high and low prices of the Company's stock on the New York Stock Exchange in 2009 and 2008 were as follows:

<u>2009</u>	<u>First</u>	<u>Second</u>	<u>Third</u>	<u>Fourth</u>
Dividends per share	\$0.155	\$0.155	\$0.160	\$0.160
Stock Price

Low	\$29.01	\$28.66	\$24.81	\$16.60

The Company's repurchases of its equity securities during the period October 1, 2009 through December 31, 2009 were as follows:

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs</u>
October 1 - 31, 2009	—	\$ —	—	3,024,499
November 1 - 30, 2009	38,668	33.49	38,668	2,985,831
December 1 - 31, 2009	—	—	—	2,985,831
Total	38,668	\$33.49	38,668	2,985,831

The stock repurchase program was originally approved on November 3, 1999, and was reactivated on August 17, 2004. At the time of the authorization, the Company had the authority to purchase 741,890 split-adjusted shares of common stock. The Board of Directors authorized the repurchase of an additional 2,500,000 shares of the Company's common stock on August 1, 2007, and the repurchase of an additional 1,400,000 shares of the Company's common stock on February 12, 2008. At this time, the Company has authority to repurchase 2,985,831 shares of its common stock.

Item 6. Selected Financial Data.

(1) All periods presented have been revised to conform to 2009 presentation of earnings before interest and income taxes ("EBIT"). Results may differ from prior presentations due to rounding.

(2) 2007 and prior figures have been reclassified to reflect discontinued operations and to conform to 2008 and 2009 presentation.

See notes 1 and 19 to the Consolidated Financial Statements in Item 8.

(3) Net working capital defined as total current assets less total current liabilities.

(4) Long-term debt includes that of discontinued operations of \$4.9 million at December 31, 2005.

(5) Percent of total capitalization defined as long-term debt divided by long-term debt plus shareholders' equity.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Overview

Carlisle Companies Incorporated ("Carlisle", the "Company", "we" or "our") is a diversified manufacturing company focused on achieving profitable growth internally through new product development and product line extensions, and externally through acquisitions that complement our existing technologies, products and market channels. The Company has approximately 10,000 employees in its continuing operations. Carlisle manages its businesses under the following segments:

- **Construction Materials:** the "construction materials" business;
- **Engineered Transportation Solutions:** the "engineered transportation solutions" business, combining the "tire and wheel" product line, the "off-highway braking" product line and the "power transmission belt" product line;
- **Interconnect Technologies:** the "interconnect technologies" business;
- **FoodService Products:** the "foodservice products" business; and
- **Specialty Products:** the "specialty trailer" business and the "refrigerated truck bodies" business.

While Carlisle has offshore manufacturing operations, the markets served by the Company are primarily in North America. Management focuses on maintaining a strong and flexible balance sheet, year-over-year improvement in sales, earnings before interest and income taxes ("EBIT") margins and earnings, globalization, and improving free cash flow from operations. Resources are allocated among the operating companies based on management's assessment of their ability to obtain leadership positions and competitive advantages in the markets they serve.

During 2008, the Company began the implementation of the Carlisle Operating System, a manufacturing structure and strategy deployment system based on lean enterprise and six sigma principles. The purpose of the Carlisle Operating System is to eliminate waste in all production and business processes, improve manufacturing efficiencies to increase productivity, and to increase EBIT margins and improve cash conversion.

For a more in-depth discussion of the results discussed in this "Executive Overview", please refer to the discussion on "Financial Reporting Segments" presented later in "Management's Discussion and Analysis".

Net sales of \$2.38 billion for the year ended December 31, 2009 were 23% lower than net sales of \$3.11 billion for the year ended December 31, 2008. Organic sales (defined as net sales excluding sales from acquisitions and divestitures within the last twelve months, as well as the impact of changes in foreign exchange rates), across all segments declined 24% for the year ended December 31, 2009 as compared to the prior year, primarily as a result of depressed economic activity due to a severe recession. Acquisitions in the Interconnect Technologies, FoodService Products and Engineered Transportation Solutions segments contributed \$52.0 million of additional sales in the current year as compared to the year ended December 31, 2008. The impact of foreign exchange rates had less than a 1% impact on the year-over-year change in sales.

Income from continuing operations was \$151.8 million, or \$2.45 per diluted share, for the year ended December 31, 2009, a 34% increase compared to \$113.6 million, or \$1.85 per diluted share, for the year ended December 31, 2008. Income from continuing operations for 2009 includes an after-tax \$16.8 million, or \$0.27 per diluted share, gain from a fire insurance settlement and the release of a \$19.6 million, or \$0.32 per diluted share, deferred tax liability, previously provided with respect to un-repatriated earnings. Offsetting these gains were \$27.1 million of after-tax restructuring charges, or \$0.44 per diluted share, for facilities consolidation and closures. 2008 results included: an after-tax impairment charge on the assets of the power transmission belt business of \$44.2 million, or \$0.73 per diluted share. For more detail on these

charges, refer to the discussion on “Financial Reporting Segments.” For more information regarding the change in income from continuing operations from 2008 to 2009, refer to the discussion below on “2009 Compared to 2008”.

Net sales of \$3.11 billion for the year ended December 31, 2008 were 11% higher than net sales of \$2.81 billion for the year ended December 31, 2007. Organic growth accounted for 3% of the improvement. Acquisitions in the Interconnect Technologies, FoodService Products and Construction Materials segments contributed \$213.4 million, or approximately 8% of the year-over-year increase. The impact of foreign exchange rates accounted for less than 1% of the sales growth.

Income from continuing operations of \$113.6 million for the year ended December 31, 2008 declined 49% as compared to 2007. Income from continuing operations for 2007 included an after-tax gain of \$29.9 million, or \$0.48 per diluted share, on the sale of the Company’s interest in its European roofing company (“Icopal”). For more information regarding the change in income from continuing operations from 2007 to 2008, refer to the discussion below on “2008 Compared to 2007”.

2009 Compared to 2008

Net sales of \$2.38 billion for the year ended December 31, 2009 were \$730.6 million, or 23%, below 2008 net sales of \$3.11 billion. Organic sales across all segments declined 24% for the year ended December 31, 2009 as compared to the prior year, primarily attributed to lower sales volumes. Acquisitions in the Interconnect Technologies, FoodService Products and Engineered Transportation Solutions segments contributed \$52.0 million of additional sales in the current year as compared to the year ended December 31, 2008. Refer to the discussion below on “Acquisitions”.

Cost of goods sold of \$1.88 billion for the twelve months ended December 31, 2009 were \$641.2 million, or 25%, lower than in 2008. The decrease was attributable to lower sales volume, lower raw material costs and efficiency gains from the Carlisle Operating System.

Gross margin (net sales less cost of goods sold expressed as a percent of net sales) of 21.2% recognized in 2009 increased as compared to gross margin of 19.1% recognized in 2008. The primary reasons for the margin improvement were lower raw material costs, higher selling prices and efficiency gains from the Carlisle Operating System.

Selling and administrative expenses of \$289.0 million for the year ended December 31, 2009 were 9% below 2008 expenses of \$316.3 million. The decrease was due primarily to a combination of lower commission costs and reduced discretionary spending in 2009. As a percent of net sales, selling and administrative expenses were approximately 12.2% and 10.2% for the years ended December 31, 2009 and 2008, respectively. The increase in selling and administrative expenses as a percent of net sales year-over-year is primarily attributable to management restructuring expenses in 2009 and lower net sales.

Research and development expenses of \$16.6 million for the twelve months ended December 31, 2009 increased 2% from \$16.2 million in 2008. As a percent of net sales, research and development expenses were 0.7% and 0.5% of sales in 2009 and 2008, respectively.

Other expense (income), net of \$18.4 million for the twelve months ended December 31, 2009 compared to \$18.7 million in 2008. The 2009 expense included: asset-impairment charges of \$14.4 million in the Engineered Transportation Solutions segment for the integration of the power transmission belt business and the closure of the facilities in Buji, China, Carlisle, PA and Logansport, IN; \$3.8 million in the Specialty Products segment for the closure of the facility in Brookville, PA; and, \$2.1 million in the Interconnect Technologies segment for the closure of the facility in Vancouver and Kent, WA. The 2008 expense included \$13.1 million of long-lived asset write-downs in the Engineered Transportation Solutions segment on the impairment at the power transmission belt business, \$4.3 million of long-lived asset write-downs in the Construction Materials segment on the closure of the insulation facilities in Anderson, SC

and Marlin, TX, and \$1.5 million in long-lived asset charges for the FoodService Products segment on the restructuring of the janitorial/sanitation facilities in Atlanta, GA and Sparta, WI.

Goodwill impairment charges of \$55.5 million reflect the impairment of goodwill associated with the power transmission belt business in 2008.

Gain related to fire settlement of \$27.0 million in 2009 reflects insurance proceeds less associated losses resulting from a fire which destroyed the Company's tire manufacturing facility in Bowden, GA in November, 2008.

Earnings before interest and income taxes ("EBIT") for the year ended December 31, 2009 was \$206.9 million, an 11% increase compared to \$186.6 million recognized in 2008. 2009 EBIT was positively impacted by selling price increases, favorable raw material pricing, efficiencies gained through the Carlisle Operating System and a \$27.0 million gain from a fire insurance settlement. These positive impacts were offset by lower sales volume and restructuring expenses. 2008 results included an impairment charge on goodwill and certain assets of the power transmission belt business of \$68.6 million, of which \$55.5 million was attributed to goodwill. As a percent of net sales, EBIT was 8.7% in 2009, up from 6.0% in 2008.

Interest expense, net of \$9.0 million for the twelve months ended December 31, 2009 was \$18.7 million lower than interest expense, net of \$27.7 million in 2008. Interest expense in 2008 included a \$7.7 million pre-tax charge for the termination of a treasury lock. The Company elected not to issue bonds in 2008 and, as a result, incurred the expenses related to the treasury lock. See Note 8 in the Notes to the Consolidated Financial Statements in Item 8 for further information. Also contributing to the year-over-year decrease in interest expense was the reduction of outstanding debt during 2009.

Income tax expense of \$46.1 million from continuing operations for the year ended December 31, 2009, which represented an effective tax rate of 23.3%, compared to income tax expense of \$45.3 million in 2008, reflecting an effective tax rate of 28.5%. 2009 income tax expense benefitted from the release of a \$19.6 million deferred tax accrual, previously provided with respect to un-repatriated earnings. The company has now identified appropriate long-term uses for these earnings outside the United States.

The Company participated in the U.S. Internal Revenue Service's real time audit program, Compliance Assurance Process ("CAP"), during 2009 and 2008. Under the CAP program, material tax issues and initiatives were disclosed to the IRS throughout the year with the objective of reaching agreement as to the proper reporting treatment. The examination of the 2007 and 2008 returns have been completed. The Company believes that this approach reduces tax-related uncertainties, enhances transparency and reduces administrative costs. The Company expects to continue participating in the CAP program in 2010.

Income from continuing operations was \$151.8 million, or \$2.45 per diluted share, for the year ended December 31, 2009, a 34% increase compared to \$113.6 million, or \$1.85 per diluted share, for the year ended December 31, 2008. Income from continuing operations for 2009 includes an after-tax \$16.8 million, or \$0.27 per diluted share, gain from a fire insurance settlement and the release of a \$19.6 million, or \$0.32 per diluted share, deferred tax accrual, previously provided with respect to un-repatriated earnings. Offsetting these gains were \$27.1 million of after-tax restructuring charges, or \$0.44 per diluted share, for facilities consolidation and closures. 2008 results included: an after-tax impairment charge on the assets of the power transmission belt business of \$44.2 million, or \$0.73 per diluted share; \$5.8 million of after-tax restructuring charges, or \$0.09 per diluted share, for facilities consolidations and closures; and, a \$4.8 million after-tax charge, or \$0.08 per diluted share, for the termination of a treasury lock that was entered into in 2006 in anticipation of a 2008 bond offering.

Loss from discontinued operations, net of tax for the year ended December 31, 2009 was \$7.2 million or \$0.11 loss per diluted share, as compared to a loss from discontinued operations, net of tax of \$57.8 million, or \$0.94 per diluted share, in 2008. 2009 results reflect the costs associated with the

liquidation of the on-highway brake business. 2008 includes \$45.3 million of after-tax impairment charges related to the planned divestiture of the on-highway brake business.

Net income of \$144.6 million, or \$2.34 per diluted share, for the year ended December 31, 2009 compared to net income of \$55.8 million, or \$0.91 per diluted share, for the year ended December 31, 2008.

2008 Compared to 2007

Net sales of \$3.11 billion for the year ended December 31, 2008 were \$298.0 million, or 11%, above 2007 net sales of \$2.81 billion. Organic growth of 3% was driven by price increases across all segments. The acquisitions of Carlyle Incorporated (“Carlyle”), a provider of high-specification aerospace and network interconnection solutions, in the Interconnect Technologies segment, Dinex International, Inc. (“Dinex”), a supplier of foodservice products to the healthcare and other institutional industries, in the FoodService Products segment in 2008 and Insulfoam in the Construction Materials segment in 2007, contributed \$213.4 million, or approximately 8% of the year-over-year growth. Refer to the discussion below on “Acquisitions”.

Cost of goods sold of \$2.52 billion for the twelve months ended December 31, 2008 were \$292.5 million, or 13%, higher than in 2007. Of the increase, 55% related to acquisitions, with the remainder of the increase being attributable to increased raw material, freight and overhead costs.

Gross margin (net sales less cost of goods sold expressed as a percent of net sales) of 19.1% recognized in 2008 declined as compared to gross margin of 20.9% recognized in 2007. The primary reasons for the change were margin erosion in the Construction Materials segment reflecting an increase in raw material costs, and unabsorbed overhead costs attributable to lower unit sales volumes in the Engineered Transportation Solutions segment.

Selling and administrative expenses of \$316.3 million for the year ended December 31, 2008 were approximately 15% above 2007 expenses of \$276.1 million. The acquisitions of Carlyle and Dinex accounted for \$26.2 million of the increase. The increase was also due to the write-off of an uncollectible note receivable from a customer of \$4.9 million, and costs associated with other new facilities. Included in 2007 selling and administrative expenses were \$6.6 million of expenses related to the change in executive management. On June 12, 2007, the Company announced the resignation of Richmond D. McKinnish as President and Chief Executive Officer and the appointment of David A. Roberts as Chairman, President and Chief Executive Officer. As a percent of net sales, selling and administrative expenses were approximately 10.2% and 9.8% for the years ended December 31, 2008 and 2007, respectively.

Research and development expenses of \$16.2 million for the twelve months ended December 31, 2008 increased 3% from \$15.8 million in 2007. As a percent of net sales, research and development expenses were 0.5% and 0.6% of sales in 2008 and 2007, respectively.

Goodwill impairment charges of \$55.5 million reflect the impairment of goodwill associated with the power transmission belt business in 2008.

Other expense (income), net of \$18.7 million for the twelve months ended December 31, 2008 compared to income of \$46.5 million in 2007. The 2008 expense included \$13.1 million of long-lived asset write-downs in the Engineered Transportation Solutions segment on the impairment at the power transmission belt business, \$4.3 million of long-lived asset write-downs in the Construction Materials segment on the closure of the insulation facilities in Anderson, SC and Marlin, TX, and \$1.5 million in long-lived asset charges for the FoodService Products segment on the restructuring of the janitorial/sanitation facilities in Atlanta, GA and Sparta, WI. Results for 2007 included: a gain of \$47.0 million related to the sale of Icopal; \$8.2 million of proceeds received from certain legal actions initiated by the Company; and equity income from Icopal of \$2.0 million. Partially offsetting these gains was a \$4.7 million management transition charge related to the U.K. braking business, \$3.5 million of expenses associated

with the Company's trade accounts receivable securitization program, and asset charges of \$3.4 million related to the closure of certain tire and wheel and power transmission belt operations.

Earnings before interest and income taxes for the year ended December 31, 2008 was \$186.6 million, a 46% decrease compared to \$342.4 million recognized in 2007. The decrease is primarily due to a goodwill impairment charge on the power transmission belt business of \$55.5 million in 2008, a \$47.0 million gain on the sale of Icopal in 2007, in addition to other changes in Other expense (income), net, and higher selling and administrative expenses. As a percent of sales, EBIT was 6.0% in 2008, down from 12.2% in 2007.

Interest expense, net of \$27.7 million for the twelve months ended December 31, 2008 was \$18.5 million higher than interest expense, net of \$9.2 million in 2007. Interest expense for the 2008 period included a \$7.7 million charge for the termination of a treasury lock that was entered into in 2006 in anticipation of a 2008 bond offering. The Company elected not to issue bonds in 2008 and, as a result, incurred the expenses related to the treasury lock. See Note 8 in the Notes to the Consolidated Financial Statements in Item 8 for further information. Interest expense in 2007 was reduced by interest income of \$6.6 million recovered from Icopal, and \$2.1 million on the investment of the proceeds received from the Icopal sale.

Income tax expense from continuing operations was \$45.3 million for the year ended December 31, 2008, which represented an effective tax rate of 28.5%, compared to income tax expense of \$112.2 million in 2007, which represented an effective tax rate of 33.7%. The decreased tax rate resulted largely from lower tax rates in foreign jurisdictions.

Income from continuing operations was \$113.6 million, or \$1.85 per diluted share, for the year ended December 31, 2008, a 49% decline from \$221.0 million, or \$3.53 per diluted share, for the year ended December 31, 2007. Results for the year 2007 period included an after-tax gain of \$29.9 million, or \$0.48 per diluted share, on the sale of Icopal, the recovery of previously reserved interest of \$4.4 million after-tax, or \$0.07 per diluted share, owed from Icopal, and after-tax gains of \$5.6 million, or \$0.09 per diluted share, on proceeds received from certain legal proceedings initiated by the Company. Partially offsetting these gains were after-tax charges of \$4.7 million, or \$0.08 per diluted share, related to the facility and management transition of an acquired U.K. off-highway braking business, expenses of \$4.4 million after-tax, or \$0.07 per diluted share related to changes in executive management.

Loss from discontinued operations, net of tax for the year ended December 31, 2008 was \$57.8 million or \$0.94 loss per diluted share, as compared to \$5.4 million, or \$0.09 per diluted share, in 2007. 2008 results reflect \$45.3 million of after-tax impairment charges related to the planned divestiture of the on-highway brake business.

Net income of \$55.8 million, or \$0.91 per diluted share, for the year ended December 31, 2008 compared to net income of \$215.6 million, or \$3.44 per diluted share, for the year ended December 31, 2007.

Acquisitions

On October 1, 2009, the Company acquired the remaining 51% interest in Japan Power Brake, Inc. ("JPB"), a leading provider of high performance braking solutions for off-highway equipment, primarily in the mining and construction industries in Japan, for a purchase price of approximately \$4.2 million. In connection with this purchase, a gain of \$0.8 million was recognized in Other expense (income), net on the Company's previous 49% interest in JPB. JPB is located in Atsugi, Japan and is under the management direction of the off-highway braking business that is included in the Engineered Transportation Solutions segment. The purchase price included an allocation of \$0.9 million to other intangible assets reflecting a non-compete agreement with a useful life of 10 years. The remaining purchase price was allocated to current assets; property, plant and equipment; and current liabilities.

On October 1, 2009, the Company acquired 100% of the equity of Electronic Cable Specialists ("ECS"), a leading provider of electrical and structural products and services for the aviation, medical and industrial markets, for a purchase price of approximately \$42.4 million. The acquisition of ECS expands

Carlisle's product and system reach into additional avionics applications and strengthens Carlisle's engineering and design capabilities. The acquisition will allow for reduction of expenses through consolidation of certain sales, general and administrative functions and through in-house production of certain components which were previously purchased by ECS from third parties. Carlisle also expects to achieve increased sales from its existing customer base with the addition of the engineering and design capabilities of ECS. ECS is located in Franklin, WI and is under the management direction of the Interconnect Technologies segment. The purchase price allocation resulted in current assets of \$15.1 million; property, plant and equipment of \$1.9 million; goodwill of \$13.5 million, identified intangible assets of \$14.5 million, and non-interest bearing current liabilities of \$2.6 million. Of the \$14.5 million of acquired intangible assets, \$2.6 million was assigned to trade names that are not subject to amortization, \$4.5 million was assigned to customer relationships with a determinable useful life of 17 years, and the remaining \$7.4 million was assigned to other intangible assets with a weighted average useful life of 14.7 years. The goodwill from this acquisition is deductible for tax purposes.

On September 18, 2009, the Company acquired the assets of Jerrick, Inc. ("Jerrick"), a recognized leader in the design and manufacture of highly engineered military and aerospace filter connections, for approximately \$33 million. The acquisition expands the Company's range of products serving the defense and aerospace markets. The acquisition will allow for reduction of expenses through consolidation of certain sales, general and administrative functions and through in-house production of certain components, which were previously purchased by Jerrick from third parties. Jerrick is located in Tempe, AZ and is under the management direction of the Interconnect Technologies segment. The purchase price allocation resulted in current assets of \$7.9 million; property, plant and equipment of \$1.8 million; goodwill of \$13.7 million, identified intangible assets of \$10.8 million, and current liabilities of \$1.2 million. Of the \$10.8 million of acquired intangible assets, \$0.2 million was assigned to trade names with determinable useful life of 2 years, \$7.1 million was assigned to customer relationships with a determinable useful life of 18 years, and the remaining \$3.5 million was assigned to other intangible assets with a weighted average useful life of 18.1 years. The goodwill from this acquisition is deductible for tax purposes.

On April 28, 2008, the Company acquired 100% of the equity of Carlyle Incorporated ("Carlyle"), a leading provider of sophisticated aerospace and network interconnection solutions, for a purchase price of approximately \$194 million. Carlyle is located in Tukwila, WA and is under the management direction of the Interconnect Technologies segment. Carlyle added design and assembly capabilities in specialty in-flight entertainment systems and other interconnect solutions for the aerospace industry. The purchase price allocation resulted in goodwill of \$122.3 million and identified intangible assets of \$76.0 million. Of the \$76.0 million of identified intangible assets, \$75.0 million was assigned to customer relationships with a determinable useful life of 20 years and \$1.0 million was assigned to covenants not to compete with a determinable useful life of 5 years. The goodwill from this acquisition is not deductible for tax purposes.

On January 25, 2008, the Company acquired 100% of the equity of both Dinex International, Inc. and Proex, Inc. (collectively "Dinex"), leading suppliers of foodservice products to the healthcare and other institutional industries, for approximately \$96 million. Dinex has facilities in Glastonbury, CT and Batavia, IL, and is under the management direction of the FoodService Products segment. The acquisition has enhanced Carlisle's position in the higher growth healthcare sector. The purchase price allocation resulted in goodwill of \$29.3 million and identified intangible assets of \$49.8 million. Of the \$49.8 million of identified intangible assets, \$8.0 million was assigned to trade names that are not subject to amortization, \$37.0 million was assigned to customer relationships with a weighted average useful life of 16.4 years, \$1.0 million was assigned to patents with a determinable useful life of 6 years, and the remaining \$3.8 million was assigned to other intangible assets with a weighted average useful life of 6.5 years. The goodwill from this acquisition is deductible for tax purposes.

On May 1, 2007, the Company acquired 100% of the equity of Insulfoam LLC ("Insulfoam") from Premier Industries, Inc., a leading manufacturer of block molded expanded polystyrene products used primarily as insulation in building and other construction applications, headquartered in Tacoma, WA, for

approximately \$168 million. Insulfoam is under the management direction of the Construction Materials segment, and operating results since the acquisition date have been included in that segment. The purchase price allocation resulted in goodwill of approximately \$55.2 million and identified intangible assets of \$20.6 million. Of the \$20.6 million of identified intangible assets, \$10.3 million was assigned to the trade name that is not subject to amortization, while the remaining acquired intangibles of \$10.3 million were allocated primarily to customer related intangibles, which are being amortized over the assets' determinable useful life of 9 years. The goodwill from this acquisition is deductible for tax purposes.

On February 2, 2007, the Company acquired 100% of the equity of Meixian Tengfei Tyre Co., Ltd., a tire manufacturer, located in Guandong, China, for consideration of approximately \$20 million. Operating results for this operation since the acquisition date are included in the Engineered Transportation Solutions segment. The purchase price was allocated to Property, plant and equipment, net, as it approximated the fair value of the assets purchased.

On January 29, 2007, the Company purchased the assets of Dongguan Qiaotou Yichang Wire and Cable Assembly Factory, located in Guangdong, China, specializing in complex cable assemblies and wire harnesses for medical and industrial applications, for consideration of approximately \$3 million and contingent additional payments of up to \$4 million based on the acquired company's future earnings, of which the Company has paid additional consideration of approximately \$0.2 million through December 31, 2009. The additional consideration has been recorded as an increase to goodwill. Operating results for this operation since the acquisition date are included in the Interconnect Technologies segment. The purchase price allocation resulted in goodwill of approximately \$1.5 million and identified intangible assets of \$1.0 million with a weighted-average life of 5.7 years. Identified intangible assets consist primarily of customer relationships valued at \$0.7 million, with a weighted-average life of 4 years, and other agreements valued at \$0.3 million with a weighted-average life of 9 years. The goodwill from this acquisition is not deductible for tax purposes.

Financial Reporting Segments

The following table summarizes segment net sales and EBIT. The amounts for each segment should be referred to in conjunction with the applicable discussion below.

In millions, except percentage	2009	2008*	Increase (Decrease)		2008*	2007*	Increase (Decrease)	
			Amount	Percent			Amount	Percent
<i>Net Sales</i>								
Construction Materials	\$1,125.9	\$1,472.3	\$(346.4)	-24%	\$1,472.3	\$1,365.4	\$ 106.9	8%
Engineered Transportation Solutions	708.1	928.2	(220.1)	-24%	928.2	917.0	11.2	1%
Interconnect Technologies	180.5	197.9	(17.4)	-9%	197.9	116.8	81.1	69%
FoodService Products	243.6	266.2	(22.6)	-8%	266.2	183.4	82.8	45%
Specialty Products	121.4	245.5	(124.1)	-51%	245.5	229.5	16.0	7%
	<u>\$2,379.5</u>	<u>\$3,110.1</u>	<u>\$(730.6)</u>	<u>-23%</u>	<u>\$3,110.1</u>	<u>\$2,812.1</u>	<u>\$ 298.0</u>	<u>11%</u>

* 2007 and 2008 figures have been revised to reflect the change from reporting operating income to reporting earnings before interest and income taxes, and to reflect the change in the Company's segments

Construction Materials

2009 Compared to 2008

Net sales in the Construction Materials segment were \$1.13 billion for the year ended December 31, 2009, a decrease of 24% from \$1.47 billion recognized in 2008. The decrease in sales was primarily attributable to a reduction in the volume of products sold across all major product lines and is consistent with declines in the overall non-residential construction industry. Year-over-year changes in selling prices, as well as the impact of foreign currency exchange rates, had less than a 1% impact on sales in 2009.

Segment EBIT of \$155.2 million for the twelve months ended December 31, 2009 represented a 3% increase compared to EBIT of \$151.1 million in 2008. EBIT as a percentage of sales ("EBIT margin") was 13.8% in 2009 as compared to 10.3% in 2008. The improvement in margins was primarily due to favorable raw material costs, reduction in selling and administration expenses and efficiency gains from the Carlisle Operating System. These improvements substantially offset the impact from the sales volume decrease that occurred in 2009 as compared to 2008. 2008 operating results included a \$5.9 million restructuring charge related to the closure of two block molded expanded polystyrene manufacturing operations at the plants located in Anderson, SC and Marlin, TX.

On October 21, 2008, the Company announced plans to close its insulation facilities in Anderson, SC and Marlin, TX and exited the facilities by the end of 2008. \$5.9 million of costs related to this closure were incurred in 2008, with no material costs incurred in 2009. The 2008 costs included the write-down of buildings and manufacturing equipment of \$4.3 million, working capital write-downs of \$0.9 million, employee severance costs of \$0.2 million, and moving, relocation and other expenses of \$0.5 million.

Net sales and EBIT are generally higher for this segment in the second and third quarters of the year due to increased construction activity during these periods. The Company continues to face many

uncertainties in the coming year, including the weak economy and the lack of financing for new construction, therefore potentially reducing demand for construction materials products. The Company is also susceptible to fluctuations in raw material costs and the ability to pass along increases in such costs to customers.

2008 Compared to 2007

Net sales in the Construction Materials segment were \$1.47 billion for the year ended December 31, 2008, an increase of 8% over \$1.37 billion recognized in 2007. The increase was driven by higher thermoplastic polyolefin (“TPO”) membrane sales volumes and selling price increases implemented to offset higher raw material costs that contributed approximately 39% of the increase. The acquisition of Insulfoam in May 2007 contributed \$45.6 million of incremental sales in 2008.

Segment EBIT of \$151.1 million for the twelve months ended December 31, 2008 represented an \$89.4 million decline compared to 2007. EBIT margin was 10.3% in 2008 as compared to 17.6% in 2007. The decline reflected increased raw material costs, unfavorable product mix, and continued competitive pricing. Selling price increases, cost reductions, and expense containment helped to mitigate some of the raw material cost increases. Results for the year ended December 31, 2008 included \$5.9 million of restructuring charges on the closure of two block molded expanded polystyrene manufacturing operations at the plants located in Anderson, SC and Marlin, TX, and the write-off of an uncollectible receivable from a customer of \$4.9 million. Results for the year ended December 31, 2007 included a \$48.5 million gain (excluding a \$1.5 million loss attributable to Corporate) on the sale of the Company’s interest in the European roofing company, Icopal, on July 31, 2007.

Engineered Transportation Solutions

2009 Compared to 2008

Net sales for the year ended December 31, 2009 were \$708.1 million, a 24% decrease from net sales of \$928.2 million in the prior year, primarily reflecting a decrease in the volume of products sold as a result of reduced customer spending due to the economic recession. Sales were down in nearly all markets in this segment, with the more significant declines in the recreational vehicle, agriculture, construction and mining markets. Sales of specialty brake products to the military markets increased 8.5%.

Segment EBIT for the twelve months ended December 31, 2009 was \$54.2 million, as compared to an EBIT loss of \$12.9 million in 2008. EBIT margin of 7.7% in 2009 compared to negative 1.4% in 2008. Lower raw material costs, savings realized from the Carlisle Operating System, and a pre-tax fire insurance gain of \$27.0 million offset the negative impacts of lower sales volumes and \$24.4 million in restructuring costs. Results for 2008 included impairment charges on goodwill and certain assets of the power transmission belt business of \$68.6 million.

The fire insurance gain was the result of insurance recoveries related to a fire at the Company’s facility in Bowdon, GA, which occurred in November 2008. For more information see Note 2 to the Consolidated Financial Statements in Item 8.

The Company has undertaken several consolidation projects within this segment in efforts to reduce costs and streamline its operations. Descriptions of these projects are set forth below:

- In the fourth quarter of 2008, the Company began consolidating nineteen of its distribution centers located throughout the United States and Canada into nine existing facilities. These consolidations were completed in the second quarter of 2009.
- In the first quarter of 2009, the Company began the consolidation of three wheel manufacturing plants located in California into one facility in Ontario, CA. In the second quarter of 2009, the Company also began the closure of its wheel manufacturing operation in Mexico. These consolidations were completed as of December 31, 2009.

- In the first quarter of 2009, the Company announced plans to consolidate its pneumatic tire manufacturing operations in Buji, China into its manufacturing operation in Meizhou, China and has completed this consolidation as of December 31, 2009.
- In the third quarter of 2009, the Company announced plans to consolidate its tire manufacturing operations in Heflin, AL, Carlisle, PA, and portions of Buji, China into a new facility in Jackson, TN, purchased in the third quarter of 2009. The consolidation of tire manufacturing operations into Jackson, TN is expected to be complete by the end of 2010.
- In the fourth quarter of 2009, within its off-highway braking business, the Company announced plans to close its friction product manufacturing facility in Logansport, IN and to consolidate operations into its locations in Hangzhou, China and Bloomington, IN. This consolidation is expected to be completed by March, 2010.
- Also, in the fourth quarter of 2009, the Company combined its power transmission belt business into its tire and wheel business. The consolidation of its operations is expected to be completed by the end of 2010.

The Company expects the total cost of these consolidation projects will be approximately \$42.3 million, of which \$25.2 million has been incurred through December 31, 2009, and \$17.1 million is expected to be incurred in 2010. Amounts expected to be incurred in 2010 relate primarily to employee termination and other costs associated with the relocation of employees and equipment.

During 2009, the Company recorded \$24.4 million of expense, including \$14.1 million in fixed asset charges, \$0.5 million in inventory write-downs, \$5.1 million of other costs consisting primarily of contract termination and relocation expenses, and \$4.7 million in employee termination costs.

Cost savings related to these consolidations, primarily resulting from the reduction of operating costs, are expected to approximate \$35 million per year, of which an estimated \$17 million will be realized in 2010.

Net sales and EBIT are generally higher in the first half of the year due to peak sales volumes in the outdoor power equipment market. Current economic conditions may continue to affect customer spending and negatively impact demand in this segment. Volatility in commodities prices could impact demand in the mining sector.

The restructuring activities within the tire and wheel business to consolidate manufacturing facilities and to start-up a manufacturing facility in Jackson, TN could cause disruptions to customers, employee dissatisfaction, and the potential loss of a portion of the tire and wheel business. The Company could also be negatively impacted by cost and availability of shipping channels and the amount of time required to ship product manufactured in China.

2008 Compared to 2007

Net sales for the year ended December 31, 2008 were \$928.2 million as compared to net sales of \$917.0 million in the prior year. 2008 net sales increased 1.2% as compared to 2007 levels, reflecting price increases in all product lines and volume increases in the agriculture equipment and replacement markets, partially offset by volume decreases in the remaining markets.

Segment EBIT for the twelve months ended December 31, 2008 was a loss of \$12.9 million as compared to income of \$77.2 million in 2007. EBIT margin was a negative 1.4% in 2008 as compared to 8.4% in 2007. EBIT in 2008 included impairment charges on goodwill and certain assets of the power transmission belt business of \$68.6 million. EBIT in 2007 included a \$4.7 million charge related to the facility and management transition of an acquired off-highway brake operation in Wales, U.K and \$3.4 million in asset charges related to the closure of certain tire and wheel and power transmission belt operations. Increased raw material cost, freight, and unabsorbed overhead due to decreased sales volumes also contributed to the EBIT decline.

Interconnect Technologies

2009 Compared to 2008

Net sales of \$180.5 million for the year ended December 31, 2009 were \$17.4 million lower than net sales of \$197.9 million in 2008. The positive sales impact from the acquisitions of Carlyle, Jerrick and Electronic Cable Specialists was more than offset by a 23% decline in organic sales in 2009 reflecting lower sales volumes across all product lines as a result of depressed economic conditions due to the severe recession.

Segment EBIT of \$14.3 million for the year ended 2009 represented a decrease of \$10.9 million, or 43%, from the prior year. As a percent of sales, EBIT declined to 7.9% in 2009 from 12.7% in 2008. The decline in EBIT was due to a combination of the organic sales decline and \$3.7 million in restructuring charges recorded in 2009, which are more fully described below.

The Company has undertaken two consolidation projects within the Interconnect Technologies segment in efforts to reduce costs and streamline operations. Descriptions of these projects are set forth below:

- In the second quarter of 2009, the Company began the consolidation of its Kent, WA facility into its Tukwila, WA facility and this consolidation was completed in the third quarter of 2009.
- In the fourth quarter of 2009, the Company announced that it would consolidate its Vancouver, WA facility into its facilities in Long Beach, CA and Yichang, China and close its Vancouver facility. This consolidation is expected to be completed by June, 2010.

The Company expects the total cost of these consolidation projects will be approximately \$5.2 million, of which \$3.7 million has been incurred through December 31, 2009, and \$1.5 million is expected to be incurred in 2010. Amounts expected to be incurred in 2010 relate primarily to employee termination, lease termination and other costs associated with the relocation of employees and equipment. Cost savings related to these projects, which will be primarily in the form of reduced operating costs, are expected to be approximate \$3.5 million per year, of which an estimated \$2.5 million is expected to be realized in 2010.

Total costs incurred in 2009 related to these consolidations were \$3.7 million and reflected \$0.6 million in employee and contract termination and other disposal costs, \$2.1 million of fixed asset impairment charges and \$1.0 million of inventory write-downs.

With the acquisitions of Jerrick and Electronic Cable Specialists and successful test flight of the Boeing 787 and strengthening backlog of orders related to the 787 program, the long-term outlook for the markets served by this segment remain favorable. However, potential cancelations in new airplane manufacturing schedules and the impact of potential defense budget cuts could negatively impact future growth opportunities.

2008 Compared to 2007

Net sales of \$197.9 million for the year ended December 31, 2008 were \$81.1 million higher than net sales of \$116.8 million in 2007. The increase was driven entirely by the acquisition of Carlyle, which contributed \$84.5 million. Increases in RF/microwave sales, were offset by decreases in the test and measurement markets.

Segment EBIT of \$25.2 million for the year ended 2008 represented an increase of \$8.4 million, or 50%, over the prior year. The increase in EBIT as a result of the Carlyle acquisition was partially offset by lower sales volume and absorption of overhead expenses. As a percent of sales, EBIT declined to 12.7% from 14.4% in 2007.

FoodService Products

2009 Compared to 2008

Net sales of \$243.6 million for the year ended December 31, 2009 were \$22.6 million lower than net sales of \$266.2 million in 2008. Year-over-year net sales increased slightly in the healthcare market; however, these increases were more than offset by decreased sales of restaurant market foodservice and janitorial/sanitation products, which were affected by the decline in consumer spending for casual dining.

EBIT of \$24.7 million for the year ended 2009 represented an increase of \$4.0 million, or 19%, over the prior year. As a percent of sales, EBIT margins increased to 10.1% from 7.8% in 2008. The improvement in margins was due to the combination of favorable raw material costs and efficiency gains from the Carlisle Operating System. EBIT in 2008 also included a \$2.2 million restructuring charge related to plant consolidations.

In 2008, the Company began the consolidation of its Georgia and Wisconsin janitorial/sanitation manufacturing facilities into one facility in Sparta, WI. Exit and disposal costs of \$2.2 million incurred in 2008 included the write-down of certain property, plant and equipment of \$1.5 million, inventory write-downs of \$0.5 million and employee termination costs of \$0.2 million. This consolidation was completed in the second quarter of 2009 with no material consolidation costs incurred during 2009.

The foodservice products business is generally not subject to seasonal demand. Current economic conditions may continue to affect customer spending and negatively impact demand in this segment.

2008 Compared to 2007

Net sales of \$266.2 million for the year ended December 31, 2008 were \$82.8 million higher than net sales of \$183.4 million in 2007. The increase was driven entirely by the acquisition of Dinex in 2008, which contributed \$83.3 million. Increases in janitorial/sanitation products were offset by decreased sales of restaurant market foodservice products, which were affected by the decline in consumer spending for casual dining.

EBIT of \$20.7 million for the year ended 2008 compared to \$20.6 million for the prior year. The increase in EBIT as a result of the acquisition was offset by gross margin declines in the foodservice business and restructuring costs of \$2.2 million related to plant consolidations. As a percent of sales, EBIT declined to 7.8% from 11.2% in 2007.

Specialty Products

2009 Compared to 2008

Net sales of \$121.4 million for this segment in 2009 decreased \$124.1 million, or 51% from the prior year. Sales of specialty trailers decreased 64% from the prior year, primarily attributable to weak sales in all markets served reflecting lower customer spending as a result of the recession and lack of credit availability. Sales of refrigerated truck bodies increased 5.4%, reflecting strong demand in the mechanical truck body market.

Segment EBIT decreased to a loss of \$5.0 million for the year ended December 31, 2009, as compared to an EBIT gain of \$33.5 million in the prior year. EBIT margin was negative 4.1% in 2009, as compared to a positive 13.6% in the prior year. EBIT in 2009 included \$5.0 million in impairment and restructuring charges. Also contributing to the decline was the lower sales volume in the specialty trailer business.

At its heavy-haul trailer business, in the second quarter of 2009, the Company announced plans to consolidate its Brookville, PA facility into the operations located in Mitchell, SD and West Fargo, ND. This consolidation was completed by the end of 2009. During 2009, the Company incurred \$5.0 million in exit and disposal costs, consisting of \$3.8 million in fixed asset impairment charges, \$0.2 million in employee termination costs and \$1.0 million in others costs associated with the relocation of employees and equipment

The specialty trailer business is generally not subject to seasonal demand. Lack of credit availability could impact demand in all markets served by the Specialty Products segment.

On February 2, 2010, the Company sold all of its interest in Johnson Truck Bodies, its refrigerated truck bodies business.

2008 Compared to 2007

Net sales of \$245.5 million for this segment in 2008 increased \$16.0 million, or 7% from the prior year. Sales of heavy-haul truck trailers increased 4% over the prior year on price increases, model mix, and increased volume of specialized trailers that was offset by a reduction in volume of construction and live-bottom trailers. Sales of refrigerated truck bodies increased 23%, due to the recovery from weak market demand in 2007.

Segment EBIT increased to \$33.5 million for the year ended December 31, 2008, an increase of \$4.5 million compared to \$29.0 million in the prior year. EBIT margin in 2008 of 13.6% increased from 12.6% in 2007. The increase in segment EBIT was driven by improved product mix and higher pricing, which was partially offset by higher raw material costs.

Corporate

Corporate expenses are largely comprised of compensation, benefits and travel expense for the corporate office staff. Corporate expenses also include certain external audit fees and internal audit expenses as well as the certain costs associated with its strategy to expand in the Asia Pacific region.

Corporate expenses for the year ended December 31, 2009, were \$36.5 million, an increase from \$31.0 million in 2008. The increase was primarily due to increased management restructuring costs of \$3.2 million and additional selling and administrative expenses of \$2.4 million in 2009 attributable to the strategy to expand the Company's presence in the Asia Pacific region.

During the year ended December 31, 2008, Corporate expenses were \$31.0 million, down from \$41.7 million in 2007. On June 12, 2007, the Company announced the resignation of Richmond D. McKinnish as President and Chief Executive Officer and the appointment of David A. Roberts as Chairman, President and Chief Executive Officer, resulting in expenses related to this change in executive management of \$6.6 million in 2007. In addition, \$1.1 million of expenses related to a terminated acquisition initiative were included in 2007 results.

As a percent of net sales, corporate expenses were 1.5%, 1.0%, and 1.5% in 2009, 2008 and 2007, respectively.

Liquidity and Capital Resources

Sources and Uses of Cash

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Net cash provided by operating activities	\$ 447.2	\$ 274.2	\$ 259.3
Net cash used in investing activities	(119.5)	(354.2)	(134.1)
Net cash (used in) provided by financing activities	(274.2)	35.2	(182.4)
Effect of exchange rate changes on cash	0.1	(0.9)	1.6
Change in cash and cash equivalents	<u>\$ 53.6</u>	<u>\$ (45.7)</u>	<u>\$ (55.6)</u>

2009 Compared to 2008

Net cash provided by operating activities was \$447.2 million in the twelve months ended December 31, 2009, compared to net cash provided by operating activities of \$274.2 million in the year ended December 31, 2008. Cash provided by working capital and other assets and liabilities was \$195.1 million in 2009, and included contributions to the pension fund of \$53.0 million. Cash provided by working capital

and other assets and liabilities was \$25.7 million in 2008. 2009 cash flow provided from operations includes \$54.5 million of proceeds relating to the insurance settlement from the fire at the tire and wheel facility in Bowdon, GA.

Cash used in investing activities was \$119.5 million in 2009 compared to \$354.2 million in 2008. Cash used for acquisitions of \$80.8 million in 2009 included the acquisitions of Jerrik, Electronic Cable Specialists and Japan Power Brake. Cash used for acquisitions of \$290.7 million in 2008 included the acquisitions of Carlyle and Dinex. Capital expenditures of \$48.2 million in 2009 compared with \$68.0 million in 2008. The Engineered Transportation Solutions segments represented 63% of total capital expenditures in 2009.

Cash used by financing activities was \$274.2 million in 2009 compared to cash provided of \$35.2 million in 2008. Cash used by financing activities in 2009 included the reduction of \$235.4 of outstanding debt and dividend payments of \$38.6 million. Cash provided by financing activities in 2008 included borrowings under the revolving credit facility and securitization facility to fund acquisitions and capital expenditures, and to redeem the Company's 6.7% \$100.0 million senior notes.

2008 Compared to 2007

Net cash provided by operating activities was \$274.2 million in the twelve months ended December 31, 2008, compared to net cash provided by operating activities of \$259.3 million in the year ended December 31, 2007. Cash provided by working capital and other assets and liabilities was \$25.7 million in 2008, which compared to cash used of \$2.0 million in 2007.

Cash used in investing activities was \$354.2 million in 2008 compared to \$134.1 million in 2007. Cash used for acquisitions of \$290.7 million in 2008 included the acquisitions of Carlyle and Dinex. Cash used in investing activities in 2007 included \$189.7 million used for the purchase of Insulfoam and the acquisitions of manufacturing operations in China for the Engineered Transportation Solutions and Interconnect Technologies segments. Capital expenditures of \$68.0 million in 2008 compared with \$82.5 million in 2007. 2007 capital expenditures reflected the construction of a new plant in the Engineered Transportation Solutions segment. The Construction Materials and Engineered Transportation Solutions segments each represented 39% of total capital expenditures in 2008. In 2007, cash from the sale of investments, property and equipment included \$114.8 million from the sale of Icopal and \$15.7 million received for notes and accrued interest owed to the Company by Icopal.

Cash provided by financing activities was \$35.2 million in 2008 compared to cash used of \$182.4 million in 2007. Cash provided by financing activities in 2008 included borrowings under the revolving credit facility and securitization facility to fund acquisitions and capital expenditures, and to redeem the Company's 6.7% \$100.0 million senior notes. Cash used in financing activities in 2007 included the redemption of the Company's 7.25% \$150.0 million senior notes and the repurchase of 1.5 million shares of the Company's stock for \$60.0 million.

Debt Instruments, Guarantees and Covenants

The following table quantifies certain contractual cash obligations and commercial commitments at December 31, 2009:

<u>In millions</u>	<u>Total</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>Thereafter</u>
Short-term credit lines and long-term debt	\$156.8	\$ —	\$ —	\$ —	\$ —	\$ —	\$156.8
Interest on long-term debt(1)	61.7	9.3	9.3	9.3	9.3	9.3	15.2
Noncancelable operating leases	94.2	19.9	15.9	11.9	8.2	5.6	32.7
Total commitments	<u>\$312.7</u>	<u>\$29.2</u>	<u>\$25.2</u>	<u>\$21.2</u>	<u>\$17.5</u>	<u>\$14.9</u>	<u>\$204.7</u>

(1) Future expected interest payments are calculated based on the stated rate for fixed rate debt and the effective interest rate at December 31, 2009 for variable rate debt.

The above table does not include \$125.1 million of other long-term liabilities. Other long-term liabilities consist primarily of pension, post-retirement medical benefits, deferred income tax and warranty obligations. Due to factors such as return on plan assets, disbursements, contributions, and timing of warranty claims, it is not reasonably possible to estimate when these will become due.

Although the Company has entered into long-term purchase agreements for certain key raw materials, there were no take-or-pay contracts exceeding one year in place at December 31, 2009.

At December 31, 2009 the Company had \$466.0 million available under its \$500.0 million revolving credit facility. The \$466 million available represents the total available borrowings of \$500 million less \$34 million of letters of credits that are outstanding at December 31, 2009 under the facility. The letters of credit outstanding are primarily utilized to provide security under insurance arrangements and certain borrowings.

The revolving credit facility provides for grid-based interest pricing based on the credit rating of the Company's senior unsecured bank or other unsecured senior debt and the Company's utilization of the facility. The Company's senior unsecured debt is rated BBB by Standard & Poor's and Baa2 by Moody's. The Company was recently removed from Credit Watch with one of the credit rating agencies. The facility requires the Company to meet various restrictive covenants and limitations including certain net worth, cash flow ratios and limits on outstanding debt balances held by certain subsidiaries. In the event of a substantial goodwill impairment charge, the Company's EBIT would be reduced and could cause a default in the covenants covered by the Company's debt and credit facility agreements.

The Company also maintains a \$55.0 million uncommitted line of credit in the U.S. of which the entire \$55.0 million was available as of December 31, 2009.

During the second quarter of 2009, the Company terminated its existing \$150.0 million accounts receivable securitization facility. The facility was terminated as a result of the Company's strong operating cash flows and its available credit facilities and lines of credit that should provide adequate liquidity and capital resources to fund ongoing operations, expand existing lines of business and make strategic acquisitions.

At December 31, 2009, the fair value of the Company's \$150 million, 6.125% senior notes due 2016, was approximately \$163.5 million. The fair value of the Company's senior notes is based on current year yield rates plus the Company's estimated credit spread available for financings with similar terms and maturities. See Note 7 to the Consolidated Financial Statements in Item 8 for additional information.

The Company has financial guarantee lines in place for certain of its operations in U.S. and Europe to facilitate working capital needs, customer performance and payment, and warranty obligations. At December 31, 2009, the Company had issued guarantees of \$0.9 million, of which an immaterial amount is recorded in current liabilities or Other long-term liabilities.

Under the Company's various debt and credit facilities, the Company is required to meet various restrictive covenants and limitations, including certain net worth, cash flow ratios and limits on outstanding debt balances held by certain subsidiaries. The Company was in compliance with all covenants and limitations in 2009 and 2008.

Cash Management

Capital expenditures in 2010 are expected to be \$75-90 million, including business sustaining projects, cost reduction efforts and continuing manufacturing expansions, as well as \$35 million related to the purchase of the Jackson, TN facility in 2009 to replace the Bowdon, GA plant destroyed by fire in 2008. There are no minimum contributions required for the company's pension plan in 2010. Cash contributions to the Company's defined benefit pension plans were \$53.0 million in 2009 and are expected to approximate \$4.0 million in 2010.

The Company intends to pay dividends to its shareholders and has increased its dividend rate annually for the past 33 years.

The Company announced the reactivation of its share repurchase program in August 2004. In August 2007, the Board of Directors authorized the repurchase of an additional 2,500,000 shares of the Company's common stock. In February 2008, the Board of Directors authorized the repurchase of an additional 1,400,000 shares of the Company's common stock. In 2009, the Company repurchased 38,668 shares at a total cost of \$1.3 million in conjunction with certain stock option exercises. In 2008, the Company repurchased 122,258 shares on the open market at a cost of approximately \$4.8 million. In 2007, the Company repurchased 1,495,133 shares on the open market at a total cost of approximately \$60.0 million. At this time, the Company has authority to repurchase an additional 2,985,831 shares. Additional shares may be repurchased at management's direction. The decision to repurchase shares will depend on price, availability and other corporate developments. Purchases may occur from time-to-time and no maximum purchase price has been set.

The Company believes that its operating cash flows, credit facilities, lines of credit, and leasing programs provide adequate liquidity and capital resources to fund ongoing operations, expand existing lines of business and make strategic acquisitions. However, the ability to maintain existing credit facilities and access the capital markets can be impacted by economic conditions outside the Company's control, specifically credit market tightness or sustained market downturns. The Company's cost to borrow and capital market access can be impacted by debt ratings assigned by independent rating agencies, based on certain credit measures such as interest coverage, funds from operations and various leverage ratios.

Environmental

Management recognizes the importance of the Company's responsibility with regard to environmental compliance. Programs are in place to monitor and test facilities and surrounding property and, where practical, to recycle materials. The Company has not incurred material charges relating to environmental matters in 2009 or in prior years, and none are currently anticipated.

Discontinued Operations and Assets Held for Sale

In the fourth quarter of 2009, the Company ended the sale process for the power transmission belt business and combined its operations with the tire and wheel business reported in the Engineered Transportation Solutions segment. The Company had announced plans to dispose of the power transmission belt business on April 16, 2008. Beginning in the second quarter of 2008 and through the third quarter of 2009, the belt business had been classified as a "discontinued operation". As a result of its decision to retain the belt business, the results of its operations have been included in continuing operations for the year ended December 31, 2009, and prior year information has been revised to reflect this change.

In the second quarter of 2008, as part of its commitment to concentrate on its core businesses, the Company announced its decision to pursue disposition of its on-highway friction and brake shoe business. During the first quarter of 2009, the Company made the decision to exit, rather than sell, the on-highway friction and brake shoe business and dispose of the assets as part of a planned dissolution.

In the second quarter of 2007, the Company announced plans to exit the custom thermoset products molding operation ("thermoset molding operation"). The disposition of the thermoset molding operation was completed in 2008.

The assets of these operations have met the criteria for, and have been classified as "held for sale". In addition, results of operations for these businesses, and any gains or losses recognized from their sale, are reported as "discontinued operations".

Total assets held for sale at December 31 are as follows:

<u>In millions</u>	<u>December 31, 2009</u>	<u>December 31, 2008</u>
Assets held for sale:		
On-highway friction and brake shoe business	\$0.3	\$34.4
Thermoset molding operation	<u>1.6</u>	<u>1.7</u>
Total assets held for sale	<u>\$1.9</u>	<u>\$36.1</u>

At December 31, 2009, the remaining assets of the on-highway friction and brake shoe business and those of the thermoset molding operation consisted of the land and building formerly occupied by the operation.

The major classes of assets and liabilities held for sale included in the Company's Consolidated Balance Sheets were as follows:

<u>In millions</u>	<u>December 31, 2009</u>	<u>December 31, 2008</u>
Assets held for sale:		
Receivables	\$ —	\$11.8
Inventories	—	18.3
Prepaid expenses and other current assets	<u>—</u>	<u>0.7</u>
Total current assets held for sale	—	30.8
Property, plant and equipment, net	1.9	4.3
Other long term assets	<u>—</u>	<u>1.0</u>
Total non-current assets held for sale	<u>1.9</u>	<u>5.3</u>
Total assets held for sale	<u>\$1.9</u>	<u>\$36.1</u>
Liabilities associated with assets held for sale:		
Accounts payable	\$ —	\$ 3.5
Accrued expenses	<u>—</u>	<u>17.0</u>
Total liabilities associated with assets held for sale	<u>\$ —</u>	<u>\$20.5</u>

Net sales and (loss) income before income taxes from discontinued operations were as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Net sales:			
On-highway friction and brake shoe business	\$ 20.0	\$ 62.0	\$ 64.2
Systems and equipment	—	—	0.9
Thermoset molding operation	—	5.4	10.8
Giftware business of foodservice products	<u>—</u>	<u>—</u>	<u>0.9</u>
Net sales from discontinued operations	<u>\$ 20.0</u>	<u>\$ 67.4</u>	<u>\$ 76.8</u>
Income (loss) from discontinued operations:			
On-highway friction and brake shoe business	\$(12.5)	\$(65.8)	\$(13.9)
Automotive components	(0.4)	(2.5)	(1.4)
Systems and equipment	0.6	0.4	6.9
Thermoset molding operation	(0.1)	(1.8)	(1.6)
Giftware business of foodservice products	<u>—</u>	<u>—</u>	<u>(0.4)</u>
Income (loss) before income taxes from discontinued operations	<u>\$(12.4)</u>	<u>\$(69.7)</u>	<u>\$(10.4)</u>

Results for the year ended December 31, 2009 included \$6.8 million of pretax expenses related to the disposition of the on-highway friction and brake shoe business, including an inventory write-down of \$3.4 million, property, plant and equipment impairment costs of \$0.8 million, severance costs of \$1.8 million and \$0.8 million of contract termination costs.

Results for the year ended December 31, 2008 included \$55.6 million in pre-tax impairment charges in connection with the on-highway friction and brake shoe businesses. At March 31, 2008, in accordance with Generally Accepted Accounting Principles, the Company recorded assets held for sale at the lower of the carrying amount and fair value. Inventory with a carrying amount of \$26.1 million was written down to its fair value of \$15.2 million, resulting in an impairment charge of \$10.9 million. Long-lived assets held and used with a carrying amount of \$18.7 million were written down to their fair value of \$2.2 million, resulting in an impairment charge of \$16.5 million. Goodwill with a carrying amount of \$27.0 million was written down to its fair value of \$0, resulting in an impairment charge of \$27.0 million. Patents and other intangible assets with a carrying amount of approximately \$1.2 million were written down to their fair value of \$0, resulting in an impairment charge of \$1.2 million. The following table summarizes the impairment charge recognized in the first quarter of 2008:

<u>(In millions)</u>	<u>Pre-Tax Impairment Charges</u>
Inventory	\$10.9
Property, plant and equipment, net	16.5
Goodwill	27.0
Patents and other intangible assets, net	<u>1.2</u>
Total pre-tax impairment charges	<u>\$55.6</u>

Results for the year ended December 31, 2008 also include the accrual of certain workers' compensation claims that remain the Company's liability following the disposition of several businesses over the past few years. A pre-tax gain of \$5.8 million was recognized in 2007 related to the Company's sale of the systems and equipment businesses in 2006.

Market Risk

The Company is exposed to risks in currency exchange rates for transactions denominated in foreign currencies. Revenues for sales of products manufactured in China for the North American market are generated predominately in U.S. Dollars. Many of the obligations incurred by these operations are settled in Chinese Renminbi or Hong Kong Dollars. Should the U.S. Dollar weaken significantly against the Renminbi or Hong Kong Dollar, the Company's results of operations could be adversely affected. The Company continues to monitor developments in China that may affect its strategy and will hedge its currency risk exposure when deemed effective and prudent. While the Company is exposed to the exchange rates of other currencies including the Canadian Dollar, British Pound, Mexican Peso and Euro, their risk is considered minimal. Approximately 12% of the Company's revenues from continuing operations for the year ended December 31, 2009 are in currencies other than the U.S. Dollar.

From time-to-time the Company may manage its interest rate exposure through the use of treasury locks and interest rate swaps to reduce volatility of cash flows, impact on earnings and to lower its cost of capital. On November 14, 2006, the Company entered into treasury lock contracts with a notional amount of \$100.0 million to hedge the cash flow variability on forecasted debt interest payments associated with changes in interest rates. These contracts were designated as cash flow hedges and were deemed effective at the origination date. On September 30, 2008, the Company terminated the treasury lock contracts resulting in a loss of \$7.7 million (\$4.8 million, net of tax), which was to be amortized to interest expense over the term of the debt. During the fourth quarter of 2008, due to positive cash flows and unfavorable

capital markets, the Company determined it would not issue the forecasted debt. As a result, the unamortized loss was recorded in Interest expense, net.

There were no treasury locks or interest rate swaps in place as of December 31, 2009.

The Company's operations use certain commodities such as chemicals, resins, carbon black, synthetic and natural rubber and steel. As such, the Company's cost of operations is subject to fluctuations as the markets for these commodities change. The Company monitors these risks, but currently has no derivative contracts in place to hedge these risks.

Critical Accounting Policies

The Company's significant accounting policies are more fully described in the Notes to Consolidated Financial Statements in Item 8. Certain of the Company's accounting policies require the application of significant judgment by management in selecting the appropriate assumptions for calculating financial estimates. By their nature, these judgments are subject to an inherent degree of uncertainty. These judgments are based on our historical experience, terms of existing contracts, our observation of trends in the industry, information provided by our customers and information available from other outside sources, as appropriate. The Company considers certain accounting policies related to revenue recognition, estimates of reserves for receivables and inventory, deferred revenue and extended product warranty, valuation of long-lived assets, self-insurance retention, and pensions and other post-retirement plans to be critical policies due to the estimation processes involved.

Revenue Recognition. Revenues are recognized when pervasive evidence of an arrangement exists, goods have been shipped (or services have been rendered), the customer takes ownership and assumes risk of loss, collection is probable, and the sales price is fixed or determinable. Provisions for discounts and rebates to the customers and other adjustments are provided for at the time of sale as a deduction to revenue.

Allowance for Doubtful Accounts. The Company performs ongoing credit evaluations of its customers and adjusts credit limits based upon payment history and the customer's current credit worthiness, as determined by the review of their credit information. Allowances for doubtful accounts are estimated based on the evaluation of potential losses related to customer receivable balances. Estimates are developed by using standard quantitative measures based on historical losses, adjusting for current economic conditions and, in some cases, evaluating specific customer accounts for risk of loss. The allowance for doubtful accounts was \$7.9 million at December 31, 2009 and \$11.3 million at December 31, 2008. Changes in economic conditions in specific markets in which the Company operates could have an effect on reserve balances required.

Inventories. Inventories for continuing and discontinued operations are valued at the lower of cost or market on the first-in, first-out basis. Cost of inventories includes raw materials, direct labor and manufacturing overhead based on practical capacity. The Company regularly reviews inventory quantities on hand for excess and obsolete inventory based on estimated forecasts of product demand and production requirements for the next twelve months and issues related to specific inventory items.

Deferred Revenue and Extended Product Warranty. The Company offers extended warranty contracts on sales of certain products; the most significant being those offered on its installed roofing systems within the Construction Materials segment. The lives of these warranties range from five to thirty years. All revenue from the sale of these contracts is deferred and amortized on a straight-line basis over the life of the contracts. Current costs of services performed under these contracts are expensed as incurred. The Company also records an additional loss and a corresponding reserve if the total expected costs of providing services under the contract exceed unearned revenues equal to such excess. The Company estimates total expected warranty costs using quantitative measures based on historical claims experience and management judgment.

Goodwill and Other Intangible Assets. Other intangible assets are recorded at cost. Intangible assets that are subject to amortization are amortized on a straight-line basis over their useful lives. Goodwill and intangible assets with indefinite useful lives are not subject to amortization, but are tested at least annually for impairment. The Company principally uses discounted cash flow models in evaluating goodwill, but may use other measures when appropriate. Costs allocated to patents and other intangible assets of acquired companies are based on estimated fair value at the date of acquisition.

The Company did not recognize goodwill impairment in 2009; however, deterioration of the market-related factors used in the evaluation could potentially result in a future material goodwill impairment loss. Any combination of changes to significant assumptions used in the analysis resulting in a 5% reduction in fair value as of the Company's measurement date would still not have resulted in an impairment charge.

Valuation of Long-Lived Assets. Long-lived assets are reviewed for impairment annually, or earlier, if indicators of potential impairment exist. The fair value of the assets, is determined based on discounted estimated future cash flows. The assumptions used to estimate fair value include management's best estimates of future growth rates, capital expenditures, discount rates, and market conditions. If the estimated fair value of a business unit is determined to be less than its book value, the Company is required to estimate the fair value of all identifiable assets and liabilities of that business unit. This requires valuation of certain internally developed and unrecognized assets. Once this process is complete, the amount of impairment, if any, can be determined. These valuations can be significantly affected by estimates of future performance and discount rates over a relatively long period of time, market price valuation multiples and marketplace transactions in related markets. These estimates will likely change over time. Some of our businesses operate in cyclical industries and the valuation of these businesses can be expected to fluctuate as a result of their cyclicity. Any resulting impairment loss could have an adverse impact on our financial condition and results of operations.

Self Insurance Retention. The Company maintains self-retained liabilities for workers' compensation, medical and dental, general liability, property and product liability claims up to applicable retention limits. The Company estimates these retention liabilities utilizing actuarial methods and loss development factors. The Company's historical loss experience is considered in the calculation. The Company is insured for losses in excess of these limits.

Pensions and Other Post-Retirement Plans. The Company maintains defined benefit retirement plans for certain employees. The annual net periodic expense and benefit obligations related to these plans are determined on an actuarial basis. This determination requires assumptions to be made concerning general economic conditions (particularly interest rates), expected return on plan assets, increases to compensation levels, and health care cost trends. These assumptions are reviewed periodically by management in consultation with its independent actuary and investment manager. Changes in the assumptions to reflect actual experience can result in a change in the net periodic expense and accrued benefit obligations. The defined benefit pension plans' assets consist primarily of fixed-income mutual funds, which are considered Level 1 assets under the fair value hierarchy as their fair value is derived from market-observable data. The Company uses the market related valuation method to determine the value of plan assets, which recognizes the change of the fair value of the plan assets over five years. If actual experience differs from these long-term assumptions, the difference is recorded as an unrecognized actuarial gain (loss) and then amortized into earnings over a period of time based on the average future service period, which may cause the expense related to providing these benefits to increase or decrease. The expected rate of return on plan assets was 7.0% for the 2009 valuation. While the Company believes 7.0% is a reasonable expectation based on the plan assets' mix of fixed income and equity investments, significant differences in actual experience or significant changes in the assumptions used may materially affect the pension obligations and future expense. The effects of a 0.25% increase or decrease in the expected rate of return would change the Company's estimated 2010 pension expense by approximately \$0.3 million. The assumed discount rate was 5.68% for the 2009 valuation. The effects of a 0.25% increase

or decrease in the assumed discount rate would change the Company's projected benefit obligation at December 31, 2009 by approximately \$4.0 million. The Company used an assumed rate of compensation increase of 4.29% for the 2009 valuation. This rate is not expected to change in the foreseeable future and is slightly higher than the Company's actual rate of compensation increase over the past few years.

The Company also has a limited number of unfunded post-retirement benefit programs that provide certain retirees with medical and prescription drug coverage. The annual net periodic expense and benefit obligations of these programs are also determined on an actuarial basis and are subject to assumptions on the discount rate and increases in compensation levels. The Company adopted a December 31 measurement date in 2008. In prior years a September 30 measurement date was used. The discount rate used for the 2009 valuation was 5.62%. The effects of a 1% increase or decrease in either the discount rate or the assumed health care cost trend rates would not be material. Like the defined benefit retirement plans, these plans' assumptions are reviewed periodically by management in consultation with its independent actuary. Changes in the assumptions can result in a change in the net periodic expense and accrued benefit obligations.

New Accounting Standards Not Yet Effective

Accounting Standards issued but not effective until after December 31, 2009 are not expected to have a significant effect on the Company's consolidated financial statements.

Forward-Looking Statements

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are made based on known events and circumstances at the time of publication, and as such, are subject in the future to unforeseen risks and uncertainties. It is possible that the Company's future performance may differ materially from current expectations expressed in these forward-looking statements, due to a variety of factors such as: increasing price and product/service competition by foreign and domestic competitors, including new entrants; technological developments and changes; the ability to continue to introduce competitive new products and services on a timely, cost-effective basis; the Company's mix of products/services; increases in raw material costs which cannot be recovered in product pricing; domestic and foreign governmental and public policy changes including environmental regulations; threats associated with and efforts to combat terrorism; protection and validity of patent and other intellectual property rights; the successful integration and identification of the Company's strategic acquisitions; the cyclical nature of the Company's businesses; and the outcome of pending and future litigation and governmental proceedings. In addition, such statements could be affected by general industry and market conditions and growth rates, the condition of the financial and credit markets, and general domestic and international economic conditions including interest rate and currency exchange rate fluctuations. Further, any conflict in the international arena may adversely affect the general market conditions and the Company's future performance. The Company undertakes no duty to update forward-looking statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Information concerning market risk is set forth in Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations under the heading "Market Risk."

Item 8. Financial Statements and Supplementary Data.

Notes to Consolidated Financial Statements

Note 1—Summary of Accounting Policies

Nature of Business

Carlisle Companies Incorporated, its wholly-owned subsidiaries and their divisions or subsidiaries, referred to herein as the “Company” or “Carlisle,” manufacture and distribute a wide variety of products across a broad range of industries, including, among others, roofing, construction, trucking, foodservice, industrial equipment, outdoor power equipment and aircraft manufacturing. The Company markets its products as a component supplier to original equipment manufacturers, distributors, as well as directly to end-users.

Basis of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All material intercompany transactions and accounts have been eliminated. The Company’s fiscal year-end is December 31.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“United States” or “U.S.”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Debt securities with a maturity of three months or less when acquired are cash equivalents. Cash and cash equivalents are stated at cost, which approximates market value.

Revenue Recognition

Revenues are recognized when persuasive evidence of an arrangement exists, goods have been shipped (or services have been rendered), the customer takes ownership and assumes risk of loss, collection is probable, and the sales price is fixed or determinable.

Provisions for discounts and rebates to customers and other adjustments are provided for at the time of sale as a deduction to revenue.

Shipping and Handling Costs

Costs incurred to physically transfer product to customer locations are recorded as a component of cost of goods sold. Charges passed on to customers are recorded into revenue.

Allowance for Doubtful Accounts

The Company performs ongoing credit evaluations of its customers and adjusts credit limits based upon payment history and the customer’s current credit worthiness, as determined by the review of their credit information. Allowances for doubtful accounts are estimated based on the evaluation of potential losses related to customer receivable balances. Estimates are developed by using standard quantitative measures based on historical losses, adjusting for current economic conditions and, in some cases, evaluating specific customer accounts for risk of loss. The allowance for doubtful accounts was \$7.9 million

Notes to Consolidated Financial Statements (Continued)

Note 1—Summary of Accounting Policies (Continued)

at December 31, 2009 and \$11.3 million at December 31, 2008. Changes in economic conditions in specific markets in which the Company operates could have an effect on reserve balances required.

Inventories

Inventories for continuing and discontinued operations are valued at the lower of cost or market on the first-in, first-out basis. Cost of inventories includes raw materials, direct labor and manufacturing overhead based on practical capacity. The Company regularly reviews inventory quantities on hand for excess and obsolete inventory based on estimated forecasts of product demand and production requirements for the next twelve months and issues related to specific inventory items.

Deferred Revenue and Extended Product Warranty

The Company offers extended warranty contracts on sales of certain products; the most significant being those offered on its installed roofing systems within the Construction Materials segment. The lives of these warranties range from five to thirty years. All revenue for the sale of these contracts is deferred and amortized on a straight-line basis over the life of the contracts. Current costs of services performed under these contracts are expensed as incurred. The Company also records a loss and a corresponding reserve if the total expected costs of providing services under the contract exceed unearned revenues. The Company estimates total expected warranty costs using standard quantitative measures based on historical claims experience and management judgment. See Note 17.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Costs allocated to property, plant and equipment of acquired companies are based on estimated fair value at the date of acquisition. Depreciation is principally computed on the straight-line basis over the estimated useful lives of the assets. Depreciation includes the amortization of capital leases. Asset lives are 20 to 40 years for buildings, 5 to 15 years for machinery and equipment and 3 to 10 years for leasehold improvements.

The Company performs impairment tests on its long-lived assets, excluding goodwill and other intangible assets, when circumstances indicate that their carrying amounts may not be recoverable. If required, recoverability is tested by comparing the estimated future undiscounted cash flows of the asset or asset group to its carrying value. If the carrying value is not recoverable, the asset or asset group is written down to market value.

Self Insurance Retention

The Company maintains self-retained liabilities for workers' compensation, medical and dental, general liability, property and product liability claims up to applicable retention limits. The Company estimates these retention liabilities utilizing actuarial methods and loss development factors. The Company's historical loss experience is considered in the calculation. The Company is insured for losses in excess of these limits. See Note 17.

Goodwill and Other Intangible Assets

Other intangible assets are recorded at cost. Intangible assets that are subject to amortization are amortized on a straight-line basis over their useful lives. Goodwill and intangible assets with indefinite useful lives are not subject to amortization, but are tested at least annually for impairment. The Company

Notes to Consolidated Financial Statements (Continued)

Note 1—Summary of Accounting Policies (Continued)

principally uses discounted cash flow models in evaluating goodwill, but may use other measures when appropriate. Costs allocated to patents and other intangible assets of acquired companies are based on estimated fair value at the date of acquisition. See Note 6 and Note 9.

Pension and Other Post Retirement Benefits

The Company maintains defined benefit pension plans for certain employees. Additionally, the Company has a limited number of post-retirement benefit programs that provide certain retirees with medical and prescription drug coverage. The annual net periodic expense and benefit obligations related to these plans are determined on an actuarial basis. This determination requires assumptions to be made concerning general economic conditions (particularly interest rates), expected return on plan assets, increases to compensation levels, and health care cost trends. These assumptions are reviewed periodically by management in consultation with its independent actuary. Changes in the assumptions to reflect actual experience can result in a change in the net periodic expense and accrued benefit obligations. The defined benefit pension plans' assets consist primarily of fixed-income mutual funds that are considered Level 1 assets under the fair value hierarchy, as their fair value is derived from market-observable data. The Company adopted a December 31 measurement date for valuation purposes in 2008. See Note 13 for additional information regarding these plans and the associated plan assets.

Derivative Financial Instruments

The Company records derivative financial instruments at fair value on the balance sheet, with changes in fair value recorded currently in earnings unless the Company elects to account for the derivative as a hedge. If the Company elects to designate a derivative as a fair value hedge and it is highly effective, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If a fair value hedge is terminated before maturity, the adjusted carrying amount of the hedged asset or liability remains as a component of the carrying amount of that asset or liability until it is disposed. If the hedged item is an interest-bearing financial instrument, the adjusted carrying amount is amortized into earnings over the remaining life of the instrument. If the Company elects to designate the derivative as a cash flow hedge and it is highly effective, the effective portions of changes in the fair value of the derivative are recorded in other comprehensive income and are recognized in the income statement when the hedged item affects earnings. Ineffective portions of changes in the fair value of cash flow hedges are recognized currently in earnings.

The Company is subject to market risk from exposures to changes in interest rates due to its financing, investing and cash management activities. The Company uses treasury lock contracts, interest rate swap agreements, or other derivative instruments, from time to time, to manage the interest rate risk of its floating and fixed rate debt portfolio. The Company, on a periodic basis, assesses the initial and ongoing effectiveness of its hedging relationships.

The Company's international operations are exposed to translation risk when the local currency financial statements are translated into U.S. Dollars. Carlisle monitors this risk, but at December 31, 2009, had not entered into any derivative financial instruments to hedge net investment risk.

Foreign currency exchange rate risk is considered minimal. At December 31, 2009 the Company had no foreign currency hedges in place. Approximately 12% of the Company's revenues from continuing operations for the year ended December 31, 2009 are in currencies other than the U.S. Dollar.

Notes to Consolidated Financial Statements (Continued)

Note 1—Summary of Accounting Policies (Continued)

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences of the differences between financial statement carrying amounts of assets and liabilities and their respective tax basis. These balances are measured using enacted tax rates expected to apply to taxable income in the years in which such temporary differences are expected to be recovered or settled. If a portion or all of a deferred tax asset is not expected to be realized, a valuation allowance is recognized.

Stock-Based Compensation

The Company accounts for stock-based compensation under the fair-value method. Accordingly, equity classified stock-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as expense over the requisite service period, which generally matches the stated vesting period of the award. The Company recognizes expense for awards that have graded-vesting features under the graded-vesting method, which considers each separately vesting tranche as though they were, in substance, multiple awards.

Foreign Currency Translation

The functional currency of the Company's subsidiaries outside the United States is the currency of the primary economic environment in which the subsidiary operates. Assets and liabilities of these operations are translated at the exchange rate in effect at each balance sheet date. Income statement accounts are translated at the average rate of exchange prevailing during the year. Translation adjustments arising from the use of differing exchange rates from period to period are included as a component of shareholders' equity in Accumulated other comprehensive income. Gains and losses from foreign currency transactions and from the remeasurement of monetary assets and liabilities and associated income statement activity of foreign subsidiaries where the functional currency is the U.S. Dollar and the books are maintained in the local currency are included in Other expense (income), net.

Reclassifications and Revisions

Certain reclassifications and revisions have been made to prior period's information to conform to the current year's presentation as follows:

- Basic and diluted earnings per share for the year ended December 31, 2008 and 2007 have been retrospectively adjusted to reflect the computation of earnings per share using the two-class method, see Note 15 for additional information.
- The Consolidated Statements of Earnings and Comprehensive Income for the year ended December 31, 2008 and 2007 have been revised to reflect the presentation of Earnings before interest and income taxes ("EBIT").
- The Consolidated Statements of Earnings and Comprehensive Income for the year ended December 31, 2008 and 2007 and the quarterly financial data for 2009 and 2008, included in Note 22, have been retrospectively adjusted to reflect the reclassification of the power transmission product line from discontinued operations to continuing operations. The 2008 Consolidated Balance Sheet has been retrospectively adjusted to reflect the reclassification of the assets and associated liabilities of the power transmission product line from held for sale to held and used. See Note 19 for additional information regarding discontinued operations and assets held for sale.

Notes to Consolidated Financial Statements (Continued)

Note 1—Summary of Accounting Policies (Continued)

- The segment disclosures for 2008 and 2007 in Note 6 and Note 21 have been revised to reflect the formation of the Engineered Transportation Solutions segment that combined the previous tire and wheel, industrial brake and friction and the power transmission product lines, the classification of the power transmission product line as a continuing operation and its associated assets as held and used, and the use of EBIT as the measure of segment profitability.

New Accounting Standards Adopted

In December 2007, the Financial Accounting Standards Board (“FASB”) issued accounting guidance which has significantly changed the accounting for and reporting of business combination transactions and noncontrolling (minority) interests in consolidated financial statements. The guidance related to reporting of business combination transactions and noncontrolling (minority) interests is required to be adopted simultaneously and is effective for the first annual reporting period beginning on or after December 15, 2008. The Company has adopted the provisions of this accounting guidance prospectively, as required, beginning January 1, 2009. The adoption did not have a material impact on the Company’s consolidated financial statements. See Note 9 for additional information.

In January 2008, the Company adopted accounting guidance related to fair value measurements for financial assets and liabilities. The guidance defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This guidance applies only for fair value measurements that are already required or permitted by other accounting guidance (except for measurements of share-based payments) and is intended to increase the consistency of those measurements. Accordingly, this guidance does not require any new fair value measurements. Adoption of this accounting guidance had no material effect on the Company’s results of operations or financial position. In February 2008, additional guidance was issued, which deferred the effective date of the provisions related to certain types of nonfinancial assets and nonfinancial liabilities by one year to fiscal years beginning after November 15, 2008. The Company has adopted these provisions as they relate to the fair value measurement of non-financial assets and liabilities effective January 1, 2009. The adoption did not have a material impact on the Company’s consolidated financial statements. See Note 20 for additional information.

In March 2008, the FASB issued disclosure guidance which applies to all derivative instruments and nonderivative instruments that are designated and qualify as hedging instruments and related hedged items. The disclosure guidance requires entities to provide greater transparency through additional disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for, and (c) how derivative instruments and related hedged items affect an entity’s financial position, results of operations, and cash flows. This disclosure guidance is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. At December 31, 2009, the Company had no active derivative instruments, thus the adoption had no effect on the Company’s consolidated financial statements.

In April 2008, the FASB issued accounting guidance that amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The intent is to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset. The effective date is for financial statements issued for fiscal years and interim periods beginning after December 15, 2008. Thus, the Company has adopted these standards on January 1, 2009 and applied the provisions prospectively to future business combinations.

Notes to Consolidated Financial Statements (Continued)

Note 1—Summary of Accounting Policies (Continued)

In June 2008, the FASB issued accounting guidance which clarifies that unvested share-based payment awards with a right to receive nonforfeitable dividends are participating securities for purposes of applying the two-class method of computing earnings per share. The Company adopted the provisions of this accounting guidance effective January 1, 2009. The adoption did not have a material effect on the Company's consolidated financial statements. See Note 15 for more information regarding the Company's adoption of this accounting guidance.

In November 2008, the Emerging Issues Task Force issued updated guidance, which clarifies the accounting for certain transactions involving equity method investments. This interpretation is effective for financial statements issued for fiscal years beginning on or after December 15, 2008 and interim periods within those years. Thus, the Company has adopted this interpretation on January 1, 2009. The adoption did not have a material impact on the Company's consolidated financial statements.

In December 2008, the FASB issued updated accounting guidance, which provides additional guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The guidance is effective for financial statements issued for fiscal years ending after December 15, 2009. Thus, the Company has adopted this interpretation on December 31, 2009, which will result in increased disclosures in the financial statements related to defined benefit plan assets.

In May 2009, the FASB issued guidance which requires an entity to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet. For nonrecognized subsequent events that must be disclosed to keep the financial statements from being misleading, an entity is required to disclose the nature of the event as well as an estimate of its financial effect, or a statement that such an estimate cannot be made. In addition, this guidance requires an entity to disclose the date through which subsequent events have been evaluated. The guidance is effective for interim or annual periods ending June 15, 2009. The Company has evaluated subsequent events through the date these financial statements were filed with the SEC. See Note 23 for additional information related to subsequent events.

In June 2009, the FASB issued guidance related to the FASB Accounting Standards Codification ("ASC"). Effective for interim or annual financial periods ending after September 15, 2009, the ASC is the source of authoritative generally accepted accounting principles in the United States of America ("U.S. GAAP") and changes the referencing of accounting standards. The ASC is not intended to change or alter existing U.S. GAAP; however the way authoritative literature is referred to has changed effective in the third quarter of 2009. The Company has adopted the provisions of the ASC effective September 30, 2009.

New Accounting Standards Not Yet Effective

Other new accounting standards issued but not effective until after December 31, 2009 are not expected to have a significant effect on the Company's consolidated financial statements.

Note 2—Fire Gain

On November 16, 2008, a fire occurred at the tire and wheel plant in Bowdon, GA, and as a result the building and the majority of the machinery, equipment, records and other assets were destroyed. In order to service customers, partial operations were initiated at a facility in Heflin, AL, and some production was transferred to other tire and wheel plants or outsourced to third parties.

Notes to Consolidated Financial Statements (Continued)

Note 2—Fire Gain (Continued)

In the fourth quarter of 2008, while the Company was negotiating its claim, a pretax loss was recorded representing the deductible of \$0.1 million. The net result of fire-related transactions in the first quarter of 2009 was a \$2.5 million pretax gain, which included a \$2.6 million pretax gain on the settlement of the inventory claim which was the difference between \$8.9 million, representing the loss on inventory recorded in the fourth quarter of 2008 for which a receivable was recorded at December 31, 2008, and \$11.5 million of cash proceeds received from the insurance carriers to settle the inventory claim in the first quarter of 2009. Total payments of \$13.5 million were received from the insurance carriers in the first quarter of 2009.

The net result of fire-related transactions in the second quarter of 2009 was a \$24.5 million pretax gain on the settlement of all other claims and that amount was reported as Gain related to fire settlement. This gain was the difference between the \$41.0 million of cash proceeds received from the insurance carriers in settlement of all outstanding claims and the \$11.2 million insurance claims receivable balance at March 31, 2009 included in Prepaid expenses and other current assets for a portion of the expected insurance reimbursements plus \$5.3 million, representing fire-related cost in the second quarter of 2009.

From January 1, 2009 through June 30, 2009 cash proceeds of \$54.5 million were received from the insurance carriers. Losses and cost incurred from November 16, 2008 through June 30, 2009 of \$27.6 million included \$8.9 million of inventory; \$5.7 million of building, machinery, equipment and other assets; and \$13.0 million of fire-related cost. The \$26.9 million pretax gain from November 16, 2008 through June 30, 2009 was the difference between cash proceeds of \$54.5 million and the losses of \$27.6 million. On a quarterly basis, a loss of \$0.1 million was recorded in the fourth quarter of 2008, a gain of \$2.5 million was recorded in the first quarter of 2009, and a gain of \$24.5 million was recorded in the second quarter of 2009.

A minimal amount of fire-related scrap was sold in the third quarter of 2009. Since all insurance claims due to this fire were settled with the carriers, there was no insurance claims receivable as of December 31, 2009 and no additional insurance proceeds are anticipated.

Note 3—Receivables Facility

Until the second quarter of 2009, the Company maintained an agreement (the “Receivables Facility”) with a financial institution whereby it sold on a continuous basis an undivided interest in certain eligible trade accounts receivable. Pursuant to the Receivables Facility, the Company formed a wholly-owned, special purpose, bankruptcy-remote subsidiary (“SPV”). The financial position and results of operations of the SPV were consolidated with the Company. The SPV was formed for the sole purpose of buying and selling receivables generated by the Company. Under the Receivables Facility, the Company, irrevocably and without recourse, transferred all applicable trade accounts receivables to the SPV. The SPV, in turn, sold, subject to certain conditions, undivided interests in these receivables and was permitted to receive advances of up to \$150.0 million from the conduit administered by an independent financial institution for the sale of such an undivided interest.

In the second quarter of 2009, the Company terminated the Receivables Facility. The facility was terminated as a result of the Company’s strong operating cash flows and its available credit facilities and lines of credit that should provide adequate liquidity and capital resources to fund ongoing operations, expand existing lines of business and make strategic acquisitions.

All receivables serviced by the SPV at December 31, 2008, including the amounts outstanding, are included in Receivables in the Company’s Consolidated Balance Sheets at their fair value. At December 31, 2008, the receivables serviced by the SPV totaled \$214.0 million, including the \$100.0 million

Notes to Consolidated Financial Statements (Continued)

Note 3—Receivables Facility (Continued)

outstanding. The related borrowings are reflected in Short-term debt, including current maturities. Refer to Note 7.

The interest rate on amounts outstanding under the Receivables Facility was 2.32% at December 31, 2008. Securitization expenses for 2008 and 2007 of \$0.9 million and \$1.0 million, respectively, are included in Interest expense, net. For the first eight months of 2007, the Company's loss on the sales of receivables under the former securitization facility was reported in Other expense (income), net and amounted to \$3.5 million.

Note 4—Inventories

The Company is a diversified manufacturing entity comprised of multiple domestic and international companies that operate as distinct businesses manufacturing different products. The First-in, First-out ("FIFO") method was used to value inventories.

The components of inventories at December 31 are as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Finished goods	\$205.9	\$288.2
Work-in-process	29.3	34.9
Raw materials	120.5	152.9
Reserves and variances—net	(9.9)	10.8
	345.8	486.8
Inventories associated with assets held for sale	—	(18.3)
Inventories	\$345.8	\$468.5

Note 5—Property, Plant and Equipment

The components of property, plant and equipment at December 31 are as follows:

<u>In millions</u>	<u>2009</u>	<u>2008*</u>
Land	\$ 31.7	\$ 29.3
Buildings and leasehold improvements	270.8	279.1
Machinery and equipment	681.3	673.5
Projects in progress	24.8	32.8
	1,008.6	1,014.7
Accumulated depreciation	(524.1)	(497.1)
Property, plant and equipment, net, associated with assets held for sale	(1.9)	(4.3)
Property, plant and equipment, net	\$ 482.6	\$ 513.3

* 2008 figures have been revised to reflect the reclassification of the power transmission product line from held for sale to held and used.

During 2009 and 2008, the Company capitalized interest in the amount of \$0.8 million and \$1.5 million, respectively.

Notes to Consolidated Financial Statements (Continued)

Note 6—Goodwill and Other Intangible Assets

The changes in the carrying amount of goodwill for the years ended December 31, 2009 and 2008 are as follows:

In millions	Construction Materials	Engineered Trans. Solutions	Interconnect Technologies	Foodservice Products	Specialty Products	Disc. Ops.	Total
Balance at January 1, 2008*

* 2008 figures have been revised to reflect the change in the Company's segments.

During the year ended December 31, 2008, the Company recognized intangible asset and goodwill impairment losses in connection with its decision to pursue the disposition of its power transmission belt (“power transmission belt business”) and on-highway brake business (“on-highway brake business”). The impairment was based on fair value using earnings multiples of disposal valuations of comparable businesses. In the fourth quarter of 2009, the Company ended the sale process for its power transmission belt business and integrated this business into its Engineered Transportation Solutions segment. The 2008 impairment losses for goodwill are set forth in the table reflecting a loss of \$55.5 million for the power transmission business, included in Engineered Transportation Solutions, and a loss of \$27.0 million for the on-highway brake business, included in discontinued operations.

Notes to Consolidated Financial Statements (Continued)

Note 6—Goodwill and Other Intangible Assets (Continued)

The Company's Other intangible assets, net at December 31, 2009, are as follows:

<u>In millions</u>	<u>Acquired Cost</u>	<u>Accumulated Amortization</u>	<u>Net Book Value</u>
Assets subject to amortization			
Patents	\$ 9.1	\$ (7.8)	\$ 1.3
Customer Relationships	147.6	(23.4)	124.2
Other	20.3	(3.8)	16.5
Assets not subject to amortization			
Trade names	20.9		20.9
Other intangible assets, net	<u>\$197.9</u>	<u>\$(35.0)</u>	<u>\$162.9</u>

The Company's Other intangible assets, net at December 31, 2008, are as follows:

<u>In millions</u>	<u>Acquired Cost</u>	<u>Accumulated Amortization</u>	<u>Net Book Value</u>
Assets subject to amortization			
Patents	\$ 9.0	\$ (7.1)	\$ 1.9
Customer Relationships	134.6	(13.8)	120.8
Other	7.6	(2.3)	5.3
Assets not subject to amortization			
Trade names	18.3		18.3
Other intangible assets, net	<u>\$169.5</u>	<u>\$(23.2)</u>	<u>\$146.3</u>

Estimated amortization expense over the next five years is as follows: \$12.2 million in 2010, \$11.8 million in 2011, \$10.4 million in 2012, \$9.4 million in 2013 and \$9.1 million in 2014.

In 2008, net impairment losses for other intangible assets were recognized totaling approximately \$6.0 million and consisted of \$4.0 million for trademarks, \$0.6 million for patents, \$0.2 million for software, and \$1.2 million for customer relationships. These impairment losses are described in more detail in Note 18 and Note 19.

The net book value of the Company's Other intangible assets by reportable segment as of December 31 are as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Construction Materials	\$ 17.5	\$ 19.1
Engineered Transportation Solutions	6.7	7.2
Interconnect Technologies	94.7	73.0
FoodService Products	44.0	47.0
Total	<u>\$162.9</u>	<u>\$146.3</u>

Refer to Note 9 for information on Other intangible assets acquired during the reporting period.

Notes to Consolidated Financial Statements (Continued)

Note 7—Borrowings

Borrowings under short-term credit lines and long-term debt include:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
6.125% senior notes due 2016, net of unamortized discount of (\$0.7) and (\$0.9) respectively	\$149.3	\$ 149.1
Accounts receivable securitization facility	—	100.0
Revolving credit lines	—	135.0
Industrial development and revenue bonds due 2018	6.7	7.3
Other, including capital lease obligations	0.1	6.9
Short-term credit lines	—	2.0
	156.1	400.3
Less short-term debt, including current maturities and industrial revenue and development bonds	—	(127.0)
Long-term debt	\$156.1	\$ 273.3

At December 31, 2009 the Company had \$466.0 million available under its \$500.0 million revolving credit facility. The revolving credit facility provides for grid-based interest pricing based on the credit rating of the Company's senior unsecured bank debt or other unsecured senior debt and the Company's utilization of the facility. The average interest rate of the revolving credit facility for 2009 and 2008 was 0.85% and 3.14%, respectively.

During the second quarter of 2009, the Company terminated its existing \$150.0 million accounts receivable securitization facility. The facility was terminated as a result of the Company's strong operating cash flows and its available credit facilities and lines of credit that should provide adequate liquidity and capital resources to fund ongoing operations, expand existing lines of business and make strategic acquisitions.

At December 31, 2008, the Company had \$20.4 million available under the Company's \$150.0 million accounts receivable securitization facility. The securitization facility was treated as a borrowing for accounting purposes and the related debt was reflected in Short-term debt, including current maturities. The average interest rate on the facility was 3.19% for 2008.

The Company also maintains a \$55.0 million uncommitted line of credit of which \$0.0 million was outstanding at December 31, 2009 and \$2.0 million was outstanding at December 31, 2008. At December 31, 2009, \$55.0 million was available under this facility. The average interest rate on the uncommitted line was 2.88% for 2009 and 3.22% for 2008.

Letters of credit amounting to \$34.0 million and \$36.2 million were outstanding at December 31, 2009 and December 31, 2008, respectively, primarily to provide security under insurance arrangements and certain borrowings.

Under the Company's various debt and credit facilities, the Company is required to meet various restrictive covenants and limitations, including certain net worth, cash flow ratios and limits on outstanding debt balances held by certain subsidiaries. The Company was in compliance with all covenants and limitations in 2009 and 2008.

The industrial development and revenue bonds are collateralized by letters of credit, Company guarantees and/or by the facilities and equipment acquired through the proceeds of the related bond issuances. The weighted average interest rates on the revenue bonds for 2009 and 2008 were 1.79% and 3.43%, respectively. The Company estimates the fair value of its industrial development and revenue bonds approximates their carrying value.

Notes to Consolidated Financial Statements (Continued)

Note 7—Borrowings (Continued)

Cash payments for interest were \$10.8 million in 2009, \$23.5 million in 2008, and \$26.2 million in 2007. Interest expense, net is shown net of interest income of \$0.5 million in 2009, \$1.2 million in 2008, and \$11.5 million in 2007.

\$150.0 million (excluding unamortized discount of \$0.7 million) of the Company's long-term debt matures in 2016 and \$6.7 matures in 2018.

At December 31, 2009, the fair value of the Company's \$150 million, 6.125% senior notes due 2016, using the Level 2 method of input, is approximately \$163.5 million. The fair value of the Company's senior notes is based on current year yield rates plus the Company's estimated credit spread available for financings with similar terms and maturities.

Note 8—Derivative Financial Instruments

The Company is exposed to the impact of changes in interest rates and market values of its debt instruments, changes in raw material prices and foreign currency exchange rate fluctuations. Management of interest rate exposure includes consideration of the use of treasury lock contracts and interest rate swaps to reduce the volatility of cash flows, the impact on earnings, and to lower the Company's cost of capital.

On May 15, 2007, the Company executed forward exchange contracts with a total notional amount of \$95.0 million to hedge the Company's foreign currency exposure of its net investment in its European roofing joint venture ("Icopal") denominated in Danish Kroner. These contracts were designated as economic hedges of a net investment and were deemed effective at the origination date. Upon the sale of Icopal on July 31, 2007, these hedges were redesignated as non-hedging derivatives and any change in the value of the derivatives is reflected in Other income, net. On September 28, 2007, the Company executed forward exchange contracts with a notional amount of \$95.0 million to offset the remeasurement of the short-term investment created by the sale of Icopal which was denominated in Danish Kroner. These contracts were designated as non-hedging derivatives. These contracts were terminated on December 14, 2007. The termination of the aforementioned forward exchange contracts resulted in the recognition of \$6.8 million of losses reflected in Other expense (income), net, in 2007 which were partially offset by a \$5.7 million foreign exchange gain related to the cash generated by the sale of Icopal denominated in Danish Kroner.

On November 14, 2006, the Company entered into treasury lock contracts with a notional amount of \$100.0 million to hedge the cash flow variability on forecasted debt interest payments associated with changes in interest rates. These contracts were designated as cash flow hedges and were deemed effective at the origination date. On September 30, 2008, the Company terminated the treasury lock contracts resulting in a loss of \$7.7 million (\$4.8 million, net of tax). During the fourth quarter of 2008, due to positive cash flows and unfavorable capital markets, the Company determined it would not issue the forecasted debt. As a result, the loss was recorded in Interest expense, net.

On June 15, 2005, the Company entered into treasury lock contracts with a notional amount of \$150.0 million to hedge the cash flow variability on forecasted debt interest payments associated with changes in interest rates. These contracts were designated as cash flow hedges and were deemed effective at the origination date. On August 15, 2006, the Company terminated the treasury lock contracts resulting in a gain of \$5.6 million (\$3.5 million, net of tax), which was deferred in accumulated other comprehensive income and is being amortized to reduce interest expense until August 2016, the term of the interest payments related to the \$150.0 million in notes issued on August 18, 2006. At December 31, 2009, the Company had a remaining unamortized gain of \$3.7 million (\$2.3 million, net of tax) which is reflected in Accumulated other comprehensive income on the Company's Consolidated Balance Sheets. Approximately \$0.6 million (\$0.4 million, net of tax) is expected to be amortized to reduce Interest expense, net in 2010.

Notes to Consolidated Financial Statements (Continued)

Note 9—Acquisitions

On October 1, 2009, the Company acquired the remaining 51% interest in Japan Power Brake, Inc. (“JPB”), a leading provider of high performance braking solutions for off-highway equipment, primarily in the mining and construction industries in Japan, for a purchase price of approximately \$4.2 million. In connection with this purchase, a gain of \$0.8 million was recognized in Other expense (income), net on the Company’s previous 49% interest in JPB. JPB is located in Atsugi, Japan and is under the management direction of the off-highway braking business that is included in the Engineered Transportation Solutions segment. The purchase price included an allocation of \$0.9 million to other intangible assets reflecting a non-compete agreement with a useful life of 10 years. The remaining purchase price was allocated to current assets; property, plant and equipment; and current liabilities.

On October 1, 2009, the Company acquired 100% of the equity of Electronic Cable Specialists (“ECS”), a leading provider of electrical and structural products and services for the aviation, medical and industrial markets, for a purchase price of approximately \$42.4 million. The acquisition of ECS expands Carlisle’s product and system reach into additional avionics applications and strengthens Carlisle’s engineering and design capabilities. The acquisition will allow for reduction of expenses through consolidation of certain sales, general and administrative functions and through in-house production of certain components which were previously purchased by ECS from third parties. Carlisle also expects to achieve increased sales from its existing customer base with the addition of the engineering and design capabilities of ECS. ECS is located in Franklin, WI and is under the management direction of the Interconnect Technologies segment. The purchase price allocation resulted in current assets of \$15.1 million; property, plant and equipment of \$1.9 million; goodwill of \$13.5 million, identified intangible assets of \$14.5 million, and non-interest bearing current liabilities of \$2.6 million. Of the \$14.5 million of acquired intangible assets, \$2.6 million was assigned to trade names that are not subject to amortization, \$4.5 million was assigned to customer relationships with a determinable useful life of 17 years, and the remaining \$7.4 million was assigned to other intangible assets with a weighted average useful life of 14.7 years. The goodwill from this acquisition is deductible for tax purposes.

On September 18, 2009, the Company acquired the assets of Jerrik, Inc. (“Jerrik”), a recognized leader in the design and manufacture of highly engineered military and aerospace filter connections, for approximately \$33 million. The acquisition expands the Company’s range of products serving the defense and aerospace markets. The acquisition will allow for reduction of expenses through consolidation of certain sales, general and administrative functions and through in-house production of certain components, which were previously purchased by Jerrik from third parties. Jerrik is located in Tempe, AZ and is under the management direction of the Interconnect Technologies segment. The purchase price allocation resulted in current assets of \$7.9 million; property, plant and equipment of \$1.8 million; goodwill of \$13.7 million, identified intangible assets of \$10.8 million, and current liabilities of \$1.2 million. Of the \$10.8 million of acquired intangible assets, \$0.2 million was assigned to trade names with determinable useful life of 2 years, \$7.1 million was assigned to customer relationships with a determinable useful life of 18 years, and the remaining \$3.5 million was assigned to other intangible assets with a weighted average useful life of 18.1 years. The goodwill from this acquisition is deductible for tax purposes.

On April 28, 2008, the Company acquired 100% of the equity of Carlyle Incorporated (“Carlyle”), a leading provider of sophisticated aerospace and network interconnection solutions, for a purchase price of approximately \$194 million. Carlyle is located in Tukwila, WA and is under the management direction of the Interconnect Technologies segment. Carlyle added design and assembly capabilities in specialty in-flight entertainment systems and other interconnect solutions for the aerospace industry. The purchase price allocation resulted in goodwill of \$122.3 million and identified intangible assets of \$76.0 million. Of the \$76.0 million of identified intangible assets, \$75.0 million was assigned to customer relationships with a determinable useful life of 20 years and \$1.0 million was assigned to covenants not to compete with a determinable useful life of 5 years. The goodwill from this acquisition is not deductible for tax purposes.

Notes to Consolidated Financial Statements (Continued)

Note 9—Acquisitions (Continued)

On January 25, 2008, the Company acquired 100% of the equity of both Dinex International, Inc. and Proex, Inc. (collectively “Dinex”), leading suppliers of foodservice products to the healthcare and other institutional industries, for approximately \$96 million. Dinex has facilities in Glastonbury, CT and Batavia, IL, and is under the management direction of the FoodService Products segment. The acquisition has enhanced Carlisle’s position in the higher growth healthcare sector. The purchase price allocation resulted in goodwill of \$29.3 million and identified intangible assets of \$49.8 million. Of the \$49.8 million of identified intangible assets, \$8.0 million was assigned to trade names that are not subject to amortization, \$37.0 million was assigned to customer relationships with a weighted average useful life of 16.4 years, \$1.0 million was assigned to patents with a determinable useful life of 6 years, and the remaining \$3.8 million was assigned to other intangible assets with a weighted average useful life of 6.5 years. The goodwill from this acquisition is deductible for tax purposes.

On May 1, 2007, the Company acquired 100% of the equity of Insulfoam LLC (“Insulfoam”) from Premier Industries, Inc., a leading manufacturer of block molded expanded polystyrene products used primarily as insulation in building and other construction applications, headquartered in Tacoma, WA, for approximately \$168 million. Insulfoam is under the management direction of the Construction Materials segment, and operating results since the acquisition date have been included in that segment. The purchase price allocation resulted in goodwill of approximately \$55.2 million and identified intangible assets of \$20.6 million. Of the \$20.6 million of identified intangible assets, \$10.3 million was assigned to the trade name that is not subject to amortization, while the remaining acquired intangibles of \$10.3 million were allocated primarily to customer related intangibles, which are being amortized over the assets’ determinable useful life of 9 years. The goodwill from this acquisition is deductible for tax purposes.

On February 2, 2007, the Company acquired 100% of the equity of Meixian Tengfei Tyre Co., Ltd., a tire manufacturer, located in Guangdong, China, for consideration of approximately \$20 million. Operating results for this operation since the acquisition date are included in the Engineered Transportation Solutions segment. The purchase price was allocated to Property, plant and equipment, net, as it approximated the fair value of the assets purchased.

On January 29, 2007, the Company purchased the assets of Dongguan Qiaotou Yichang Wire and Cable Assembly Factory, located in Guangdong, China, specializing in complex cable assemblies and wire harnesses for medical and industrial applications, for consideration of approximately \$3 million and contingent additional payments of up to \$4 million based on the acquired company’s future earnings, of which the Company has paid additional consideration of approximately \$0.2 million through December 31, 2009. Operating results for this operation since the acquisition date are included in the Interconnect Technologies segment. The purchase price allocation resulted in goodwill of approximately \$1.5 million and identified intangible assets of \$1.0 million with a weighted-average life of 5.7 years. Identified intangible assets consist primarily of customer relationships valued at \$0.7 million, with a weighted-average life of 4 years, and other agreements valued at \$0.3 million with a weighted-average life of 9 years. The goodwill from this acquisition is not deductible for tax purposes.

Note 10—Shareholders’ Equity

The Company has a Shareholders’ Rights Agreement that is designed to protect shareholder investment values. A dividend distribution of one Preferred Stock Purchase Right (the “Rights”) for each outstanding share of the Company’s common stock was declared, payable to shareholders of record on March 3, 1989. The Rights are attached to the issued and outstanding shares of the Company’s common stock and will become exercisable under certain circumstances, including the acquisition of 25% of the Company’s common stock, or 40% of the voting power, in which case all rights holders except the acquirer may purchase the Company’s common stock at a 50% discount.

Notes to Consolidated Financial Statements (Continued)

Note 10—Shareholders' Equity (Continued)

If the Company is acquired in a merger or other business combination, and the Rights have not been redeemed, rights holders may purchase the acquirer's shares at a 50% discount. On May 26, 2006, the Company amended the Shareholders' Rights Agreement to, among other things, extend the term of the Rights until May 25, 2016.

Common shareholders of record on May 30, 1986 are entitled to five votes per share. Common stock acquired subsequent to that date entitles the holder to one vote per share until held four years, after which time the holder is entitled to five votes per share.

Note 11—Stock-Based Compensation

2004 Executive Incentive Program

The Company maintains an Executive Incentive Program (the "Program") for executives and certain other employees of the Company and its operating divisions and subsidiaries. The Program was approved by shareholders on April 20, 2004. The Program allows for awards to certain employees of stock options, restricted stock, stock appreciation rights, performance shares and units or other awards based on Company stock. At December 31, 2009, 3,321,820 shares were available for grant under this plan, of which 1,015,125 were available for the issuance of restricted and performance share awards.

2005 Nonemployee Director Equity Plan

The Company also maintains the Nonemployee Director Equity Plan (the "Plan") for members of its Board of Directors, with the same terms and conditions as the Program. At December 31, 2009, 322,077 shares were available for grant under this plan. Members of the Board of Directors that receive stock-based compensation are treated as employees for accounting purposes.

Stock Option Awards

Effective 2008, options issued under these plans vest one-third on the first anniversary of grant, one-third on the second anniversary of grant and the remaining one-third on the third anniversary of grant. With the exception of certain awards issued December 1, 1999 (the "December 1999 Grant") and certain awards for which vesting was accelerated on September 7, 2005, prior to 2008, options issued under both of the above plans vested one-third upon grant, one-third on the first anniversary of grant and the remaining one-third on the second anniversary of grant. Vesting for the December 1999 Grant was as follows: 10% on March 1, 2001; 30% on March 1, 2002; 60% on March 1, 2003; and 100% on March 1, 2004. All options, including the December 1999 Grant, have a maximum term life of 10 years. Shares issued to cover options under the Program and the Plan may be issued from shares held in treasury, from new issuances of shares or a combination of the two.

For 2009, 2008 and 2007 share-based compensation expense related to stock options was as follows:

(in millions, except per share amounts)	Years Ended December 31		
	2009	2008	2007
Pre-tax compensation expense	\$ 7.2	\$ 5.3	\$ 9.0
After-tax compensation expense	\$ 4.5	\$ 3.6	\$ 6.0
Impact on diluted EPS	\$0.07	\$0.06	\$0.10

The 2009 compensation expense includes expense related to the early retirement of certain executives of approximately \$1.8 million as they are no longer required to render service to the Company to continue to vest in their awards. The 2007 compensation expense includes an award of 200,000 options granted to executive management in June 2007, and additional expense related to the modification of vesting and termination provisions of certain stock option awards. Unrecognized compensation cost related to stock

Notes to Consolidated Financial Statements (Continued)

Note 11—Stock-Based Compensation (Continued)

options of \$4.2 million at December 31, 2009 is to be recognized over a weighted average period of 1.3 years.

Excess income tax benefits related to share-based compensation expense that must be recognized directly in equity are considered financing cash flows. The amount of financing cash flows for these benefits was \$0.1 million, \$0.1 million and \$5.4 million for the years ended December 31, 2009, 2008 and 2007.

The Company utilizes the Black-Scholes-Merton (“BSM”) option-pricing model to determine the fair value of its stock option awards. The BSM relies on certain assumptions to estimate an options fair value.

The weighted average assumptions used in the determination of fair value for stock option awards in 2009, 2008, and 2007 are as follows:

	Years Ended December 31		
	2009	2008	2007
Expected dividend yield	3.2%	1.7%	1.3%
Expected life in years	5.64	5.50	5.59
Expected volatility	36.4%	26.9%	25.0%
Risk-free interest rate	2.0%	2.7%	4.9%
Weighted average fair value	\$4.99	\$7.99	\$23.55

The expected life of options is based on the assumption that all outstanding options will be exercised at the midpoint of the valuation date and the option expiration date. The expected volatility is based on historical volatility as well as implied volatility of the Company’s publicly traded options. The risk free interest rate is based on rates of U.S. Treasury issues with a remaining life equal to the expected life of the option. The expected dividend yield is based on the projected annual dividend payment per share, divided by the stock price at the date of grant

Stock option activity under the Company’s stock-option awards for 2009, 2008 and 2007 was as follows:

	Number of Shares	Weighted Average Exercise Price
Outstanding at December 31, 2006	1,965,090	\$27.43
Options granted	713,000	43.29
Options exercised	(616,822)	23.22
Options cancelled	(6,000)	33.21
Outstanding at December 31, 2007	2,055,268	\$34.18
Options granted	794,890	33.25
Options exercised	—	—
Options cancelled	(36,155)	34.65
Outstanding at December 31, 2008	2,814,003	\$33.91
Options granted	1,602,795	19.60
Options exercised	(75,718)	18.42
Options expired	(20,000)	22.78
Options forfeited	(165,610)	24.78
Outstanding at December 31, 2009	<u>4,155,470</u>	<u>\$29.09</u>

There were 75,718 options exercised during the year ended December 31, 2009. The total intrinsic value of options exercised during the years ended December 31, 2009 and 2007 was approximately

Notes to Consolidated Financial Statements (Continued)

Note 11—Stock-Based Compensation (Continued)

\$1.1 million and \$13.8 million, respectively. The weighted average contractual term of options outstanding at December 31, 2009 and 2008 was 7.42 and 7.26 years, respectively.

At December 31, 2009, 2008 and 2007, 2,182,137, 1,812,935 and 1,458,936 options were exercisable, with a weighted average exercise price of \$34.70, \$32.96 and \$31.18, respectively. The weighted average contractual term of options exercisable at December 31, 2009 and 2008 was 6.05 and 6.28 years, respectively.

The aggregate intrinsic value of options outstanding and exercisable at December 31, 2009 and 2008 was \$5.0 million and \$0.3 million, respectively. The total fair value of options vested during the year ended December 31, 2009, 2008 and 2007 was \$5.2 million, \$4.0 million and \$4.7 million, respectively.

Restricted Stock Awards

Restricted stock awarded under the Program are generally released to the recipient after a period of three years; however, 56,700 shares awarded to executive management in February 2008 vest ratably over five years. At December 31, 2009, under the Company's restricted stock plan, 625,570 non-vested shares were outstanding. The number and weighted average grant-date fair value of restricted shares issued in each of the last three years was as follows: in 2009, 275,005 shares were issued at a weighted average fair value of \$18.57; in 2008, 247,805 shares were issued at a weighted average fair value of \$33.23; and in 2007, 182,680 shares were issued at a weighted average fair value of \$44.90. Compensation expense related to restricted stock awards of \$6.0 million, \$6.7 million and \$4.6 million were recognized for the years ended December 31, 2009, 2008 and 2007, respectively. Unrecognized compensation cost related to restricted stock awards of \$6.9 million at December 31, 2009 is to be recognized over a weighted average period of 1.6 years.

The following represents activity related to restricted stock for the year ended December 31, 2009:

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2008	473,950	\$37.06
Shares granted	275,005	18.57
Shares vested	(95,410)	36.92
Shares forfeited	(27,975)	34.50
Outstanding at December 31, 2009	<u>625,570</u>	<u>\$29.07</u>

Note 12—Accumulated Other Comprehensive Income (Loss)

The change in Accumulated other comprehensive income (loss) has no impact on Net income but is reflected in the Consolidated Balance Sheets through adjustments to Shareholders' equity. Other comprehensive income (loss) is derived from adjustments to reflect the accrued post-retirement benefit

Notes to Consolidated Financial Statements (Continued)

Note 12—Accumulated Other Comprehensive Income (Loss) (Continued)

liability, foreign currency translation adjustments, and unrealized gains (losses) on hedging activities. The components of Other comprehensive income (loss) are as follows:

<u>In millions</u>	<u>Pre-Tax Amount</u>	<u>Tax Expense (Benefit)</u>	<u>After-Tax Amount</u>
Year Ended December 31, 2007			
Accrued post-retirement benefit liability	\$ 12.4	\$ 4.7	\$ 7.7
Foreign currency translation	(11.1)	(6.8)	(4.3)
Loss on hedging activities	(4.0)	(1.7)	(2.3)
Other comprehensive (loss) income	<u>\$ (2.7)</u>	<u>\$ (3.8)</u>	<u>\$ 1.1</u>
Year Ended December 31, 2008			
Accrued post-retirement benefit liability	\$(60.7)	\$(22.8)	\$(37.9)
Foreign currency translation	(13.9)	—	(13.9)
Gain on hedging activities	3.6	1.3	2.3
Other comprehensive (loss) income	<u>\$(71.0)</u>	<u>\$(21.5)</u>	<u>\$(49.5)</u>
Year Ended December 31, 2009			
Accrued post-retirement benefit liability	\$ (3.9)	\$ (1.4)	\$ (2.6)
Foreign currency translation	7.8	—	7.8
Loss on hedging activities	(0.6)	(0.2)	(0.4)
Other comprehensive (loss) income	<u>\$ 3.3</u>	<u>\$ (1.6)</u>	<u>\$ 4.8</u>

The accumulated balances for each classification of comprehensive income (loss) are as follows:

<u>In millions</u>	<u>Foreign Currency Items</u>	<u>Accrued Post-Retirement Benefit Liability</u>	<u>Cash Flow Hedges</u>	<u>Accumulated Other Comprehensive Income (Loss)</u>
Balance at December 31, 2007	\$ 18.3	\$ (9.2)	\$ 0.4	\$ 9.5
Net current period change	(13.9)	(38.4)	(3.1)	(55.4)
Reclassification adjustment for realized losses included in net income	—	0.5	5.4	5.9
FAS 158 impact on change in measurement date	—	0.5	—	0.5
Balance at December 31, 2008	4.4	(46.6)	2.7	(39.5)
Net current period change	7.8	0.6	—	8.4
Reclassification adjustment for realized losses included in net income	—	(3.2)	(0.4)	(3.6)
Balance at December 31, 2009	<u>\$ 12.2</u>	<u>\$(49.2)</u>	<u>\$ 2.3</u>	<u>\$(34.7)</u>

Loss on hedging activities, net of tax for the years ended December 31, 2009 and 2008 represented the amortization of a \$5.6 million (\$3.5 million, net of tax) loss resulting from the termination of treasury lock contracts on August 15, 2006. At December 31, 2009, the Company had a remaining unamortized loss of \$3.7 million (\$2.3 million, net of tax) which is reflected in Accumulated other comprehensive loss on the Company's Consolidated Balance Sheets.

Notes to Consolidated Financial Statements (Continued)

Note 13—Retirement Plans

Defined Benefit Plans

The Company maintains defined benefit retirement plans for certain employees. Benefits are based primarily on years of service and earnings of the employee. The Company recognizes the funded status of its defined benefit pension plans in the Consolidated Balance Sheets. The funded status is the difference between the retirement plans' projected benefit obligation and the fair value of the retirement plans' assets as of the measurement date. Prior to 2007, the Company netted unrecognized actuarial losses, unrecognized prior service costs, and unrecognized transition obligation with the plan's funded status in the Company's Consolidated Balance Sheets. Beginning in 2007, these amounts were recorded as an adjustment to Accumulated other comprehensive income, net of tax. Also beginning in 2007, actuarial gains and losses that were not recognized as a component of net periodic pension cost are recognized as a component of Other comprehensive income. These amounts will be subsequently recognized as a component of net periodic pension costs on the same basis as the amounts were previously recognized prior to 2007.

Included in Accumulated other comprehensive income, net of tax at December 31, 2009, are the following amounts that have not yet been recognized in net periodic pension costs: unrecognized prior service cost of \$0.1 million (\$0.1 million, net of tax) and unrecognized actuarial losses of \$77.3 million (\$48.0 million, net of tax). The prior service cost, actuarial loss and transition obligation included in Accumulated other comprehensive income and expected to be recognized in net periodic pension costs during the year ended December 31, 2010, are \$0.1 million credit (\$0.1 million credit, net of tax), \$2.4 million (\$1.5 million, net of tax) and \$0.1 million (\$0.1 million, net of tax) respectively.

The reconciliation of the beginning and ending balances of the projected pension benefit obligation, the fair value of the plan assets and the ending accumulated benefit obligation are as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Funded status		
Projected benefit obligation		
Beginning of year	\$ 161.5	\$ 163.9
Change in benefit obligation:		
Service cost	5.0	6.3
Interest cost	10.5	12.2
Actuarial gain	12.5	(3.8)
Amendment / obligations acquired	—	0.2
Curtailment gain	(0.1)	—
Benefits paid	(17.0)	(17.3)
End of year	<u>172.4</u>	<u>161.5</u>
Fair value of plan assets		
Beginning of year	101.2	165.5
Change in plan assets:		
Actual return on plan assets	20.0	(48.6)
Company contributions	53.0	1.6
Benefits paid	(17.0)	(17.3)
End of year	<u>157.2</u>	<u>101.2</u>
(Unfunded) funded status end of year	<u>\$ (15.2)</u>	<u>\$ (60.3)</u>
Accumulated benefit obligation at end of year	<u>\$ (166.4)</u>	<u>\$ (156.5)</u>

Notes to Consolidated Financial Statements (Continued)

Note 13—Retirement Plans (Continued)

The accumulated benefit obligation differs from the projected pension benefit obligation in that it includes no assumption about future compensation levels. Approximately \$14.5 million of the unfunded status as of December 31, 2009 relates to the Company's executive supplemental and director defined benefit pension plans. The Company has no obligation to fund the executive supplemental and director defined benefit pension plans.

The fair value of the plans' assets at December 31, 2009 and 2008 by asset category are as follows:

Fair Value Measurements at December 31, 2009				
Asset Category (in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Cash	\$ —	\$—	\$ —	\$ —

Other:				
Hedge fund(4)	—	—	12.3	12.3
Total	<u>\$88.9</u>	<u>\$—</u>	<u>\$12.3</u>	<u>\$101.2</u>

- (1) This category represents investment in common shares of Carlisle Companies.
- (2) This category is comprised of investments in mutual funds that invest in equity securities such as large publicly traded companies listed in the S&P 500 Index; small to medium sized companies with market capitalization in the range of the Russell 2500 Index; and foreign issuers in emerging markets.
- (3) This category is comprised of investments in mutual funds that invest in U.S. corporate and government fixed income securities, including asset-backed securities; high yield fixed income securities primarily rated BB, B, CCC, CC, C and D; and US dollar denominated debt securities of government, government related and corporate issuers in emerging market countries.

Notes to Consolidated Financial Statements (Continued)

Note 13—Retirement Plans (Continued)

- (4) This category is comprised of an investment in a fund that invests directly in other private investment funds. The respective plan sold its investment in the hedge fund on January 1, 2010, proceeds of which were approximately equal to the net asset value at December 31, 2009.

**Changes in the Fair Value of Assets that use Significant Unobservable
Inputs for Measurement (Level 3)**

<u>In millions</u>	<u>Hedge Fund</u>
Beginning balance at December 31, 2007	\$ 5.8
Actual return on plan assets:	
Relating to assets still held at the reporting date	(2.5)
Relating to assets sold during the period	—
Purchases, sales and settlements	9.0
Transfers in and/or out of Level 3	—
Ending balance at December 31, 2008	<u>\$12.3</u>
Actual return on plan assets:	
Relating to assets still held at the reporting date	0.4
Relating to assets sold during the period	—
Purchases, sales and settlements	—
Transfers in and/or out of Level 3	—
Ending balance at December 31, 2009	<u>\$12.7</u>

The Company employs a liability driven investment approach whereby plan assets are invested primarily in fixed income investments to match the changes in the plan liabilities that occur as a result of changes in the discount rate. Risk tolerance is established through careful consideration of plan liabilities, plan funded status, and corporate financial condition. The established target allocation is 88% fixed income securities and 12% equity securities. Fixed income investments are diversified across core fixed income, long duration and high yield bonds. Equity investments are diversified across large capitalization U.S. and international stocks. Investment risk is measured and monitored on an ongoing basis through investment portfolio reviews, annual liability measures and asset/liability studies.

The Company utilizes a December 31 measurement date. In 2007 the Company utilized a September 30 measurement date. As a result of the change in measurement date in 2008, the Company was required to record \$0.7 million (\$0.5 million after-tax), representing three months of the fifteen months pension expense to Retained Earnings with a corresponding adjustment to Accumulated other comprehensive income, net of tax. The remaining twelve months of expense was recorded as expense in 2008.

The net asset (liability) consists of the following amounts recorded on the Company's balance sheet at December 31, 2009 and 2008:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Current liabilities	\$ (1.1)	\$ (1.0)
Noncurrent liabilities	<u>(14.1)</u>	<u>(59.3)</u>
Asset (liability) at end of year	<u>\$ (15.2)</u>	<u>\$ (60.3)</u>

Notes to Consolidated Financial Statements (Continued)

Note 13—Retirement Plans (Continued)

No minimum contributions to the Company's pension plan in 2010 are required.

Components of net periodic benefit cost for the years ended December 31 are as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Service cost	\$ 5.0	\$ 5.0	\$ 5.0
Interest cost	10.5	9.8	9.6
Expected return on plan assets	(12.3)	(12.6)	(10.2)
Curtailment gain	0.1	—	—
Amortization of unrecognized net loss	1.2	0.6	1.5
Amortization of unrecognized prior service cost	(0.1)	(0.1)	—
Net periodic benefit cost	<u>\$ 4.4</u>	<u>\$ 2.7</u>	<u>\$ 5.9</u>

Assumptions for benefit obligations at December 31 are as follows:

	<u>2009</u>	<u>2008</u>
Discount rate	5.68%	6.73%
Rate of compensation increase	4.29%	4.29%
Expected long-term return on plan assets	7.00%	8.50%

The Company bases its discount rate assumptions on a yield curve which provides better matching of the expected future retirement plan cash flows with projected yields.

Assumptions for net periodic benefit cost for the years ended December 31 are outlined below:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Discount rate	5.68%	6.35%	5.85%
Rate of compensation increase	4.29%	4.29%	4.29%
Expected long-term return on plan assets	7.00%	8.50%	8.50%

The Company considers several factors in determining the long-term rate of return for plan assets. Current market factors such as inflation and interest rates are evaluated and consideration is given to the diversification and rebalancing of the portfolio. The Company also looks to peer data and historical returns for reasonability and appropriateness.

Post-retirement Welfare Plans

The Company also has a limited number of unfunded post-retirement welfare programs. The Company's liability for post-retirement medical benefits is limited to a maximum obligation; therefore, the Company's liability is not materially affected by an assumed health care cost trend rate.

Included in Accumulated other comprehensive income, net of tax at December 31, 2009, is the following amount that has not yet been recognized in net periodic retiree medical costs: unrecognized prior service cost of \$0.5 million (\$0.3 million, net of tax).

Notes to Consolidated Financial Statements (Continued)

Note 13—Retirement Plans (Continued)

The reconciliation of the beginning and ending balances of the projected post-retirement benefit obligation is as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Benefit obligation at beginning of year	\$ 2.5	\$ 2.6	\$ 2.6
Interest cost	0.2	0.2	0.1
Plan amendments	0.6	—	0.2
Participant contributions	—	—	0.1
Actuarial loss	0.2	—	(0.2)
Benefits paid	<u>(0.1)</u>	<u>(0.3)</u>	<u>(0.2)</u>
Benefit obligation at end of year	<u>\$ 3.4</u>	<u>\$ 2.5</u>	<u>\$ 2.6</u>

The Company's 2009 disclosures for its post-retirement medical benefit programs are determined based on a December 31 measurement date. The net liability consists of the following amounts recorded on the Company's balance sheet at December 31, 2009 and 2008:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Current liabilities	\$(0.3)	\$(1.3)
Noncurrent liabilities	<u>(3.1)</u>	<u>(1.2)</u>
Liability at end of year	<u>\$(3.4)</u>	<u>\$(2.5)</u>

Company contributions in 2010 are expected to approximate 2009 contributions of \$0.2 million.

The Company's post-retirement medical benefit obligations were determined using an assumed discount rate of 5.62% and 6.73% at December 31, 2009 and 2008, respectively. The Company bases its discount rate assumptions on a yield curve which provides better matching of the expected future retirement plan cash flows with projected yields. The effects of a 1% increase or decrease in assumed health care cost trend rates would not be material.

Components of net periodic post-retirement benefit costs for the years ended December 31 are as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Interest cost	\$0.2	\$0.2	\$0.2
Plan amendments	—	—	—
Amortization of unrecognized loss	—	0.1	0.1
Amortization of prior service cost	0.1	—	—
Amortization of unrecognized net obligation	<u>0.2</u>	<u>—</u>	<u>—</u>
Net periodic benefit cost	<u>\$0.5</u>	<u>\$0.3</u>	<u>\$0.3</u>

The Company's post-retirement medical benefit cost for 2009, 2008 and 2007 was determined using an assumed discount rate of 6.73%, 6.35%, and 5.85%, respectively.

Notes to Consolidated Financial Statements (Continued)

Note 13—Retirement Plans (Continued)

The following is a summary of estimated future benefits to be paid for the Company's defined benefit pension plan and post-retirement medical plan at December 31, 2009. Benefit payments are estimated based on the same assumptions used in the valuation of the projected benefit obligation:

<u>In millions Year</u>	<u>Defined Benefit Retirement Plan</u>	<u>Post-Retirement Medical Plan</u>
2010	13.8	0.3
2011	14.5	0.3
2012	13.8	0.3
2013	14.1	0.3
2014	14.9	0.3
2015 - 2019	74.9	1.3

Defined Contribution and ESOP Plan

Additionally, the Company maintains a defined contribution plan covering a significant portion of its employees. Expenses for the plan were approximately \$8.8 million in 2009, \$10.2 million in 2008 and \$7.2 million in 2007. The Company also sponsors an employee stock ownership plan ("ESOP") as part of one of its existing savings plans. Costs for the ESOP are included in the previously stated expenses. The ESOP is available to eligible domestic employees and includes a match of contributions made by plan participants to the savings plan up to a maximum of 4.00% of a participant's eligible compensation, equally divided between cash and the Company's common stock for non-union employees. Union employees' match may vary and is based on negotiated union agreements. Participants are not allowed to direct their contributions to the savings plan to an investment in the Company's common stock. A breakdown of shares held by the ESOP at December 31 is as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Shares held by the ESOP	2.4	2.5	2.6

Note 14—Income Taxes

The provision for income taxes from continuing operations is as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Current expense			
Federal	\$34.2	\$ 51.9	\$ 86.1
State, local and other	7.6	10.7	11.3
	<u>41.8</u>	<u>62.6</u>	<u>97.4</u>
Deferred expense (benefit)			
Federal	3.6	(15.0)	14.6
State, local and other	0.7	(2.3)	0.2
	<u>4.3</u>	<u>(17.3)</u>	<u>14.8</u>
Total provision	<u>\$46.1</u>	<u>\$ 45.3</u>	<u>\$112.2</u>

Notes to Consolidated Financial Statements (Continued)

Note 14—Income Taxes (Continued)

Deferred tax assets (liabilities) are comprised of the following at December 31:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Extended warranty	\$ 24.0	\$ 21.1
Inventory reserves	2.9	2.7
Doubtful receivables	4.5	5.5
Employee benefits	27.6	38.1
Foreign loss carryforwards	—	—
Less: valuation allowance	—	—
Deferred state tax attributes	6.4	7.1
Other, net	2.9	2.1
Gross deferred assets	<u>68.3</u>	<u>76.6</u>
Depreciation	(55.6)	(45.3)
Amortization	(57.8)	(50.2)
Inventory reserves	—	—
Unrepatriated foreign earnings	—	(19.6)
Gross deferred liabilities	<u>(113.4)</u>	<u>(115.1)</u>
Net deferred tax liabilities	<u>\$ (45.1)</u>	<u>\$ (38.5)</u>

In assessing whether deferred tax assets are realizable, the Company considers if it is more likely than not that they will be realized. Realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Based on historical levels of taxable income and projections of future taxable income over the periods in which deferred tax assets are deductible, the Company believes it is more likely than not the benefits of remaining deductible differences will be realized.

A reconciliation of taxes from continuing operations computed at the statutory rate to the tax provision is as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Federal income taxes at statutory rate on income from			
continuing operations	\$ 69.3	\$55.6	\$116.6
Benefit for manufacturing deduction	(2.7)	(3.5)	(4.9)
State and local taxes, net of federal income tax benefit	4.2	2.1	4.7
Rate difference on foreign earnings	(4.1)	(9.4)	(2.3)
Effect of tax law changes	—	—	(0.1)
Reversal of deferred tax liability provided on prior year's			
foreign earnings	(19.6)	—	—
Other, net	(1.0)	0.5	(1.8)
	<u>\$ 46.1</u>	<u>\$45.3</u>	<u>\$112.2</u>
Effective income tax rate on continuing operations	<u>23.3%</u>	<u>28.5%</u>	<u>33.7%</u>

Cash payments for income taxes, net of refunds, were \$14.8 million, \$68.3 million and \$62.7 million in 2009, 2008 and 2007, respectively.

Notes to Consolidated Financial Statements (Continued)

Note 14—Income Taxes (Continued)

The Company's income before tax from U.S. and non-U.S. operations amounted to \$168.0 million and \$17.5 million, respectively, for the year ended December 31, 2009, \$88.3 million and \$0.9 million for 2008, and \$242.1 million and \$80.7 million for 2007. Income from continuing operations before tax from U.S. and non-U.S. operations amounted to \$181.5 million and \$16.4 million respectively, for year ended December 31, 2009, \$117.7 million and \$41.2 million for 2008, and \$254.7 million and \$78.5 million for 2007. The Company has not provided U.S. tax on cumulative undistributed earnings of non-U.S. subsidiaries where such earnings are considered indefinitely reinvested. The deferred tax liability balance of \$19.6 million previously provided with respect to un-repatriated earnings was released in 2009 based on changes in the business. The Company has identified appropriate long term uses for these earnings outside the United States. Generally, the Company has provided U.S. tax on cumulative undistributed earnings of non-consolidated foreign subsidiaries, where such earnings are not considered indefinitely reinvested. Below is a chart of un-repatriated earnings for the most current three years.

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Indefinitely reinvested	\$226.3	\$145.9	\$115.1
Not indefinitely reinvested	<u>—</u>	<u>56.9</u>	<u>56.9</u>
Total	<u>\$226.3</u>	<u>\$202.8</u>	<u>\$172.0</u>

At December 31, 2009, the Company had foreign operating loss carryforwards in Denmark, which were not material. No net deferred tax benefit has been recognized with respect to these losses.

The total gross liability for uncertain tax positions at December 31, 2009, was \$17.8 million. The Company classifies and reports interest and penalties associated with uncertain tax positions as Income tax expense on the Consolidated Statements of Earnings and Comprehensive Income, and as Other long-term liabilities on the Consolidated Balance Sheets. The total amount of interest and penalties accrued at December 31, 2009 was \$2.8 million. The entire balance accrued for uncertain tax positions at December 31, 2009, if recognized, would affect the Company's effective tax rate. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Balance at January 1	\$18.6	\$18.1
Additions based on tax positions related to current year	4.9	2.8
(Reductions)/Additions for tax positions of prior years	(2.9)	0.5
Statute of limitations	(2.8)	(0.5)
Settlements	<u>—</u>	<u>(2.3)</u>
Balance at December 31	<u>\$17.8</u>	<u>\$18.6</u>

The Company is subject to U.S. federal income tax as well as income tax in multiple state and foreign jurisdictions. The Company has concluded all U.S. federal income tax examinations for years through 2008. The Company is currently working with the IRS to complete its compliance assurance audit for tax year 2009. It is expected these matters will be resolved before the 2009 return is completed and filed. Substantially all material state and foreign tax matters have been concluded for tax years through 2004. Within the next twelve months state and foreign audits may conclude and affect the amount of unrecognized tax benefits. The amount of the change in unrecognized tax benefits that may result from audits within the next twelve months is not known.

Notes to Consolidated Financial Statements (Continued)

Note 15—Earnings Per Share

On January 1, 2009, the Company adopted the accounting provisions related to determining whether instruments granted in share-based payment transactions are participating securities. The Company's unvested restricted shares and restricted stock units contain nonforfeitable rights to dividends and, therefore, are considered participating securities for purposes of computing earnings per share pursuant to the two-class method. The computation below of earnings per share excludes the income attributable to the unvested restricted shares and restricted stock units from the numerator and excludes the dilutive impact of those underlying shares from the denominator.

The following reflects the Income from continuing operations and share data used in the basic and diluted earnings per share computations using the two-class method:

In millions, except share and per share amounts	2009	2008	2007
Numerator:			
Income from continuing operations	\$ 151.8	\$ 113.6	\$ 221.0
Less: dividends declared—common stock outstanding, unvested restricted shares and restricted share units	<u>(38.6)</u>	<u>(36.6)</u>	<u>(34.7)</u>
Undistributed earnings	113.2	77.0	186.3
Percent allocated to common shareholders(1)	<u>98.9%</u>	<u>99.2%</u>	<u>99.5%</u>
	112.0	76.4	185.4
Add: dividends declared—common stock	38.2	36.3	34.5
Numerator for basic and diluted EPS	<u>\$ 150.2</u>	<u>\$ 112.7</u>	<u>\$ 219.9</u>
Denominator (in thousands):			
Denominator for basic EPS: weighted-average common shares outstanding	60,601	60,541	61,692
Effect of dilutive securities:			
Stock options	633	307	646
Denominator for diluted EPS: adjusted weighted average common shares outstanding and assumed conversion	<u>61,234</u>	<u>60,848</u>	<u>62,338</u>
Per share income from continuing operations:			
Basic	<u>\$ 2.48</u>	<u>\$ 1.86</u>	<u>\$ 3.56</u>
Diluted	<u>\$ 2.45</u>	<u>\$ 1.85</u>	<u>\$ 3.53</u>
<hr/>			
(1) Basic weighted-average common shares outstanding	60,601	60,541	61,692
Basic weighted-average common shares outstanding, unvested restricted shares expected to vest and restricted share units	<u>61,269</u>	<u>61,032</u>	<u>62,021</u>
Percent allocated to common shareholders	<u>98.9%</u>	<u>99.2%</u>	<u>99.5%</u>

Notes to Consolidated Financial Statements (Continued)

Note 15—Earnings Per Share (Continued)

To calculate earnings per share for the Income (loss) from discontinued operations and for Net income, the denominator for both basic and diluted earnings per share is the same as used in the above table. The Income (loss) from discontinued operations and the Net income were as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Income (loss) from discontinued operations attributable to common shareholders for basic and diluted earnings per share	\$ (7.2)	\$(57.4)	\$ (5.3)
Net income attributable to common shareholders for basic and diluted earnings per share	\$143.0	\$ 55.3	\$214.6

Stock options to purchase approximately 3,522,137 shares in 2009, 2,313,335 shares in 2008 and 200,000 shares in 2007 were excluded from the calculation of diluted earnings per share as such options had exercise prices in excess of the weighted-average market price of the Company's common stock during these periods.

Note 16—Other Long-Term Liabilities

The components of other long-term liabilities are as follows:

<u>In millions</u>	<u>December 31, 2009</u>	<u>December 31, 2008</u>
Deferred taxes and other tax liabilities	\$103.2	\$ 92.4
Pension and other post-retirement obligations	16.8	60.5
Long-term warranty obligations	1.4	2.1
Other	3.7	4.8
Other long-term liabilities	<u>\$125.1</u>	<u>\$159.8</u>

Note 17—Commitments and Contingencies

Leases

For its continuing and discontinued operations, the Company is obligated under various noncancelable operating leases for certain facilities and equipment. Rent expense was \$20.6 million, \$21.9 million and \$18.3 million in 2009, 2008 and 2007, respectively. Future minimum payments under its various noncancelable operating leases in each of the next five years are approximately \$19.9 million in 2010, \$15.9 million in 2011, \$11.9 million in 2012, \$8.2 million in 2013, \$5.6 million in 2014 and \$32.7 million thereafter.

During 2005, the Company sold certain assets and liabilities of its discontinued automotive components business which was part of a series of sales. Certain leases guaranteed by the Company expire in 2011 and have total future minimum lease payments of \$0.7 million as of December 31, 2009. The Company believes that the current lessee will fulfill all obligations required by those lease agreements.

Guarantees and Purchase Obligations

At December 31, 2009, letters of credit amounting to \$34.0 million were outstanding, primarily to provide security under insurance arrangements and certain borrowings.

Notes to Consolidated Financial Statements (Continued)

Note 17—Commitments and Contingencies (Continued)

The Company has financial guarantee lines in place for certain of its operations in the U.S. and Europe to facilitate working capital needs, customer performance and payment, and warranty obligations. At December 31, 2009, the Company had issued guarantees of \$0.9 million, of which an immaterial amount is recorded in current liabilities or Other long-term liabilities. The fair value of these guarantees is estimated to be equal to their contractual amount at December 31, 2009, due to their short-term nature.

Although the Company has entered into long-term purchase agreements for certain key raw materials, there were no take-or-pay contracts with a term exceeding one year in place at December 31, 2009.

Extended Product Warranties

The Company offers various warranty programs on its installed roofing systems, food service equipment, braking products, and truck trailers. The change in the Company's aggregate product warranty liabilities for the period ended December 31 is as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>
Beginning reserve	\$ 7.2	\$ 7.4
Liabilities assumed in acquisition	—	1.0
Current year provision	10.3	11.1
Current year claims	<u>(10.2)</u>	<u>(12.3)</u>
Ending reserve	<u>\$ 7.3</u>	<u>\$ 7.2</u>

The amount of extended product warranty revenues recognized was \$16.2 million for the year ended December 31, 2009, \$15.9 million for the year ended December 31, 2008 and \$15.2 million for the year ended December 31, 2007.

Workers' Compensation, General Liability and Property Claims

The Company maintains self retained liabilities for workers' compensation, medical, general liability and property claims up to applicable retention limits. Retention limits are between \$0.5 million and \$1.0 million per occurrence for general liability, \$0.5 million per occurrence for workers' compensation, \$0.1 million per occurrence for property and up to \$0.5 million for medical claims. The Company is insured for losses in excess of these limits.

Litigation

The Company may be involved in various legal actions from time-to-time arising in the normal course of business. In the opinion of management, the ultimate outcome of such actions will not have a material adverse effect on the consolidated financial position of the Company, but may have a material impact on the Company's results of operations for a particular period. There were no material legal expenses recognized during the year ended December 31, 2009. As a result of the favorable resolution of certain legal actions and insurance proceeds, the Company recognized gains, net of legal fees, of \$8.2 million during the year ended December 31, 2007 that were included in Other expense (income), net.

Notes to Consolidated Financial Statements (Continued)

Note 18—Exit and Disposal Activities

The following table represents the effects of exit and disposal activities not related to discontinued operations on the Company's Consolidated Statements of Earnings for the years ended December 31:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Cost of goods sold	\$12.0	\$ 2.0	\$ —
Selling and administrative expenses	1.8	1.1	—
Other expense (income), net	20.0	18.9	3.4
Total exit and disposal costs	\$33.8	\$22.0	\$3.4

Exit and disposal activities by type of charge for the years ended December 31 were as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Termination benefits	\$ 5.7	\$ 0.4	\$ —
Contract termination costs	1.0	0.7	—
Asset writedowns	21.5	20.3	3.4
Other associated costs	5.6	0.6	—
Total exit and disposal costs	\$33.8	\$22.0	\$3.4

Asset writedowns in 2009 include a \$3.2 million reduction in the value of certain long-lived assets reclassified as held and used from held for sale representing the difference in current carrying value and carrying value before classification as held for sale adjusted for depreciation expense that would have been recognized had the assets been continuously classified as held and used. See discussion below regarding the integration of the power transmission belt business within the Engineered Transportation Solutions segment.

Exit and disposal accrual activities for the years ended December 31, 2009 and 2008 were as follows:

<u>In millions</u>	<u>Termination Benefits</u>	<u>Contract termination costs</u>	<u>Asset Write-downs</u>	<u>Other associated costs</u>	<u>Total</u>
Balance at December 31, 2007	—	—	—	—	—
2008 charges	0.4	0.7	20.3	0.6	22.0
2008 usage	(0.2)	—	(20.3)	(0.2)	(20.7)
Balance at December 31, 2008	<u>\$ 0.2</u>	<u>\$ 0.7</u>	<u>\$ —</u>	<u>\$ 0.4</u>	<u>\$ 1.3</u>
2009 charges	5.7	1.0	21.5	5.6	33.8
2009 usage	(2.4)	(1.5)	(21.5)	(3.8)	(29.2)
Balance at December 31, 2009	<u>\$ 3.5</u>	<u>\$ 0.2</u>	<u>\$ —</u>	<u>\$ 2.2</u>	<u>\$ 5.9</u>

Notes to Consolidated Financial Statements (Continued)

Note 18—Exit and Disposal Activities (Continued)

Exit and disposal activities by segment were as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Total by segment			
Construction Materials	\$ —	\$ 5.9	\$ —
Engineered Transportation Solutions	24.4	13.9	3.4
Interconnect Technologies	3.7	—	—
Foodservice Products	—	2.2	—
Specialty Products	5.0	—	—
Total segment costs	<u>33.1</u>	<u>22.0</u>	<u>3.4</u>
Corporate restructuring	0.7	—	—
Total exit and disposal costs	<u>\$33.8</u>	<u>\$22.0</u>	<u>\$3.4</u>

Construction Materials—On October 21, 2008, the Company announced plans to close its insulation facilities in Anderson, SC and Marlin, TX and exited the facilities by the end of 2008. \$5.9 million of costs related to this closure were incurred in 2008, with no material costs incurred in 2009. The 2008 costs included the write-down of buildings and manufacturing equipment of \$4.3 million, working capital write-downs of \$0.9 million, employee severance costs of \$0.2 million, and moving, relocation and other expenses of \$0.5 million. As of December 31, 2009, there were no material liabilities for unpaid exit and disposal costs.

Engineered Transportation Solutions—Starting in the fourth quarter of 2008, the Company has undertaken several consolidation projects within the Engineered Transportation Solutions segment in efforts to reduce costs and streamline its operations. Descriptions of these projects are set forth below:

- In the fourth quarter of 2008, the Company began consolidating nineteen of its distribution centers located throughout the United States and Canada into nine existing facilities. These consolidations were completed in the second quarter of 2009.
- In the first quarter of 2009, the Company began the consolidation of three wheel manufacturing plants located in California into one facility in Ontario, CA. In the second quarter of 2009, the Company also began the closure of its wheel manufacturing operation in Mexico. These consolidations were completed by the end of 2009.
- In the first quarter of 2009, the Company announced plans to consolidate its pneumatic tire manufacturing operations in Buji, China into its manufacturing operation in Meizhou, China and completed this consolidation by the end of 2009.
- In the third quarter of 2009, the Company announced plans to consolidate its tire manufacturing operations in Heflin, AL, Carlisle, PA, and portions of Buji, China into a new facility in Jackson, TN purchased in the third quarter of 2009. The consolidation of tire manufacturing operations into Jackson, TN is expected to be completed by the end of 2010.
- In the fourth quarter of 2009, within its off-highway braking business, the Company announced plans to close its friction product manufacturing facility in Logansport, IN and to consolidate operations into its locations in Hangzhou, China and Bloomington, IN. This consolidation is expected to be completed by March, 2010.
- Also, in the fourth quarter of 2009, the Company combined its power transmission belt business into its tire and wheel and industrial brake business. The power transmission belt business was

Notes to Consolidated Financial Statements (Continued)

Note 18—Exit and Disposal Activities (Continued)

placed in Discontinued Operations in April 2008. The consolidation of its operations is expected to be completed by the end of 2010.

The Company expects the total cost of these consolidation projects will be approximately \$42.3 million, of which \$25.2 million has been incurred through December 31, 2009, and \$17.1 million is expected to be incurred in 2010. Amounts expected to be incurred in 2010 relate primarily to employee termination and other costs associated with the relocation of employees and equipment.

During 2009, the Company recorded \$24.4 million of expense, including \$14.1 million in fixed asset charges, \$0.5 million in inventory write-downs, \$5.1 million of other costs consisting primarily of contract termination and relocation expenses, and \$4.7 million in employee termination costs.

Included in Accrued expenses at December 31, 2009 was \$5.1 million related to unpaid severance, moving and relocation and other costs for the above projects.

During 2008, the Company recorded \$13.1 million in fixed-asset impairment charges on its power transmission belt business in connection with the decision to move this operation into Discontinued Operations. Refer to Note 20 for further information on these charges. Also in 2008, costs of \$0.8 million were incurred relating to the termination of employees and facilities leases on the some of the tire and wheel distribution centers that were consolidated in 2008.

2007 charges of \$3.4 million related to asset writedowns connected with the closure of certain tire and wheel and power transmission belt business operations.

Interconnect Technologies—The Company has undertaken two consolidation projects within the Interconnect Technologies segment in efforts to reduce costs and streamline operations. Descriptions of these projects are set forth below:

- In the second quarter of 2009, the Company began the consolidation of its Kent, WA facility into its Tukwila, WA facility and this consolidation was completed in the third quarter of 2009.
- In the fourth quarter of 2009, the Company announced that it would consolidate its Vancouver, WA facility into its facilities in Long Beach, CA and Yichang, China and close its Vancouver facility. This consolidation is expected to be completed by June, 2010.

The Company expects the total cost of these consolidation projects will be approximately \$5.2 million, of which \$3.7 million has been incurred through December 31, 2009, and \$1.5 million is expected to be incurred in 2010. Amounts expected to be incurred in 2010 relate primarily to employee termination, lease termination and other costs associated with the relocation of employees and equipment.

Total costs incurred in 2009 related to these consolidations were \$3.7 million and reflected \$0.6 million in employee and contract termination and other disposal costs, \$2.1 million of fixed asset impairment charges and \$1.0 million of inventory write-downs. As of December 31, 2009, a \$0.3 million liability exists for unpaid exit and disposal costs related to the consolidation of the Vancouver, WA facility.

Foodservice Products—In 2008, the Company began the consolidation of its Georgia and Wisconsin janitorial/sanitation manufacturing facilities into one facility in Sparta, WI. Exit and disposal costs of \$2.2 million incurred in 2008 included the write-down of certain property, plant and equipment of \$1.5 million, inventory write-downs of \$0.5 million and employee termination costs of \$0.2 million. This consolidation was completed in the second quarter of 2009 with no material consolidation costs incurred during 2009. As of December 31, 2009, there were no material liabilities for unpaid exit and disposal costs connected with this consolidation.

Notes to Consolidated Financial Statements (Continued)

Note 18—Exit and Disposal Activities (Continued)

Specialty Products—At its heavy-haul trailer business, in the second quarter of 2009, the Company announced plans to consolidate its Brookville, PA facility into the operations located in Mitchell, SD and West Fargo, ND. This consolidation was completed by the end of 2009. During 2009, the Company incurred \$5.0 million in exit and disposal costs, consisting of \$3.8 million in fixed asset impairment charges, \$0.2 million in employee termination costs and \$1.0 million in others costs associated with the relocation of employees and equipment. As of December 31, 2009, there were no material liabilities for unpaid exit and disposal costs connected with this consolidation.

Note 19—Discontinued Operations and Assets Held for Sale

In the fourth quarter of 2009, the Company ended the sale process for the power transmission belt business and combined its operations with the tire and wheel and industrial brake business reported in the Engineered Transportation Solutions segment. The Company had announced plans to dispose of the power transmission belt business on April 16, 2008. Beginning in the second quarter of 2008 and through the third quarter of 2009, the belt business had been classified as a “discontinued operation”. As a result of its decision to retain the belt business, the results of operations have been included in continuing operations for the year ended December 31, 2009, and prior year information has been revised to reflect this change.

In the second quarter of 2008, as part of its commitment to concentrate on its core businesses, the Company announced its decision to pursue disposition of its on-highway friction and brake shoe business. During the first quarter of 2009, the Company made the decision to exit, rather than sell, the on-highway friction and brake shoe business and dispose of the assets as part of a planned dissolution.

In the second quarter of 2007, the Company announced plans to exit the custom thermoset products molding operation (“thermoset molding operation”). The disposition of the thermoset molding operation was completed in 2008.

The assets of these operations have met the criteria for, and have been classified as “held for sale”. In addition, results of operations for these businesses, and any gains or losses recognized from their sale, are reported as “discontinued operations”.

Total assets held for sale at December 31 are as follows:

<u>In millions</u>	<u>December 31, 2009</u>	<u>December 31, 2008</u>
Assets held for sale:		
On-highway friction and brake shoe business	\$0.3	\$34.4
Thermoset molding operation	1.6	1.7
Total assets held for sale	<u>\$1.9</u>	<u>\$36.1</u>

At December 31, 2009, the remaining assets of the on-highway friction and brake shoe business and those of the thermoset molding operation consisted of the land and building formerly occupied by the operation.

Notes to Consolidated Financial Statements (Continued)

Note 19—Discontinued Operations and Assets Held for Sale (Continued)

The major classes of assets and liabilities held for sale included in the Company's Consolidated Balance Sheets were as follows:

<u>In millions</u>	<u>December 31,</u> <u>2009</u>	<u>December 31,</u> <u>2008</u>
Assets held for sale:		
Receivables	\$ —	\$11.8
Inventories	—	18.3
Prepaid expenses and other current assets	—	0.7
Total current assets held for sale	—	30.8
Property, plant and equipment, net	1.9	4.3
Other long term assets	—	1.0
Total non-current assets held for sale	1.9	5.3
Total assets held for sale	<u>\$1.9</u>	<u>\$36.1</u>
Liabilities associated with assets held for sale:		
Accounts payable	\$ —	\$ 3.5
Accrued expenses	—	17.0
Total liabilities associated with assets held for sale	<u>\$—</u>	<u>\$20.5</u>

Net sales and (loss) income before income taxes from discontinued operations were as follows:

<u>In millions</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Net sales:			
On-highway friction and brake shoe business	\$ 20.0	\$ 62.0	\$ 64.2
Systems and equipment	—	—	0.9
Thermoset molding operation	—	5.4	10.8
Giftware business of foodservice products	—	—	0.9
Net sales from discontinued operations	<u>\$ 20.0</u>	<u>\$ 67.4</u>	<u>\$ 76.8</u>
Income (loss) from discontinued operations:			
On-highway friction and brake shoe business	\$(12.5)	\$(65.8)	\$(13.9)
Automotive components	(0.4)	(2.5)	(1.4)
Systems and equipment	0.6	0.4	6.9
Thermoset molding operation	(0.1)	(1.8)	(1.6)
Giftware business of foodservice products	—	—	(0.4)
Income (loss) before income taxes from discontinued operations	<u>\$(12.4)</u>	<u>\$(69.7)</u>	<u>\$(10.4)</u>

Results for the year ended December 31, 2009 included \$6.8 million of pretax expenses related to the disposition of the on-highway friction and brake shoe business, including an inventory write-down of \$3.4 million, property, plant and equipment impairment costs of \$0.8 million, severance costs of \$1.8 million and \$0.8 million of contract termination costs.

Results for the year ended December 31, 2008 included \$55.6 million in pre-tax impairment charges in connection with the on-highway friction and brake shoe businesses. At March 31, 2008, in accordance with Generally Accepted Accounting Principles, the Company recorded assets held for sale at the lower of the

Notes to Consolidated Financial Statements (Continued)

Note 19—Discontinued Operations and Assets Held for Sale (Continued)

carrying amount and fair value. Inventory with a carrying amount of \$26.1 million was written down to its fair value of \$15.2 million, resulting in an impairment charge of \$10.9 million. Long-lived assets held and used with a carrying amount of \$18.7 million were written down to their fair value of \$2.2 million, resulting in an impairment charge of \$16.5 million. Goodwill with a carrying amount of \$27.0 million was written down to its fair value of \$0, resulting in an impairment charge of \$27.0 million. Patents and other intangible assets with a carrying amount of approximately \$1.2 million were written down to their fair value of \$0, resulting in an impairment charge of \$1.2 million. The following table summarizes the impairment charge recognized in the first quarter of 2008:

(In millions)	Pre-Tax Impairment Charges
Inventory	\$10.9
Property, plant and equipment, net	16.5
Goodwill	27.0
Patents and other intangible assets, net	1.2
Total pre-tax impairment charges	\$55.6

Results for the year ended December 31, 2008 also include the accrual of certain workers' compensation claims that remain the Company's liability following the disposition of several businesses over the past few years. A pre-tax gain of \$5.8 million was recognized in 2007 related to the Company's sale of the systems and equipment businesses in 2006.

Note 20—Fair Value Measurements

As described in Note 1, the Company adopted the provisions of the accounting guidance related to fair value measurements of financial assets and liabilities effective January 1, 2008 and adopted the provisions applicable to fair value measurement of non-financial assets and liabilities effective January 1, 2009. This accounting guidance defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The guidance also describes three levels of inputs that may be used to measure fair value:

Level 1—quoted prices in active markets for identical assets and liabilities.

Level 2—observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3—unobservable inputs in which there is little or no market data available, which requires the reporting entity to develop its own assumptions.

The fair value of the Company's financial assets and liabilities measured at fair value on a recurring basis were as follows:

In millions	Balance at December 31, 2009	Quoted Prices In Active Markets for Identical Assets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
Cash and cash equivalents	\$96.3	\$96.3	\$—	\$—

See Note 7 regarding the fair value of the Company's senior notes and Note 13 regarding fair value measurements related to the Company's Retirement Plans.

Notes to Consolidated Financial Statements (Continued)

Note 20—Fair Value Measurements (Continued)

For the three months ended December 31, 2009, the Company measured certain non-financial assets at fair value on a nonrecurring basis within the Engineered Transportation Solutions and Interconnect Technologies segments. Within the Engineered Transportation Solutions segment, property, plant and equipment within the power transmission belt business with a carrying amount of \$3.2 million were written down to a fair value of zero, resulting in an impairment charge of \$3.2 million, which was included in Other expense (income), net. The impairment charge resulted from the decision to integrate and combine the power transmission belt business, which had been previously reported as Discontinued Operations, into the tire and wheel business. The fair value determination was based upon Level 3 inputs reflecting a market participants' determination of the net realizable value of certain property, plant and equipment upon integration of the businesses. In addition, a reduction in the carrying value of property plant and equipment for the power transmission belt business was recorded of \$3.2 million, reflecting the difference between their current carrying value and carrying value before classification as held for sale, adjusted for depreciation expense that would have been recognized had the assets been continuously classified as held and used.

Also within the Engineered Transportation Solutions segment, during the three months ended December 31, 2009, property, plant and equipment within the off-highway braking business with a carrying amount of \$2.6 million were written down to a fair value of \$0.8 million, resulting in an impairment charge of \$1.8 million, which was included in Other expense (income), net. The impairment charge resulted from the decision to relocate production from the Company's Logansport, Indiana facility to its manufacturing facilities in Bloomington, Indiana and Hangzhou, China and to close its Logansport facility. The fair value determination was based upon Level 3 inputs reflecting a market participants' determination of the net realizable value of the certain assets that would not be transferred to the consolidated operations.

Also during the three months ended December 31, 2009, property, plant and equipment within the Interconnect Technologies segment with a carrying amount of \$1.8 million were written down to a fair value of zero, resulting in an impairment charge of \$1.8 million, which was included in Other expense (income), net. The impairment charge resulted from the decision to relocate production serving the Company's test and measurement market from the Company's Vancouver, Washington facility to its production facilities in Long Beach, California and Yichang, China and to exit the Vancouver, Washington facility. The fair value determination was based upon Level 3 inputs reflecting a market participants' determination of the net realizable value of the assets and leasehold improvements which would have no transferable value upon closure of the facility.

Refer to Note 18 for further discussion of Exit & Disposal activity connected with the above non-recurring fair value measurements.

For the twelve month period ended December 31, 2009, the Company measured other non-financial assets at fair value on a nonrecurring basis.

Within the tire and wheel business of the Engineered Transportation Solutions segment, during the three months ended March 31, 2009, property, plant and equipment with a carrying amount of \$2.9 million were written down to a fair value of zero, resulting in an impairment charge of \$2.9 million, which was included in Other expense (income), net. The fair value determination was based upon Level 3 inputs reflecting a market participants' determination of the net realizable value of the assets. Such assets primarily reflected leasehold improvements in its Buji, China operations that could not be transferred upon consolidation of production into Meizhou, China.

During the three months ended June 30, 2009, as a result of further manufacturing consolidation actions within the tire and wheel business, property, plant and equipment relating to facilities in

Notes to Consolidated Financial Statements (Continued)

Note 20—Fair Value Measurements (Continued)

Pennsylvania, Alabama and China with a carrying amount of \$2.8 million were written down to a fair value of zero, resulting in an impairment charge of \$2.8 million, which was included in Other expense (income), net. This fair value measurement of the impaired assets was based on Level 3 inputs. The Level 3 inputs reflected a market participants' determination that impaired leasehold improvement assets could not be transferred upon consolidation of operations into a new tire production facility in Jackson, TN. In addition, it was management's determination that machinery and equipment subject to the impairment charge was estimated to have zero net realizable value.

During the three months ended June 30, 2009, within the heavy-haul trailer business of the Specialty Products segment, property, plant and equipment relating to the closure of its facility in Brookville, PA with a carrying amount of \$5.6 million were written down to a fair value of \$1.8 million, resulting in an impairment charge of \$3.8 million, which was included in Other expense (income), net. A fair value measurement of \$1.6 million for land, building and leasehold improvements, which resulted in an impairment charge of \$3.3 million, was based on Level 2 inputs. A fair value measurement of \$0.2 million for machinery and equipment, which resulted in a \$0.5 million impairment charge, was based on Level 3 inputs reflecting a market participants' determination of the net realizable value of the assets.

For the three month period ended September 30, 2009, the Company measured certain non-financial assets at fair value on a nonrecurring basis within the Construction Materials segment, resulting in a total impairment charge of \$1.6 million, which was included in Other expense (income), net. These measurements were based on fair value determination of certain long-lived assets within a specialized segment of its commercial roofing operations using Level 3 inputs. Intangible assets consisting of a licensing agreement with a carrying amount of \$0.4 million were written down to a fair value of zero, resulting in an impairment charge of \$0.4 million, based on management's determination of the usefulness of the technology underlying the license agreement in the current market. In addition, certain property, plant and equipment with a carrying value of \$2.3 million were written down to a fair value of \$1.1 million, resulting in an impairment charge of \$1.2 million. The determination was based upon a market participants' evaluation of future cash flows from this production equipment and net realizable value.

As discussed in Note 1, the Company has adopted the provisions applicable to fair value measurement of non-financial assets and liabilities effective January 1, 2009. During the period ended March 31, 2008, the Company carried certain non-financial assets related to its on-highway brake business currently reported as Discontinued Operations, at fair value using Level 2 inputs and recorded impairment losses based on those measurements. These impairment losses are described in more detail in Note 19.

During the period ended March 31, 2008, the Company carried certain non-financial assets related to its power transmission belt business, previously in Discontinued Operations and now reported in the Engineered Transportation Solutions segment, at fair value using Level 2 inputs and recorded impairment losses based on those measurements as follows:

- Property, plant and equipment with a carrying amount of \$53.5 million were written down to their fair value of \$45.2 million, resulting in an impairment charge of \$8.3 million, which was included in Other expense (income), net for the twelve months ended December 31, 2008.
- Goodwill with a carrying amount of \$55.5 million was written down to its fair value of zero, resulting in an impairment charge of \$55.5 million, which was included in Goodwill impairment, for the twelve months ended December 31, 2008.
- Patents and other intangible assets with a carrying amount of approximately \$4.8 million were written down to their fair value of zero, resulting in an impairment charge of \$4.8 million, which was included in Other expense (income), net for the twelve months ended December 31, 2008.

Notes to Consolidated Financial Statements (Continued)

Note 21—Segment Information

In the fourth quarter of 2009, the Company reclassified the power transmission product line from discontinued operations to continuing operations and also combined the industrial brake and friction product line with the tire and wheel, and power transmission product lines to form one operating unit, Engineered Transportation Solutions, strengthening the Company's position with major global agriculture and construction equipment manufacturers and creating opportunities to leverage synergies and best practices. Engineered Transportation Solutions qualifies as a single reportable segment. Accordingly, the segment results for 2008 and 2007 have been revised to reflect the new segment structure and to reflect the reclassification of the Power Transmission product line from a discontinued operations to continuing operations. Further, in the fourth quarter of 2009, management began to evaluate segment profitability based on Earnings before interest and income taxes ("EBIT"). Accordingly, the segment results for 2008 and 2007 have been revised to reflect EBIT as the measure of segment profitability.

The accounting policies of the segments are the same as those described in the summary of accounting policies. The Company's operations are reported in the following segments:

Construction Materials—the principal products of this segment are rubber (EPDM) and thermoplastic polyolefin (TPO) roofing membranes used predominantly on non-residential low-sloped roofs, related roofing accessories, including flashings, fasteners, sealing tapes, coatings and waterproofing, and insulation products. The markets served include new construction, re-roofing and maintenance of low-sloped roofs, water containment, HVAC sealants, and coatings and waterproofing.

Engineered Transportation Solutions—this segment is comprised of the tire and wheel, industrial brake and friction, and power transmission belt product lines. The tire and wheel product lines' principal products include bias-ply, steel-belted radial trailer tires, stamped or roll-formed steel wheels tires, and tire and wheel assemblies. The industrial brake and friction product line's principal products include off-highway braking systems and specialty friction products, and on-highway brake actuation systems. The power transmission product line's principal products include industrial belts and related components.

Interconnect Technologies—the principal products of this segment are high-performance wire, cable, connectors and cable assemblies, including RF/microwave connectors and cable assemblies primarily for the aerospace, business aircraft, defense electronics, test and measurement equipment and wireless infrastructure equipment industries.

FoodService Products—the principal products of this group include commercial and institutional foodservice permanentware, table coverings, cookware, catering equipment, fiberglass and composite material trays and dishes, industrial brooms, brushes, mops and rotary brushes for commercial and non-commercial foodservice operators and sanitary maintenance professionals.

Specialty Products—the principal products of this segment are open-deck construction trailers, dump trailers for material hauling, specialized trailers for large-capacity multi-unit trailers, over-the-road commercial trailers for heavy equipment and truck dealers and commercial haulers, insulated temperature/climate-controlled truck bodies for customers in warehouse-to-retail store delivery and home food delivery.

Corporate—includes general corporate expenses. Corporate assets consist primarily of cash and cash equivalents, facilities, deferred taxes and other invested assets.

NOTE: The sum of the quarterly per share amounts may not agree to the respective annual amounts due to rounding.

- (1) Quarterly financial data for periods prior to fourth quarter 2009 has been revised to reflect the classification of the Power Transmission product line from discontinued operations to continuing operations.

Note 23—Subsequent Events

On February 2, 2010, the Company sold all of its interest in Johnson Truck Bodies, the Company's refrigerated truck body business for proceeds of approximately \$20.3 million, which approximated carrying value.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Carlisle Companies Incorporated

We have audited the accompanying consolidated balance sheets of Carlisle Companies Incorporated as of December 31, 2009 and 2008, and the related consolidated statements of earnings and comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2009. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Carlisle Companies Incorporated at December 31, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Carlisle Companies Incorporated's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 18, 2009 expressed an unqualified opinion thereon.

Charlotte, North Carolina
February 18, 2010

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Carlisle Companies Incorporated

We have audited Carlisle Companies Incorporated's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Carlisle Companies Incorporated's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Carlisle Companies Incorporated maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Carlisle Companies Incorporated as of December 31, 2009 and 2008 and the related consolidated statements of earnings and comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2009 of Carlisle Companies Incorporated and our report dated February 18, 2009 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Charlotte, North Carolina
February 18, 2010

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

(a) Under the supervision and with the participation of the Company's management, including the Company's chief executive officer and chief financial officer, the Company carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation and as of December 31, 2009, the chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures are effective.

Management has prepared a report on the Company's internal control over financial reporting in which management has determined that the Company's controls are effective. A copy of management's report is set forth below.

(b) During the fourth quarter of 2009, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision and with the participation of the Company's management, including the chief executive officer and chief financial officer, the Company evaluated the effectiveness of the design and operation of its internal control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, the Company's chief executive officer and chief financial officer concluded that the Company's internal control over financial reporting was effective as of December 31, 2009.

The internal controls over financial reporting have been assessed by Ernst & Young LLP, whose report with respect to the effectiveness of internal controls over financial reporting is included herein.

Item 9B. Other Information.

None

Part III

Item 10. Directors and Executive Officers of the Registrant.

The following table sets forth certain information relating to each executive officer of the Company, as furnished to the Company by the executive officers. Except as otherwise indicated each executive officer has had the same principal occupation or employment during the past five years.

<u>Name</u>	<u>Age</u>	<u>Position with Company</u>	<u>Period of Service</u>
David A. Roberts	62	Chairman of the Board, President and Chief Executive Officer since June 2007. Former Chairman (from April, 2006 to June, 2007) and President and Chief Executive Officer (from June, 2001 to June, 2007) of Graco Inc., a manufacturer of fluid handling systems and components used in vehicle lubrication, commercial and industrial settings.	June 2007 to date
John W. Altmeyer	50	President, Construction Materials since July 1997.	June 1989 to date
Carol P. Lowe	44	President, Trail King Industries since November 2008; Vice President and Chief Financial Officer from May 2004 to November 2008; and Treasurer from January 2002 to May 2004.	January 2002 to date
Kevin G. Forster	56	President, Asia-Pacific since January 2009; Group President, Specialty Products from February 2008 to January 2009; and President, Asia-Pacific from September 1997 to February 2008.	August 1990 to date
Steven J. Ford	50	Vice President, Chief Financial Officer since November 2008 and Vice President, Secretary and General Counsel since July 1995.	July 1995 to date
Scott C. Selbach	54	Vice President, Corporate Development since April 2006. Formerly a Director of Torridon Companies LLC, a private investment firm, from May 2002 to April 2006.	April 2006 to date

<u>Name</u>	<u>Age</u>	<u>Position with Company</u>	<u>Period of Service</u>
D. Christian Koch	45	President, Carlisle Industrial Brake & Friction since January 2009; President, Carlisle Asia-Pacific from February 2008 to January 2009. Formerly employed by Graco, Inc. (i) as Vice President and General Manager, Asia Pacific from January 2004 to February 2008, (ii) as Vice President and General Manager of Asia Pacific and Latin America from June 2003 to December 2003, (iii) as Vice President, Lubrication Equipment Division from January 2000 to June 2003, and (iv) in various sales and marketing positions in the Industrial and Lubrication Equipment Division prior to June 2003.	February 2008 to date
Fred A. Sutter	49	President, Engineered Transportation Solutions since February 2008. Formerly employed by Graco Inc. (i) as Vice President and General Manager, Applied Fluid Technologies Division from February 2005 to February 2008, (ii) as Vice President and General Manager, Industrial/Automotive Equipment Division from June 2003 to February, 2005, and (iii) as Vice President, Asia-Pacific and Latin America from January 1999 to June 2003.	February 2008 to date
Charles D. Siczek	66	Controller, Chief Accounting Officer since November 2008. Formerly an independent financial and accounting consultant since October 2000.	November 2008 to date

The officers have been elected to serve at the pleasure of the Board of Directors of the Company. There are no family relationships between any of the above officers, and there is no arrangement or understanding between any officer and any other person pursuant to which he was selected an officer.

Information required by Item 10 with respect to directors of the Company is incorporated by reference to the Company's definitive proxy statement to be filed with the Securities and Exchange Commission no later than 40 days before the Annual Meeting of Shareholders to be held on May 14, 2010.

The Company has adopted a Business Code of Ethics covering, among others, its principal executive officer and all management involved in financial reporting. The Business Code of Ethics is published on the Company's website: www.carlisle.com. Any amendment to, or waiver of, any provision of the Business Code of Ethics affecting such senior officers will be disclosed on the Company's website.

In the Company's definitive proxy statement we describe the procedures under which shareholders can recommend nominees for the Board of Directors. There have been no changes to those procedures since the Company's definitive proxy statement dated March 1, 2007.

Item 11. Executive Compensation.

Information required by Item 11 is incorporated by reference to the Company's definitive proxy statement to be filed with the Securities and Exchange Commission no later than 40 days before the Annual Meeting of Shareholders to be held on May 14, 2010.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.**Security Ownership of Certain Beneficial Owners and Management**

Information required by Item 12 is incorporated by reference to the Company's definitive proxy statement to be filed with the Securities and Exchange Commission no later than 40 days before the Annual Meeting of Shareholders to be held on May 14, 2010.

Securities Authorized for Issuance under Equity Compensation Plans

The number of securities to be issued upon the exercise of stock options under the Company's equity compensation plans, the weighted average exercise price of the options and the number of securities remaining for future issuance as of December 31, 2009 are as follows:

Plan Category	Number of securities to be issued upon exercise of outstanding options (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by equity security holders	4,155,470	\$29.09	3,643,897(1)
Equity compensation plans not approved by equity security holders	—	n/a	—
Total	4,155,470	\$29.09	3,643,897

(1) Includes 3,321,820 shares available for award under the Carlisle Companies Incorporated Executive Incentive Program (as amended and restated effective February 4, 2004) (1,015,125 of which may be issued as stock awards) and 322,077 shares available for award under the Carlisle Companies Incorporated Non-Employee Director Equity Plan (as amended and restated effective as of February 2, 2005) (92,077 of which may be issued as stock awards).

Item 13. Certain Relationships and Related Transactions.

Information required by Item 13 is incorporated by reference to the Company's definitive proxy statement to be filed with the Securities and Exchange Commission no later than 40 days before the Annual Meeting of Shareholders to be held on May 14, 2010.

Item 14. Principal Accountant Fees and Services.

Information required by Item 14 is incorporated by reference to the Company's definitive proxy statement to be filed with the Securities and Exchange Commission no later than 40 days before the Annual Meeting of Shareholders to be held on May 14, 2010.

Part IV

Item 15. Exhibits and Financial Statement Schedules.

Financial statements required by Item 8 are as follows:

Consolidated Statements of Earnings and Comprehensive Income, years ended December 31, 2009, 2008 and 2007
Consolidated Balance Sheets, December 31, 2009 and 2008

Consolidated Statements of Cash Flows, years ended December 31, 2009, 2008 and 2007

Consolidated Statements of Shareholders' Equity, years ended December 31, 2009, 2008 and 2007

Notes to Consolidated Financial Statements

Financial Statement Schedules

RATIO OF EARNINGS TO FIXED CHARGES

The following table sets forth the Company's ratio of earnings to fixed charges for the years ended December 31 as indicated:

	Year Ended December 31,				
	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2005</u>
Ratio of earnings to fixed charges	<u>14.90</u>	<u>7.03</u>	<u>14.41</u>	<u>10.86</u>	<u>11.43</u>

For purposes of computing the ratio of earnings to fixed charges, earnings are defined as earnings before income taxes from continuing operations plus fixed charges. Fixed charges consist of interest expense (including capitalized interest) and the portion of rental expense that is representative of the interest factor.

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We consent to the incorporation by reference in this Annual Report (Form 10-K) of Carlisle Companies Incorporated of our report dated February 18, 2010, with respect to the consolidated financial statements of Carlisle Companies Incorporated included in the 2009 Annual Report to Shareholders of Carlisle Companies Incorporated.

Our audits also included the financial statement schedule of Carlisle Companies Incorporated listed in Item 15. This schedule is the responsibility of Carlisle Companies Incorporated's management. Our responsibility is to express an opinion based on our audits. In our opinion, as to which the date is February 18, 2010, the financial statement schedule referred to above, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We consent to the incorporation by reference in the following Registration Statements:

Registration Number	Description of Registration Statement	Filing Date
33-56735	Registration Statement of Carlisle Companies Incorporated—Form S-3	December 5, 1994
333-16785	Registration Statement of Carlisle Companies Incorporated—Form S-3	November 26, 1996
333-71028	Amended Registration Statement of Carlisle Companies Incorporated—Form S-3	March 6, 2002
333-88988	Registration Statement of Carlisle Companies Incorporated—Form S-3	May 24, 2002
33-56737	Carlisle Companies Incorporated Executive Incentive Program—Form S-8	December 5, 1994
33-28052	Carlisle Companies Incorporated Executive Long-Term Incentive Program—Form S-8	April 20, 1988
333-52411	Carlisle Companies Incorporated Executive Incentive Program—Form S-8	May 12, 1998
333-49742	Carlisle Companies Incorporated Executive Incentive Program—Form S-8	November 13, 2000
333-99261	Carlisle Companies Incorporated Non-Employee Directors Stock Option Plan—Form S-8	September 6, 2002

of our report dated February 18, 2010, with respect to the consolidated financial statements of Carlisle Companies Incorporated incorporated herein by reference, our report dated February 18, 2010, with respect to the effectiveness of internal control over financial reporting of Carlisle Companies Incorporated, included herein, and our report included in the preceding paragraph with respect to the financial statement schedule of Carlisle Companies Incorporated included in this Annual Report (Form 10-K) of Carlisle Companies Incorporated for the year ended December 31, 2009.

Rule 13a-14(a)/15d-14(a) Certifications

I, David A. Roberts, certify that:

1. I have reviewed this annual report on Form 10-K of Carlisle Companies Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation;
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
